Horse/Human F/F vore, non-consensual, sexual themes- M/F, F/F I had intended on proof reading and re-writing portions of this story before I posted it but, unfortunately, I hit some major writer's block and just never managed to get around to it.

The female offspring of Helios were called Heliades. The Greek sun god had various bynames or epithets, which over time in some cases came to be considered separate deities associated with the Sun. Most notably, Helios is closely associated with, and sometimes consciously identified with, Apollo. Diodorus Siculus of Sicily reported that the Chaldeans called Cronus Saturn by the name Helios, or the sun, and he explained that this was because Saturn was the most conspicuous of the planets. If Zeus had not interfered by throwing a thunderbolt at Phaethon, killing him instantly, all mortals would have died. Helios was sometimes characterized with the epithet Panoptes "the all-seeing". In the story told in the hall of Alcinous in the *Odyssey* viii. In the *Odyssey*, Odysseus and his surviving crew land on Thrinacia, an island sacred to the sun god, whom Circe names Hyperion rather than Helios. There, the sacred red[citation needed] cattle of the Sun were kept: You will now come to the Thrinacian island, and here you will see many herds of cattle and flocks of sheep belonging to the sun-god. There will be seven herds of cattle and seven flocks of sheep, with fifty heads in each flock. They do not breed, nor do they become fewer in number, and they are tended by the goddesses Phaethusa and Lampetia, who are children of the sun-god Hyperion by Neaera. Zeus destroys the ship with his lightning bolt, killing all the men except for Odysseus. In one Greek vase painting, Helios appears riding across the sea in the cup of the Delphic tripod which appears to be a solar reference. Athenaeus in *Deipnosophistae* relates that, at the hour of sunset, Helios climbed into a great golden cup in which he passes from the Hesperides in the farthest west to the land of the Ethiopians, with whom he passes the dark hours. While Heracles traveled to Erytheia to retrieve the cattle of Geryon, he crossed the Libyan desert and was so frustrated at the heat that he shot an arrow at Helios, the Sun. Heracles used this golden cup to reach Erytheia. His other children are Phaethusa "radiant" and Lampetia "shining". By Hellenistic times Apollo had become closely connected with the Sun in cult. The identification became a commonplace in philosophic texts and appears in the writing of Parmenides, Empedocles, Plutarch and Crates of Thebes among others, as well as appearing in some Orphic texts. Therefore, Dionysus, being angry with him, sent the Bassarides, as Aeschylus the tragedian says; they tore him apart and scattered the limbs. The sun-god, the son of Hyperion, with his sun chariot, though often called Phoebus "shining" is not called Apollo except in purposeful non-traditional identifications. Helios is also sometimes conflated in classical literature with another Olympian god, Zeus. Cult of Helios[edit] L. Farnell assumed "that sun-worship had once been prevalent and powerful among the people of the pre-Hellenic culture, but that very few of the communities of the later historic period retained it as a potent factor of the state religion". Burnet observes, "but he might think them to be gods, since Helios was the great god of Rhodes and Selene was worshiped at Elis and elsewhere". Hvar-khshaeta, Mah; all the evidence shows that Helios and Selene were minor gods to the Greeks. Their annual gymnastic tournaments were held in his honor. The Colossus of Rhodes was dedicated to him. Helios also had a significant cult on the acropolis of Corinth on the Greek mainland. The scattering of cults of the sun god in Sicyon, Argos, Ermioni, Epidaurus and Laconia, and his holy livestock flocks at Taenarum, seem to suggest that the deity was considerably important in Dorian religion, compared to other parts of ancient Greece. Additionally, it may have been the Dorians to import his worship to Rhodes. While the predominance of Helios in Sparta is currently unclear, it seems Helen was the local solar deity. His name appears on the bronze liver of Piacenza, next to Tiur, the moon. In Late Antiquity a cult of Helios Megistos "Great Helios" Sol Invictus drew to the image of Helios a number of syncretic elements, which have been analysed in detail by Wilhelm Fauth by means of a series of late Greek texts, namely: Helios in these works is frequently equated not only with deities such as Mithras and Harpocrates, but even with the monotheistic Judaeo-Christian god. He can take the form of all animals of the zodiac.

He robbed banks, trains, and stagecoaches, and he eluded the U. He did all that because he had the horses. With Quantrill, he learned the importance of horses, developed into an expert horseman, and adopted the position that the best-mounted most often win. The legendary career of murder and plunder began on February 14, , in Liberty, Missouri, and would last for 16 years as lawmen made every possible effort to capture him. But they failed to catch James because his horses easily out-maneuvered and out-ran his pursuers. She was a high-spirited, fleet-footed bay, which Jesse liked so well that at first, he refused to ride her during robberies. He was dumped from his horse, almost caught, and chased for days by Sheriff Tomlinson, also a former Quantrill rider. Unhappy about not catching Jesse, Tomlinson decided to take the mare, Katie, as a consolation prize. Jesse rode Katie from then on until during a raid on Gads Hill, Missouri, she broke loose and ran off. Ebony, a solid black Thoroughbred traveled quickly at night, while Skyrocket was a better day horse. In , Jesse posed astride Stonewall for a photograph. The horses owned and ridden by the James brothers during their countless raids were always of high quality. Jesse even had several imported from Kentucky because he wanted mostly Thoroughbred blood. The horses had great stamina and were able to gallop day and night, plunge through heavy underbrush, and across prairies. Well-schooled, his horses remained calm and collected, even during the wildest of battles. Jesse retired from the outlaw life for awhile and lived near Nashville, Tennessee, where he became a respected citizen of the area and got involved in horse racing, even riding in many races. A strawberry roan Thoroughbred mare named Red Fox was his best runner, seldom ever beaten. But Jesse went back to robbing and looting, and in April of , he and two cohorts, Bob and Charley Ford were planning a daring raid. It was a hot day, and Jesse had been out caring for his horses. He returned to his house, took off his coat, and turned his back on the Ford brothers as he began dusting a photograph of his horse, Skyrocket. On a pre-arranged signal, the Ford brothers drew their pistols and shot Jesse James to death. Visit A Horse, Of Course on the internet at www.
