

**Chapter 1 : 4Life Transfer Factor® RioVida® Tri-Factor® Formula - Factor de Transferencia 4Life**

*4Life Transfer Factor® RioVida® Tri-Factor® Formula. The first and only transfer factor liquid supplement in the world, with added antioxidant energizers\*.*

Please type the security code into this box to verify this is not spam. I bought Riovida juice with Transfer Factor and had used it for 3 months. I bought it as I had a recurring upset stomach and intestinal pains. After the first month of using 2 bottles I found no difference. Same sharp pains, same bloating, same feeling of sickness. In the 2nd month I bought 2 packs 4 bottles. In that month I also came down with the flu. I doubled the dosage, no ease. The flu lasted around 9 days, longer than I usually get it. Still no improvement with my gut. Surely it would have worked by then. I wrote to the person who runs the website, no refund. I wrote to 4life, no refund. Absolutely do not buy this garbage. Was this Review Helpful? I had a coupon for it and I decided to try it. I ended up paying 60 bucks and taking one sip and dumping the rest down the drain. It made my throat get really itchy and it drove me nuts! From the 2 oz. It made me get cramps and I was in a lot of pain. When I drank it, I immediately spit it out because it tasted gross. I would never take this product again. The taste is not worth the beneficial effects of this product. It also made me feel better throughout my day.

## Chapter 2 : Riovida | 4Life Transfer Factor Riovida | TF Riovida

*4Life Transfer Factor RioVida is a delicious, nutritional juice. It is the best beverage supplement that combines the immune-boosting benefit of Tri-Factor.*

This power-packed juice is perfect for people on the go and makes it easier than ever to receive your daily supply of immune-supporting 4Life Transfer Factor, along with a potent source of free-radical balancing antioxidants. What are Transfer Factors? Transfer factors educate the immune system about a present or potential danger and equip it with a plan for action. Although the most notable function of these smart molecules is to support the recognition of a threat, they also help remember past invasions, allowing the body to respond quickly to similar health threats. In addition, transfer factors boost or balance your immune response, depending on what your system needs. RioVida includes Transfer Factor E-XF, which combines the strength of transfer factors extracted from cow colostrum and chicken eggs. This blend was developed exclusively by 4Life using patented and patent-pending technology. How do Transfer Factors Works? Our immune system provides us with important protection from the threats we face in our environment, just as the computer seeks protection from internet viruses with anti-virus software. Just as you can upgrade your anti-virus software to secure your computer from internet viruses, transfer factors provide the upgrades your immune system needs. Transfer factors tailor their teaching to the type of education your immune system needs - increasing function and vigilance, or restoring balance. Are Transfer Factors Validated? Transfer factors were discovered in by the pioneering scientist, Dr. Since that time, world-leading scientists and physician have established the safety and outstanding immune system support of transfer factors with valuable medical research and hundreds of scientific papers documenting their benefits. With the recent achievement of transfer factor extraction processes from cows and chickens, transfer factor science has entered into an exciting new era. There have been over 3, scientific studies published on Transfer Factor. In addition to the immune punch of Transfer Factor E-XF, RioVida contains a variety of ingredients to balance free radicals within the body and support cardiovascular, digestive, urinary and immune health. Pomegranates are a great source antioxidants, fiber and vitamin C. RioVida contains vitamin C and lactoferrin a beneficial milk protein for their fortifying antioxidant properties and nutritional immune system support. Transfer factors themselves are non-allergenic. Any remaining lactose in colostrum-derived transfer factors is far below the amounts that typically cause reactions. As a precaution, people with allergies specifically to egg yolks should check with their physician prior to taking RioVida.
