

Chapter 1 : Once in a Blue Moon

> *Lal Waterson > Songs > Once in a Blue Moon. Once in a Blue Moon [Lal Waterson, Oliver Knight] Lal Waterson and her son Oliver Knight's first album Once in a Blue Moon (issued in) is named after this this song but doesn't contain it.*

According to the popular definition, it is the second Full Moon to occur in a single calendar month. The average interval between Full Moons is about 29.5 days. This makes it very unlikely that any given month will contain two Full Moons, though it does sometimes happen. On average, there will be 41 months that have two Full Moons in every century, so you could say that once in a Blue Moon actually means once every two-and-a-half years. The year I was born? The Blue Moon Calculator knows the answer! Frequently Asked Questions and their answers Click the button at the right to see a more detailed answer to each question. When does the double Blue Moon occur? More Well, yes and no. How often is there a Blue Moon by the old definition? More Once every two or three years, just like the new definition, but not in the same years. Where did the expression Blue Moon come from? Does a Blue Moon have any effect on human behaviour? More It has no more effect on human behaviour than any other Full Moon. Does the Moon actually change colour during a Blue Moon? More No, but there have been rare occasions when the Moon really did turn the colour blue. Why is there a bright ring around the Moon? Which months have the most Blue Moons? More As you might expect, the day months are the winners. October, August and July take the top medals. How often does a year have two Blue Moons? More Four or five times in a hundred years. Can a month have no Full Moon? How often does February not have a Full Moon? More This happens in years with double Blue Moons, so only four or five times in a hundred years. How accurately can you calculate the time of a Full Moon? More To within a second or so, but the Earth is spinning erratically, which makes long-term predictions much more uncertain. When did the Blue Moon occur? More July, in all time zones. More August or September, depending on your timezone. More May, June or July, depending on your timezone. More July or August, depending on your timezone. More October, November or December, depending on your timezone. What about double New Moons? More They occur every two or three years, just like double Full Moons, but fewer people notice them. Who wrote these pages, and why should we believe what we read here? More His name is David Harper. He has a PhD in mathematics and astronomy, and lives near Cambridge, England. He used to be a professional astronomer, but now he just does it for fun. When will the next Blue Moon occur? More We would love to hear from you!
