Chapter 1 : AIEEE Chemistry Solutions? | Yahoo Answers

AIEEECODE-A 2 CODE A INSTRUCTIONS 1. The test is of 3 hours duration. 2. The Test Booklet consists of 90 questions. The maximum marks are

If past numbers are any indication, more than one million students are expected to match their wits in AIEEE The wait for the exam, and the subsequent rescheduling of the same have been a torturous interval for the students. However, they will not have to wait long for the solutions for the exam. Aspirants from all over the nation will be able to log on to http: As more and more aspirants compare their answers and leave their expected scores on the website, an indicative picture of the expected overall cut-off, as well as the sectional cut-offs will also begin to emerge. Their queries will be answered by the experts within a short time. The numbers are truly amazing- more than one million appeared last year, at over centres in nearly cities. The date of the exam has been rescheduled from 24th April to 05th May due to Easter holiday. The news is likely to evoke mixed reactions from the student community. The students who have been studying consistently and building up the momentum to peak at the right moment might feel cheated and some also might feel that the stress will also build up further. On the other hand, the students who have been unable to get their preparations up to their satisfaction would be welcoming the additional time as an opportunity to pitch in with some last minute extra hard work. Whatever the reaction at the announcement, the most important thing for the students is to get the basics right. The first and the foremost is to ensure that the admit card reaches them. The exam will have two papers- the first paper will have equal questions from physics, maths and chemistry with equal weightage for all the subjects for B. The second paper will have Maths, aptitude test and drawing for architecture and planning candidates. Some of the important tips that subject experts at TCYonline. Get the basics right: Remember, to play in the V, it is very important to know how to play with a straight bat! For clearing any competitive exam which has been designed to weed out the rote learners and students with weak grasp on fundamentals, it is very important to get the foundations right. Memorise the important formulae: It is extremely important to include this step in your preparation. A remembered formulae bank, and the way to apply them in practice is just like the ability to play the short ball on fast, bouncy pitches! Ignore this at your own peril. Every shot played in a match has to be rehearsed time and time again in the nets! It is imperative that once the concepts are clear, they should be set in concrete. The best way to do so is to revise exhaustively. Students should get hold of previous years question papers and attempt them over and over again. Also, try to time yourself so that the time limits of the exam, and the accompanying stress, are not an unknown entity for you when the actual exam starts. Once a fast bowler knows he can do it, he needs to keep at it till he can produce it at will. Same is the case with your strengths. Once you know what they are, keep at them till the time you know that you can produce your most scintillating performances when you need them. Work upon your weaknesses: Any team will be more strengthened by a bowler who can hit a few past the ropes even if it is not his strength area. Work upon your weaknesses. You should be very sure that you will be able to clear the sectional cut-offs in your weakest subject even if it happens to be the toughest part of the exam. Once you have that kind of preparation in place, it will be huge leap towards success. Be consistent with your study schedule: Anytime Rahul Dravid walks in to bat, the nation knows that he will probably bat the entire day and then some more! Consistency is the hallmark of genius. Consistency in performance demands consistency in performance. The harder you work, the luckier you will get. Set aside a fixed time every day for study. As the exam date approaches, keep adding to it while making sure that you take enough of a break to rejuvenate yourself. When you walk out, you should feel like Sachin- the exam should be afraid of you! You have done the basics right, worked on fundamentals till you know them by heart. You have attempted previous exams, burnt a lot of midnight oil- what is there to worry about now? Go for it with the supreme belief that preparation alone can instill in you.
