Register your product on-line at <http://> Your registration with Brother: The contents of this manual and the specifications of this product are subject to change without notice. Brother reserves the right to make changes without notice in the specifications and materials contained herein and shall not be responsible for any damages including consequential caused by reliance on the materials presented, including but not limited to typographical and other errors relating to the publication. Reading the documentation will help you make the most of your machine. Symbols and conventions used in the documentation

1 The following symbols and conventions are used throughout the documentation.

- Italics** Italicized typeface emphasizes an important point or refers you to a related topic.
- Warnings** tell you what to do to prevent possible personal injury.
- Electrical Hazard icons** alert you to possible electrical shock.
- Cautions** specify procedures you must follow or avoid to prevent possible damage to the machine or other objects.
- Notes** tell you how you should respond to a situation that may arise or give tips about how the operation works with other features.
- Improper Setup icons** alert you to devices and operations that are not compatible with the machine.

If you have not installed the software, you can find the documentation by following the instructions below: You can find the instructions as follows: The following window will appear. Also lets you start a scanning operation in colour or mono, depending on the scanning setting in the ControlCenter software. If you turn the machine off, it will periodically clean the print head to maintain print quality. The LCD shows the current machine status when the machine is idle. Printing Reports

1 The following reports are available:

- How to print a report** 1 a Press Menu. Red Cover open The cover is open. See Error messages on page Ink empty Replace the Ink cartridge with a new one. See Replacing the ink cartridges on page Paper error Put paper in the tray or clear the paper jam. Check the LCD message. See Troubleshooting and Routine Maintenance on page Other messages Check the LCD message.

Using the scanner glass

2 You can use the scanner glass to copy or scan pages of a book or one page at a time.

Up to A4 size [Up to 2 kg How to load documents

2 a Lift the document cover. Loading documents and paper

2 Page: The figures below show the areas you cannot scan on Letter and A4 paper. Acceptable paper and other media

2 The print quality can be affected by the type of paper you are using in the machine. To get the best print quality for the settings you have chosen, always set the Paper Type to match the type of paper you load. You can use plain paper, inkjet paper coated paper , glossy paper, transparencies and envelopes. We recommend testing various paper types before buying large quantities. For best results, use the Brother paper. If Brother paper is not available in your country, we recommend testing various papers before purchasing large quantities. Keep the paper flat and away from moisture, direct sunlight and heat. Avoid touching the shiny coated side. Load photo paper with the shiny side facing down. Use only transparencies recommended for inkjet printing.

Yes â€” Yes Page: Paper Type Weight Thickness No. Lift the output paper tray cover

1. Note Always make sure that the paper is not curled. Check that the paper is flat in the tray. Make sure the paper side guides touch the sides of the paper. Note Be careful that you do not push the paper in too far; it may lift at the back of the tray and cause feed problems. Note Do not use the paper support flap for Legal paper. Make sure you do a test print first. Occasionally you may experience paper feed problems caused by the thickness, size and flap shape of the envelopes you are using. How to load envelopes and post cards

2 a Before loading, press the corners and sides of the envelopes or post cards to make them as flat as possible. Slide the paper side guides 1 and paper length guide 2 to fit the size of the envelopes or post cards. Glue 2 Double flap

2 1 2 Page: Removing small printouts from the machine

2 When the machine ejects small paper onto the output paper tray you may not be able to reach it. Make sure printing has finished, and then pull the tray completely out of the machine. The figures below show the unprintable areas on cut sheet paper and envelopes. The machine can only print in the shaded areas when the Borderless print feature is available and turned on. Note The Borderless feature is not available for envelopes. Making a single copy

3 a Load your document. Making multiple copies

3 You can make up to 99 copies. Or press a or b to change the number of copies. Copy options

3 When you want to quickly change the copy settings temporarily for the next copy, use the temporary Copy keys. You can use different combinations. The machine returns to its default settings 1 minute after it finishes copying. Note You can save the copy settings you use most often by setting them as default. You can find instructions on how to do this in the section for each feature. Making copies 3 Page: The default setting is Normal. To temporarily change the quality setting, follow the instructions below: To change the default setting, follow the instructions below: Enlarging or reducing the image copied 3 You can select the following enlargement or reduction ratios: Press Normal Normal is the recommended mode for ordinary print outs. This produces good copy quality with good copy speed. Fast Fast copy speed and lowest ink consumption. Use to save time printing documents to be proof-read, large documents or many copies. Best Use best mode to copy precise images such as photographs. This provides the highest resolution and the slowest speed. Making N in 1 copies or a poster 3 You can reduce the amount of copies by using the N in 1 copy feature. This allows you to copy two or four pages onto one page, which allows you to save paper. You can also produce a poster. When you use the poster feature your machine divides your document into sections, then enlarges the sections so you can assemble them into a poster. You can also press Colour Start if you are using the Poster layout. Repeat e and f for each page of the layout. Note If any photo paper is selected as the paper type setting for N in 1 copies, the images will be printed as if plain paper had been selected. Place your document face down in the direction shown below: Adjusting Brightness, Contrast and Colour 3 Brightness 3 To temporarily change the brightness setting, follow the instruction below: To change the default setting follow the instructions below: Colour saturation 3 a Press Menu. Paper options 3 Paper type 3 If you are copying on special paper, be sure to select the type of paper you are using so you will get the best print quality. To change the default setting, follow the instruction below: Printing from a memory card or USB Flash memory drive without a PC 4 Even if your machine is not connected to your computer, you can print photos directly from digital camera media or a USB Flash memory drive. Using memory card or USB Flash memory drive 4 Your Brother machine has media drives slots for use with popular digital camera media: Contact a third party supplier for adapters. JPG Other image file extensions like. GIF and so on will not be recognized. Simultaneous operation is not available.
