You might even do things that unwittingly fuel your anxiety. You might hyperfocus on the future, and get carried away by a slew of what-ifs. How do you reduce your anxiety right now? What if I start to feel worse? What if they hate my presentation? What if she sees me sweating? What if I bomb the exam? You might judge and bash yourself for your anxiety. You might believe your negative, worst-case scenario thoughts are indisputable facts. Thankfully, there are many tools and techniques you can use to manage anxiety effectively. She suggested this practice: Learning deep breathing 2. Acceptance is critical because trying to wrangle or eliminate anxiety often worsens it. It just perpetuates the idea that your anxiety is intolerable, he said. The bottom line is that the feeling of anxiety is less than ideal, but it is not intolerable. Realize that your brain is playing tricks on you. Psychiatrist Kelli Hyland, M.D. She recalled an experience she had as a medical student. A wise, kind and experienced psychiatrist came over to [the patient] and gently, calmly reminded him that he is not dying, that it will pass and his brain is playing tricks on him. It calmed me too and we both just stayed with him until [the panic attack] was over. Hyland, who has a private practice in Salt Lake City, Utah, tells her patients the same thing. But the worst thing that will happen is that some people, many of whom will never see you again, will get a few chuckles, and that by tomorrow they will have completely forgotten about it. Is this really likely to happen? If the worst possible outcome happens, what would be so bad about that? Could I handle that? If something bad happens, what might that mean about me? Is this really true or does it just seem that way? What might I do to prepare for whatever may happen? Challenging Negative Self-Talk 5. Use a calming visualization. Watch leaves pass by on the river or clouds pass by in the sky. Assign [your] emotions, thoughts [and] sensations to the clouds and leaves, and just watch them float by. Typically, we assign emotions, thoughts and physical sensations certain qualities and judgments, such as good or bad, right or wrong, Hyland said. And this often amplifies anxiety. Practical Tips for Using Imagery 6. Be an observer “without judgment. Anxiety can produce a lot of negative chatter. Focus on right now. Even if something serious is happening, focusing on the present moment will improve your ability to manage the situation, he added. Focus on meaningful activities. If you were going to see a movie, still go. If you were going to do the laundry, still do it.
