Chapter 1 : Bose Bose SoundTouch 30 Series III Wireless Speaker - Black | eBay

Setting up SoundTouch 30/20/10 and Portable Wi-Fi music systems Setting and playing a preset using the SoundTouch app Connecting to a Wi-Fi network - Alternate setup method.

While the diminutive SoundTouch 10 stood up well against this current crop of competitors, our testing of its chunkier sibling led us to having little alternative but to review its original star rating. Features This third generation of the SoundTouch 30, which we first reviewed in early , is at least the best stocked of its lineage. Bose says that with The Bose is still essentially a rather bland yet sturdy box, which dwarfs the Sonos Play: Best wireless speakers Sound The scale and power of its presentation is impressive. There is considerable yet considered bass weight, which carries some insight rather than the warbling hum that can often be mistaken for low-end authority. Each of these SoundTouch speakers time well, too. Dynamic expression is another relative strength, with the power to spotlight large-scale shifts and, while not exceptionally emotive, the subtlety to contour expression well enough so as not to become boring. But the SoundTouch 30 loses ground in its inability to improve on the aspects of the Bose sound present in its smallest family member. The slight coarseness to treble frequencies and hardness at louder volumes that prevented the SoundTouch 10 from receiving the full five stars two years ago is amplified in the SoundTouch It contributes to the latter sounding tonally detached, a discord between frequency ranges that rankles after time. All the basics are in place: However, there are two issues here. Functions such as queuing songs and creating playlists â€” key to the usability of systems such as Sonos â€” are missing, as are some of the major streaming services. The ability to easily connect a NAS device is a bonus, but one tempered by the omission even of Tidal â€” surely the most popular lossless streaming service. Best music streaming services Verdict Two years ago, we gave the SoundTouch series III 30 four stars, but the subsequent introduction of similarly sized speakers with similar features since â€” most notably from Audio Pro and Denon â€” has shed a different, and less favourable, light on its abilities. Add to that the limitations of its control app, and a drop to three stars was sadly inevitable. See all our Bose reviews What Hi-fi? Newsletter Sign up below to get the latest from What Hi-Fi?
