

Chapter 1 : Book Series: Crime and Justice: A Review of Research

The result was the Crime and Justice Atlas, published in June of The Atlas provides a graphical presentation of trends in crime and sentencing over the last 25 years for the nation as a whole, and for each of the 50 states and the District of Columbia individually.

Crime in and around neighborhood parks: Bad parks, bad neighborhoods, or both? Elizabeth Groff and Ralph Taylor Description: Neighborhood parks in urban areas are public spaces that provide a variety of recreational opportunities for residents in a natural environment. At the same time, they can become staging areas for illegal and disorderly activities. Systematic social observations describing park characteristics, US Census data quantifying neighborhood social composition, community surveys capturing social cohesion, and official crime data are analyzed using multilevel models to examine: Our results are discussed in terms of their implications for theories of crime and place. Jerry Ratcliffe and Ralph Taylor Description: We used cutting-edge predictive policing software to plot locations of increased risk of violent and property crime. The Philadelphia Police Department then applied three different types of policing activity in these areas. Across five Philadelphia Police districts, officers were made aware of the predictive policing areas on roll-call. In five others, a dedicated police car patrolled the predictive grids. And in five other districts, an unmarked car patrolled the grids. The six remaining districts were used as control locations. The results of this NIJ-funded program are currently being analyzed. Linking Theory to Practice: In collaboration with the Denver Police Department DPD , this project evaluates available data sources for predictive analytics, and assesses a variety of predictive policing software programs to compare accuracy, reliability, and ease of use. The effectiveness of the best performing predictive policing software program will be conducted using a randomized control trial and the implementation of the predictive policing process by the DPD will be examined. Other crime types and additional sites beyond Jacksonville are now under study. Taylor and Elizabeth R. This NIJ-funded study examined connections between jurisdiction-level demographic structure, land use, street networks and changing violent and property crime rates in the first decade of the 21st Century in the nine county Philadelphia Metropolitan region. Results suggest increasing spatial inequality in violent crime across the region, and impacts of large scale commercial sites on property crime rates. Implications emerge for cross-jurisdictional police cooperation. Community Criminology Crossroads Affiliated Faculty: This review of almost years of community patterns of crime and delinquency highlights four critical issues blocking further development in our understanding of the causes and consequences of crime and delinquency ecological patterns: Prior bail prediction research has relied only on individual-level attributes. This paper, therefore, for the first time provided a novel perspective in recognizing the role of community context in empirical prediction of bail outcomes. The findings have important implications for bail decisionmaking policy and are relevant for the validity of the contemporary theories that emphasize the community context of crime in shaping deviant behavior.

Chapter 2 : Criminal Justice A Brief Introduction, Tenth Edition

This atlas on crime and justice in England and Wales provides a graphic illustration of the incidence, distribution and change over time of crime and the response of the criminal justice system.

Chapter 3 : The Atlas of Urban Expansion | Marron Institute

This Crime and Justice Atlas has been prepared to promote discussion of some of the central questions and issues facing practitioners and policymakers in the field of criminal justice. To.

Chapter 4 : Crime and Justice Atlas

DOWNLOAD PDF AN ATLAS OF CRIME AND JUSTICE

Originally conceived as a digest of information about crime and criminal justice in New York City, the Atlas developed into a collection of maps and supplementary charts that provide an unprecedented quantity of information about crime and justice in their social context at a neighborhood level in New York City.

Chapter 5 : Paddy Hillyard: used books, rare books and new books @ blog.quintoapp.com

*Crime and Justice Atlas [Justice Research and Statistics Association, Nancy Michel, Mary Lou Leary, Julie E. Samuels, Larry Meachum] on blog.quintoapp.com *FREE* shipping on qualifying offers. A statistical analysis of trends and indicators in crime and justice within the United States.*

Chapter 6 : World Atlas of Illicit Flows | Global Initiative

The crime rate for all property crime categories has decreased 20% or more since Burglary and motor vehicle theft showed larger declines than larceny.

Chapter 7 : Crime and Justice investigation: Personal information appearing online at a record rate | WBFF

Description: With evidence for spatiotemporal patterning of crime mounting, there is a growing need to understand how neighborhood context impacts repeat/near repeat crime as well as crime that is not connected in space and time.
