

Chapter 1 : Asus Transformer Book TTA Manual / User Guide

View and Download Asus T Series e-manual online. T Series Laptop pdf manual download.

A few weeks later, the same problem occurred, after much trying on this one again, just as I reached panicking zone, it automatically turned on. I have no idea why this happened, but I can tell you, that blank screen is super scary. Maybe some water got into it? But make sure to give it back and ask for another if it's serious, it's for the best. The light with the light bulb symbol just turns on for a few seconds then it turns off again. In an Asus Transformer Book Flip Top. I have the tablet. But I got it to work! If you look at the top of the screen you may notice a small white light next to where the camera is top front screen facing you if looking at it normally.. And I saw that white light turn off. Once I saw this happen I stopped and with one single press of the power button it started booting up!! Mine also started that way and by pushing keys it ended up coming back to life I sent it to the Asus service center, and they notified me that the motherboard is dead. Obviously repair makes no sense. This is my 2nd Asus with the same problem one was Android, the other Windows So I restarted my Asus Transformer because the local disk was full so I tried deleting the files on the local disk then I restarted it because I don't have enough storage to update iOS 9 on my iPad connecting to the laptop. When I restarted it I clicked the folder then the screen turned purple and then it faded into black. The small white light beside the camera is on and even though I already tried clicking the power button it only flashed white light. I tried the techniques given below but it doesn't work! Once I could turn off the dim camera light by randomly pressing all keys on the tablet, it booted right away by pressing the power button. I called, but got the run-around so never bothered with it and used my iPad. Now I want to use it in my classroom for the kids to use. I tried everything you said on here and cannot get it to turn on. When plugged in the orange light is on and immediately the light will turn off if unplugged. It will not let me turn it on.
