The changing world of healthcare has created unique challenges and added pressures for nursing, but it has also created new frontiers. In addition, there is a growing number of caregivers in our society. Caregivers often feel isolated, apprehensive, exhausted and overwhelmed. They desperately need relief as well as ongoing support. Nurses and caregivers reach out and become "angels" for others. They are compassionate, intelligent and caring beings that provide hands-on care to help the sick to heal, or comfort them as they die. Nurses and caregivers are not invincible; they also need to take care of themselves. The need to be touched by another, and to share personal experiences, are universal human requirements. The strength, knowledge and inspiration that comes from recounting personal life and death experiences fosters healing. Wounds heal from the inside out--so does the heart and soul.
