12 DOAS: Yesterday, Today, and Tomorrow The preceding two chapters presented examples of the technological development and the scientific contributions of the DOAS technique.

It is a beautiful day, but yesterday it was cold. Yesterday, she saw the power she could have to help people from Hell. We got here yesterday, I guess. Perhaps he came yesterday and I have forgotten it. Yesterday was not a good one. Can you just make me forget yesterday and today? We all profess the Christian law of forgiveness of injuries and love of our neighbors, the law in honor of which we have built in Moscow forty times forty churches--but yesterday a deserter was knouted to death and a minister of that same law of love and forgiveness, a priest, gave the soldier a cross to kiss before his execution. Yesterday, as you know, I went to see Prince Bolkonski. Among the Old Guard disorder and pillage were renewed more violently than ever yesterday evening, last night, and today. Vanoli in the alley on my way to the Chinese yesterday, but I cast my eyes down and looked the other way. He chuckled, "Given your understanding at breakfast yesterday, I guess I am going to have to accept that. My days were not days of the week, bearing the stamp of any heathen deity, nor were they minced into hours and fretted by the ticking of a clock; for I lived like the Puri Indians, of whom it is said that "for yesterday, today, and tomorrow they have only one word, and they express the variety of meaning by pointing backward for yesterday forward for tomorrow, and overhead for the passing day. She smiled at me yesterday and asked me to come again, and I love her, and no one will ever know it. The crowds were lighter than yesterday, due to the heavy snowfall making not only climbing difficult, but viewing a wet and laborious task. Dean felt cheated, doubly so because yesterday, a comp day off, it had rained as if St. Swithin was ticked off at the world, denying him the pleasure of biking the Pennsylvania countryside. If the course had been the same distance and level as yesterday, the ride would have been a breeze. Only yesterday she had felt safer when he was around. Yesterday she had alienated the only person in Arkansas who had shown the slightest interest in her plight. As if it were yesterday I remember the preparations, the departure with my teacher and my mother, the journey, and finally the arrival in Boston. Yesterday the Countess of Meath came again to see me. My dear Mother, Yesterday I sent you a little Christmas box. Yesterday I thought for the first time what a beautiful thing motion was, and it seemed to me that everything was trying to get near to God, does it seem that way to you? Yesterday Helen took off her clothes and sat in her skin all the afternoon. My father talks of nothing but marches and countermarches, things of which I understand nothing; and the day before yesterday during my daily walk through the village I witnessed a heartrending scene My brother dined with me yesterday--we nearly died of laughter--he ate

nothing and kept sighing for you, my charmer! Yesterday I learned that, despite the loyalty with which I have kept my engagements with Your Majesty, your troops have crossed the Russian frontier, and I have this moment received from Petersburg a note, in which Count Lauriston informs me, as a reason for this aggression, that Your Majesty has considered yourself to be in a state of war with me from the time Prince Kuragin asked for his passports. It was ours yesterday, but now it is his. On his face, besides the look of joyful emotion it had worn yesterday while telling the tale of the merchant who suffered innocently, there was now an expression of quiet solemnity. Yesterday Today and Tomorrow - A Poem For People Wanting Hope This is a poem which is read in many 12 Step meetings around the world. In my early sobriety I clung to the words, weeping my shame from my blog.quintoapp.comys it still reaches deep into my soul each time I read it or hear it.

Though some babies quickly develop predictable feeding and sleeping patterns, this can take quite a bit of time for most newborns. In fact, moving from alert to sleep can be an arduous affair in spite of loving efforts to soothe a baby. Be Consistent For the first six months or so, you are helping the baby make order out of chaos. Consistent responsive interactions like being fed when hungry and soothed when upset helps babies organize themselves. Loving relationships are formed and life becomes a more predictable pattern of people, things, and events. Babies also bring their own temperament or personality to the family, adding another voice to what will happen and when. It can be changed to meet the evolving needs of growing toddlers as long as the sequence remains the same. For example, month-old Sammy is moving to one long nap instead of two. As a result, he is tired earlier in the day. Lunch is moved up so he can be sure to eat before he sleeps. The events of the morning continue to follow the same sequence of play, snack, outdoors, and lunch. But each is slightly shortened. None of the toddlers are confused by the change, because their routine remains the same. Be Flexible Toddlers and 2-year-olds have all the time in the world. Adults never have enough. Adults tend to try and stick to the clock. We try to keep toddlers "on time. What You Can Do Talk about specific sequences of events. Miller, EdD Oh so very excited, 4-year-old Sapphire yells to her teacher: Three- and 4-year-olds need to have lots of meaningful experiences with time in a personal sense bedtime, storytime to gain a clearer understanding of temporal ideas. Following and being involved with a familiar sequence of routines and schedules enhances their time awareness of the present, past, and future. Setting Regular Schedules Preschoolers also need to build on these experiences, because time is such an abstract concept for young children. For them, it is rather intangible. For example, Sapphire can observe the symbols of the passage of time her beautiful cupcakes with birthday candles, which represent that a whole year has gone by and she is now a year older , but the actual time is invisible to her. Threes and fours feel secure when they follow the same time schedules daily-get dressed, eat breakfast, ride to school, participate in group time, and engage in free playtime. It is possible for adults to change the length of time of their activities. However, it becomes very confusing for young children if the order of events is changed. When 4-year-old Jake asks, "When do we play outside? For instance, Sapphire knows that group time occurs before snack time. This reinforces for children timely events, such as how they painted a mural after they went on their walk. When Sapphire announces she will go to visit her Nana next week to celebrate her birthday, she indicates that she can anticipate an event in the future and plan for it. Recalling past events, Emily, a 3-year-old, explains to her friend, "Yesterday, you rode the red trike. I had the blue one. Understanding Time-Telling Tools Although preschoolers cannot really read abstract time-telling aides such as analog clocks and calendars until they are older, they are aware that these are tools that help them measure how time passes. Three-year-old Allison loves to hold up her pretend watch and use her special clock vocabulary: Representing Time With Words As preschoolers develop a sense of time, they are really quite comfortable and knowledgeable using a wide variety of words for units of time in the past, present, and future. By age 4, Ivan knows that he is 4-years-old and he may proudly hold up four fingers to show you his age right now. Sapphire entertains several variations of day "today," "my special day," "my birthday" and compound examples of time "group time," "snack time". At 4, Martha uses seasonal words in context as she relates, "Last winter, we made a snowman on the playground. He shares, "This year I will dress up in a ghost costume for Halloween. Three-year-old Sara giggles as she shares, "When I was a little baby, I wore diapers. Share me classic book Good Night Moon to help children put closure on the day. Keep a class "events book. Keep adding sequential pages to the events book to form an interesting visual timeline to review and discuss. An excited Joshua is saying, "We are going to visit Grandma yesterday! The concept of time can be difficult for 5- and 6-year-olds to grasp, because it is so abstract. A sense of time is gained gradually during the process of living through timespans marked by events. As children experience the world

of people and things, their concept of time becomes integrated into their everyday lives, as well as into their vocabularies. Linking Time to Events The words for yesterday, today, and tomorrow are only understandable when they are linked to a specific event or activity that makes the concept of time concrete. During this stage of development, children are learning to understand more and more abstractions. They are in the process of defining time by recognizable events or symbols. Whether it is a memorable event a party or trip or a familiar repeating pattern of the day, these events give 5- and 6-year-olds something temporal to hold on to. Using a Calendar Kindergarten children learn about time by observing and recording it. That is one reason why the calendar is a popular part of kindergarten group time. The problem is that sometimes teachers forget to tie the day and date with something observable and recordable. Weather provides a perfect observable and changeable event to mark the passage of days. Five- and 6-year-olds can remember that yesterday was sunny and today is cloudy. They can even make a prediction for the weather tomorrow. A weather calendar and graph is a perfect way for children to experience yesterday, today, and tomorrow. Exploring Concepts of Time Perhaps the most confusing is the concept of past, present, future. As you can imagine, these words are even more abstract than yesterday, today, and tomorrow. Five- and 6-year-olds are beginning to understand that things their parents did were in the "old days," and what their grandparents did was even older than that. Yet, they are still pretty confused by this, as evidenced by Susan who tells her grandmother that she must have "ridden to school on a dinosaur in the old, old days! Kindergartners can begin to understand this approach to time by exploring both old and new ways to do things. For example, discuss the way people go from place to place. The old way in the past might be to ride a horse and the new way in the present is to drive or fly. Ask children to predict how people will move from place to place in the future. Structuring the Day Of course, recognizing the parts of the day is the most basic way, children become aware of the passage of time. Their capacity to learn about time increases as they become aware of how events reoccur at specific times during the day. Kindergartners want to know what time it is and are beginning to understand that certain things like the start and end of school happen at a defined time each day. Make a photographic timeline for the day at school, marking each event with a picture of the clock at that time and the time written numerically. You will be giving children an easy reference tool for understanding that, "No, it is not time to go home until the end of the day. Emphasize words such as soon, later, early, yesterday, today, tomorrow, next week, morning, noon and evening. Point out a concrete experience to illustrate the word when you use it. Create a weather calendar for marking the passage of days. Keep a weather graph of the number of sunny, cloudy, rainy, or snowy days each month. Children can observe the passage of seasons by observing the difference between the September weather graph and the February one. Show children how to make a "time diary" or journal. Children can use plain paper plates to make the pages and decorate them like clock faces. Show the children how to draw the time on the clock and then ask them to draw, paste, or write about what they usually do at that time. Put the paper plate pages together with brass fasteners to make a book. Stage by Stage Infants need individualized feeding, sleeping and playing schedules. Gradually introduce toddlers to routines that mesh with the needs of the group. Give toddlers plenty of time to move from one activity to another. This lowers their natural need to resist direction. Stage by Stage Time is still very much an abstract concept for threes and fours. Preschoolers need lots of personal experiences with time snacktime, storytime in order to develop an understanding of time concepts. Before and after are two concepts of time that preschoolers can now understand. Stage by Stage Kindergartners define time by recognizable events and symbols. Five- and 6-year-olds learn about time by observing and recording it for example, charting the weather. Five- and 6-year-olds are beginning to understand that certain events occur at a defined time each day.

Growing Yesterday-Today-and-Tomorrow This plant is not that difficult to grow and care as long as their needs are met. These beauties look the best during spring, but also bloom occasionally during other seasons. Select a proper planting location at least five feet away from walls or other plants, and dig a hole twice the base of the plant. Make sure you cover all the roots with the soil. Water your plant properly and keep it moist not watery. Prune your plant in spring and early days of the fall season. They can grow up to 10 feet tall, but pruning it back to three feet is advisable for those having small gardens. They grow best in the areas with rainfall and partial shade, as they do not enjoy extreme heat or extreme cold with frost conditions. The soil suitable for them to grow should be slightly acidic. If you do not have acidic soil, then fertilizer for acidic plants will suffice to grow this plant. The pH value should be a neutral 7. The soil should be rich and moist. It should hold the moisture without getting hard or too muddy. The moisture gets retained and will flow through the soil. The best way to make a soil loamy is to mix silt, organic materials, and sand in it. This plant needs to be kept moist. It might cause the leaves to become yellowish and eventually die. This plant thrives in humid and heat conditions. You can even create artificial conditions to grow the plant indoors.

Growing in Containers If you happen to live in a cooler climate, this plant can be grown in containers. These plants will look the best and ideal for a patio area or an entryway. You will need to prune them to keep it smaller. Without a doubt, these flowers are pretty and sweet-smelling, but they do have a dark side. They contain poisonous alkaloids that may cause harm to small children or pets who might get tempted to smell or taste them. The seeds from the flowers are highly poisonous and the berries that they produce are toxic. This may not be a good option for those having pets and small children in their family. Caution and extra care should be taken in case you decide to plant these. Consult a doctor or vet immediately if ingested by your child or pet. If ingested by cats and dogs, the possible symptoms to watch out are:

Garden Ideas Brunfelsia Shrubs If your area has relatively relatively warm winters, your choices of flowering shrubs include some tropical varieties, including Brunfelsia shrubs Brunfelsia spp. The most commonly available plant Brunfelsia grandiflora grows in U. Department of Agriculture plant hardiness zones 10 and 11, and may also survive in the warmer parts of zone 9. Characteristics The yesterday-today-and tomorrow-plant is an evergreen shrub with an upright form that grows to about 8 feet tall with an equal spread when mature. It has oval, 2-inch-long, dark green leaves and usually blooms through April and May, then sporadically throughout summer. The flowers resemble pansies and have a sweet, pleasant fragrance. The result is a shrub covered with flowers in three different colors, depending on the age of each blossom. Site Selection The yesterday-today-and-tomorrow plant makes a good specimen, planted where its unusual blooming pattern can be seen. It does well in a spot in full sun, but is also tolerant of partial shade and, unlike many flowering plants, puts on a profuse bloom even without constant, bright light. In areas with intensely hot summers, the plant does best in a spot that gets filtered shade during the afternoon hours. In these regions, it can also do well planted along an east-facing wall of a building, which will provide afternoon shade. Soil and Other Care This plant tolerates any type of ordinary garden soil, provided it has good drainage. For soil that contains clay and tends to hold water, adding sand at planting time can improve its drainage. A schedule of regular, weekly watering promotes the best growth and flowering. You can also encourage good growth by fertilizing a plant three times each year, generally in early spring, mid- and late-summer. You can also prune a plant in summer, after heavy blooming has ended. Varieties Several types of plants are available, all commonly called yesterday-today-and-tomorrow, but belonging to different species. One type, also called Brazil raintree Brunfelsia pauciflora , grows in USDA zones 9 through 12 and has especially showy, 2-inch wide flowers, compared to the more commonly available plant Brunfelsia grandiflora , whose flowers are a bit smaller. A variety sometimes called Paraguay jasmine Brunfelsia australis is best-adapted for shade and is more cold hardy than the common variety, growing in USDA zone 9 through However, it grows quite large, up to 12 feet tall at maturity.
