**Chapter 3 : Results for Boston-T-Party | Book Depository**

*Having discussed Y2K with many, many people back in the day, there were plenty of IT people who know back in that absolutely NOTHING would happen on Y2K, and Boston's foretelling of a worldwide collapse is laughable at best.*

Basement family fallout shelter , circa The increased inflation rate in the s, the US monetary devaluation , the continued concern over a possible nuclear exchange between the US and the Soviet Union, and perceived increasing vulnerability of urban centers to supply shortages and other systems failures caused a number of primarily conservative and libertarian thinkers to promote individual preparations. Harry Browne began offering seminars on how to survive a monetary collapse in , with Don Stephens an architect providing input on how to build and equip a remote survival retreat. It was during this period that Robert D. For several years the newsletter included a continuing section on personal preparedness written by Stephens. It promoted expensive seminars around the US on similar cautionary topics. Stephens participated, along with James McKeever and other defensive investing, " hard money " advocates. Most of the elements of survivalism can be found there, including advice on food storage. The book championed the claim that precious metals, such as gold and silver , have an intrinsic worth that makes them more usable in the event of a socioeconomic collapse than fiat currency. Ruff later published milder variations of the same themes, such as *How to Prosper During the Coming Bad Years*, a best-seller in Firearms instructor and survivalist Colonel Jeff Cooper wrote on hardening retreats against small arms fire. In both his book *Rawles on Retreats and Relocation* and in his survivalist novel, *Patriots*: Rawles is a proponent of including a mantrap foyer at survival retreats, an architectural element that he calls a "crushroom". Clayton and Joel Skousen have both written extensively on integrating fallout shelters into retreat homes, but they put less emphasis on ballistic protection and exterior perimeter security than Cooper and Rawles. Kurt Saxon used the term survivalist to describe the movement, and he claims to have coined the term. For a time in the s, the terms survivalist and retreator were used interchangeably. While the term retreator eventually fell into disuse, many who subscribed to it saw retreating as the more rational approach to conflict-avoidance and remote "invisibility". Survivalism, on the other hand, tended to take on a more media-sensationalized, combative, "shoot-it-out-with-the-looters" image. Clayton , Nancy Mack Tappan , J. Cobb author of *Bad Times Primer*. The majority of the newsletter revolved around selecting, constructing, and logistically equipping survival retreats. In the early s, science fiction writer Jerry Pournelle was an editor and columnist for *Survive*, a survivalist magazine, and was influential in the survivalist movement. The interest peaked again in triggered by fears of the Y2K computer bug. North and others raised the alarm because they thought Y2K code fixes were not being made quickly enough. While a range of authors responded to this wave of concern, two of the most survival-focused texts to emerge were *Boston on Y2K* by Kenneth W. A town near the coast of Sumatra lies in ruin after the Indian Ocean earthquake and tsunami. Another wave of survivalism began after the September 11, attacks and subsequent bombings in Bali , Madrid , and London. This resurgence of interest in survivalism appears to be as strong as the s era focus on the topic. The fear of war, avian influenza , energy shortages, environmental disasters and global climate change , coupled with economic uncertainty, and the apparent vulnerability of humanity after the Indian Ocean earthquake and tsunami and Hurricane Katrina , has increased interest in survivalism topics. In addition to the s-era books, blogs and Internet forums are popular ways of disseminating survivalism information. Online survival websites and blogs discuss survival vehicles, survival retreats, emerging threats, and list survivalist groups. Economic troubles emerging from the credit collapse triggered by the US subprime mortgage lending crisis and global grain shortages [21] [22] [23] [20] have prompted a wider cross-section of the populace to prepare. He explained this phenomenon in a radio interview with Jim Puplava on December 18, This is a very different one from that: So survivalism in every way possible. Growing your own, self-sustaining, doing as much as you can to make it as best as you can on your own and it can happen in urban area, sub-urban area or the ex-urbans. This last aspect is highlighted in *The Trends Research Journal*: The specific problem is: Some blurbs are written as prose, others as definitions. I think we need to decide what it should be: Please help improve this section if you can. January Survivalism is approached by its adherents

in different ways, depending on their circumstances, mindsets, and particular concerns for the future.

**Safety-preparedness-oriented** While survivalists accept the long-term viability of Western civilization, they learn principles and techniques needed for surviving life-threatening situations that can occur at any time and place. They prepare for such calamities that could result in physical harm or requiring immediate attention or defense from threats. These disasters could be biotic or abiotic. Survivalists combat disasters by attempting to prevent and mitigate damage caused by these factors. This group stresses being able to stay alive for indefinite periods in life-threatening wilderness scenarios, including plane crashes, shipwrecks, and being lost in the woods. The rule states that a human can survive: These survivalist tactics are often firearm-oriented, in order to ensure a method of defense against attackers or home invasion.

**Natural disaster, brief** This group consists of people who live in tornado, hurricane, flood, wildfire, earthquake or heavy snowfall-prone areas and want to be prepared for possible emergencies. While assuming the long-term continuity of society, some may have invested in a custom-built shelter, food, water, medicine, and enough supplies to get by until contact with the rest of the world resumes following a natural emergency.

**Bio-chem scenario** This group is concerned with the spread of fatal diseases, biological agents, and nerve gases, including swine flu , E. Malthusian Some marketers of survivalism literature and supplies argue that an increase in human population affects available fresh water, food, health-care, environment, economics, consumerism, and spread of diseases. These marketers seek to prompt sales of items that would respond to a Malthusian population crash. Newsletters suggest hard assets of gold and silver bullion, coins, and other precious-metal-oriented investments such as mining shares. Survivalists prepare for paper money to become worthless through hyperinflation. As of late this is a popular scenario.

**Biblical eschatologist** These individuals study End Times prophecy and believe that one of various scenarios might occur in their lifetime. While some Christians and even people of other religions believe that the Rapture will follow a period of Tribulation , others believe that the Rapture is imminent and will precede the Tribulation "Pre-Trib Rapture [41] ". There is a wide range of beliefs and attitudes in this group. They are concerned with vehicle accidents and emergencies involving injuries. Their focus is on helping family, friends, and community survive medical emergencies.

**Legal-continuity-oriented** This group has a primary concern with maintaining some form of legal system and social cohesion after a breakdown in the technical infrastructure of society. The Customary Law of the American Nation. Common preparations include the creation of a clandestine or defensible retreat, haven, or bug out location BOL in addition to the stockpiling of non-perishable food, water, water-purification equipment, clothing, seed, firewood, defensive or hunting weapons, ammunition, agricultural equipment , and medical supplies. Some survivalists do not make such extensive preparations, and simply incorporate a " Be Prepared " outlook into their everyday life. A bag of gear, often referred to as a " bug out bag " BOB or "get out of dodge" G. It can be of any size, weighing as much as the user is able to carry. During the s, fears were economic collapse, hyperinflation, and famine. Preparations included food storage and survival retreats in the country which could be farmed. Some survivalists stockpiled precious metals and barterable goods such as common-caliber ammunition because they assumed that paper currency would become worthless. During the early s, nuclear war became a common fear, and some survivalists constructed fallout shelters. Instead of moving or making such preparations at home, many people also make plans to remain in their current locations until an actual breakdown occurs, when they willâ€™in survivalist parlanceâ€™"bug out" or "get out of Dodge" to a safer location. Some evangelical Christians hold to an interpretation of Bible prophecy known as the post-tribulation rapture , in which the world will have to go through a seven-year period of war and global dictatorship known as the " Great Tribulation ". Similarly, some Catholics are preppers, based on Marian apparitions which speak of a great chastisement of humanity by God, particularly those associated with Our Lady of Fatima and Our Lady of Akita which states "fire will fall from the sky and will wipe out a great part of humanity".

**Mainstream emergency preparations**[ edit ] People who are not part of survivalist groups or apolitically oriented religious groups also make preparations for emergencies. This can include depending on the location preparing for earthquakes, floods , power outages , blizzards, avalanches , wildfires , terrorist attacks, nuclear power plant accidents, hazardous material spills, tornadoes, and hurricanes. These preparations can be as simple as following Red Cross and U. Federal Emergency Management Agency FEMA recommendations by keeping a

first aid kit, shovel, and extra clothes in the car, or by maintaining a small kit of emergency supplies, containing emergency food, water, a space blanket, and other essentials. Mainstream economist and financial adviser Barton Biggs is a proponent of preparedness. In his book *Wealth, War and Wisdom*, Biggs has a gloomy outlook for the economic future, and suggests that investors take survivalist measures. In the book, Biggs recommends that his readers should "assume the possibility of a breakdown of the civilized infrastructure. Think Swiss Family Robinson. Even in America and Europe, there could be moments of riot and rebellion when law and order temporarily completely breaks down. In such situations, alternative food is necessary, which is converting natural gas and wood fiber to human edible food.

## Chapter 4 : Listing By Company

*Boston on Surviving Y2K explains exactly how to prepare your family. If you wait until a disaster is daily headline news, it will be too late to buy food, ammo, water filters, etc. If you wait until a disaster is daily headline news, it will be too late to buy food, ammo, water filters, etc.*

Party hits another Home Run! February 13, Whew! See my other BTP reviews! Why would I heartily recommend a Y2K book when we all know Y2K was a complete farce, because this book is absolutely not limited to, and really not applicable anyway, to some kind of post-Y2K Def Con 4 meltdown scenario. It is also a shopping manual. It is also a ground up survival manual. You obviously need food and water, but the intricacies of providing those commodities for yourself in ample supply so as to not make yourself a refugee are covered by Boston and a farming friend of Boston in chapters covering planting of some crops, and the raising of animals for food. The best animals and crops are discussed by Boston, along with what the animals need, fencing, pens, animal feed, butchering, and tractors and water supply and even the desirable and undesirable traits of different animals. Unless you the reader are a farmer and butcher combined you know nothing about these topics. I am a city kid, and I never realized what it would really take to supply a family of 4 with food and water on your own. This book gives you a distilled roadmap of how to go about setting this up for yourself. From tractors, equipment, etc. Although this book cant tell you everything, it is more than enough for you to sketch out most of what you would need to do for yourself. The chapter on energy generation, the generators and real efficient appliances is worth double the price of the book alone. I know what different currents are, and Boston rated various gas and diesel generators in terms of cost and efficiency. Boston even goes into the storage of gasoline and diesel. Solar and wind power is covered. It runs the whole gamut and will cover the type of climate and conditions in your area. Then all these aspects are drawn together and placed into the context of plausible scenarios for disasters and civil disruptions. All in all, this is another bang up Boston book, but I think it suffers from having Y2K in the title. Frankly, Boston should expand all the topics in the book, add a few more, and then retitle the work "Boston on Independant living". Hope to see it soon!
