

**Chapter 1 : Owner's Manuals - Vehicle Maintenance - Subaru Canada**

*Page 1. OWNER'S MANUAL Crosstrek Love. It's what makes a Subaru, a Subaru. Page Vehicles shown on the cover of this booklet may not be available in all markets.*

Gently moves the vehicle back into its lane when it unintentionally drifts across a lane marker stripe. The driver must turn this on for it to work. Lane Keep works at 40 mph or greater for freeway driving etc, and is only for drifting out of your lane and not for intentionally steering. Its not self driving or for going around curve in the road. Works at very low speeds, in reverse only. It will beep more rapidly as the car moves closer to the object, and will stop the car from hitting the object as long as its at -very- low speed. The main benefit is the beeping. The auto brake function can be disabled when parking in tight spaces. Use the control buttons in the lower left of the steering wheel to select and activate or disable various functions as displayed in the center of the gauges. Mostly for dark or rural, not urban, driving. Uses the eyesight cameras to detect the amount of outside light. Previously on Limiteds as well but the Limited now has steering responsive headlights uses steering wheel position to briefly turn on the left or right fog light to illuminate a corner when the steering wheel is turned. It will pace with speed up and slow down the vehicle ahead at a distance from that car you set. It issues warnings and activates automatic braking when needed. Adaptive Cruise Control can regulate vehicle speed in order to keep a safe following distance from the vehicle ahead. It does not replace conventional cruise control, which can still be used when desired. It warns the driver and reduces engine power until he or she applies the brakes to avoid an impact. It takes no corrective vehicle action other than issuing visual and audible warnings. Works over app 30mph. Lane Sway Warning only operates at speeds over 38 mph. Eyesight cars have three windshield washer squirters, with the 3rd one attached to the right side wiper arm so it to sprays and cleans in front of the cameras. Essentially, EyeSight needs time to recognize an object or potential obstacle. If the speed difference between the EyeSight vehicle and the object is greater than up to 30 mph, the object will likely not be detected. The Subaru Rear Vehicle Detection SRVD system uses two radar units, each mounted underneath the rear bumper skin immediately below the rear taillights and above a typical bumper impact line to help avoid damage in a rear fender bender. The radar units send out signals to detect vehicles behind and to each side of the Subaru vehicle, especially those vehicles that might not be visible in the rearview mirrors. Lane Change Assist LCA looks for vehicles farther back in an adjacent lane " about feet behind the Subaru vehicle. If the vehicle detected is approaching quickly " at a speed that could bring it alongside the Subaru vehicle within a few seconds " Lane Change Assist will illuminate a warning icon in the exterior mirror on that side. If the driver signals a lane change, the warning icon in the mirror will flash rapidly. It will illuminate a warning icon in the exterior mirror when it detects a vehicle alongside and behind the Subaru vehicle in an area of about 22 feet x 11 feet. If the driver signals a lane change to that side, the warning icon in the mirror will flash. Rear Cross Traffic Alert RCTA uses the same radars and sensors to help detect vehicles that cannot be seen by the driver as they approach from either side. This is especially helpful when reversing from between two larger vehicles. The driver is alerted by a flashing icon in the appropriate exterior mirror as well as an audible beep alert.

*Download manual Subaru Crosstrek Manual Description The power is switched every time the push-button ignition switch is pressed. Should the warning light illuminate steadily the tire to lose air rapidly.*

In which Subaru vehicles can BlueConnect be installed? Check the phone compatibility tool. If a phone is not listed, then it has not been tested and compatibility is unknown. Can I pair a Bluetooth adapter with BlueConnect? No, BlueConnect is only compatible with cell phones that have Bluetooth built in and that are listed as a compatible phone. Will I be able to transfer my phonebook entries into to the BlueConnect phonebook? No, the system does not support phonebook transfers via Bluetooth. You must enter phone book entries using voice commands. What should I do if BlueConnect does not auto-connect to my previously paired phone? Also, make sure that BlueConnect is marked as a "trusted" device. This will allow BlueConnect to automatically connect to your phone when it is in range. What if I still have questions? EST Monday through Thursday Check the phone compatibility tool on this page. How do I pair my phone to the system? Up to five compatible mobile phones may be paired, although you can only use one phone at a time to make or receive calls. The system will recognize the last phone paired as the priority. Bluetooth technology allows two electronic devices to transfer data between them over relatively short distances. Available as a genuine accessory on: How far is the range of the Bluetooth signal? Anywhere within the vehicle is more than adequate to maintain a connection. Depending on several factors, Bluetooth technology generally supports a range of up to 30 feet. What is the registering or "pairing" procedure? Can I connect more than one mobile phone? Yes, your Subaru Bluetooth Handsfree Kit can connect with and recognize up to five compatible mobile phones, although you can only use one phone at a time to make or receive calls. Can I access and call phone numbers from my mobile phone contact book? Yes, individual phone numbers may be downloaded from a compatible cell phone and stored in the vehicle for faster dialing. Phone numbers from multiple phones will all be stored as part of one master contact list. Will I be able to transfer the phonebook entries on my cell phone into to the phonebook? Yes, but in most cases you will need to import contacts one at a time. You can contact our Customer Service department at the number below, or submit your question through our Contact Us form.
