"Cities of Destiny" is a 'classic' book in that it visually provides information that clearly points out the relationship between "shifts" in history that have taken place as the result of 'showcasing' best art, architecture, social relationships, and in case of centuries ago, defensability of the city from external enemies.

Publication of Parliamentary debates was technically illegal, so the debates were issued under the thin disguise of Reports of the Debates of the Senate of Lilliput and fictitious names were used for most individuals and placenames found in the record. Columbia seems an obvious calque on America, [according to whom? In the second half of the 18th century, the American colonists were creating their own identity distinct from that of their British cousins. At that time, it was common for European countries to use a Latin name in formal or poetical contexts to confer an additional degree of respectability on the country concerned. Located on a continent unknown to and unnamed by the Romans, Columbia was the closest that the Americans could come to emulating this custom. By the time of the Revolution, the name Columbia had lost the comic overtone of its Lilliputian origins and had become established as an alternative, or poetic name for America. While the name America is necessarily scanned with four syllables, according to 18th-century rules of English versification Columbia was normally scanned with three, which is often more metrically convenient. For instance, the name appears in a collection of complimentary poems written by Harvard graduates in on the occasion of the marriage and coronation of King George III. A ship built in Massachusetts in received the name Columbia Rediviva and it later became famous as an exploring ship and lent its name to new Columbias. No serious consideration was given to using the name Columbia as an official name for the independent United States, [citation needed] but with independence the name became popular and was given to many counties, townships, and towns as well as other institutions. In, South Carolina gave the name Columbia to its new capital city. Columbia is also the name of at least nineteen other towns in the United States. In , three commissioners appointed by President George Washington named the area destined for the seat of the United States government the Territory of Columbia. It was subsequently organized as the District of Columbia. Once used as de facto national anthem of the United States, it is now used as the entrance march of the Vice President of the United States. Columbia representing the American people reaches out to oppressed Cuba with blindfolded Uncle Sam in background Judge, February 6, ; cartoon by Grant E. Hamilton In part, the more frequent usage of the name Columbia reflected a rising American neoclassicism, exemplified in the tendency to use Roman terms and symbols. The selection of the eagle as the national bird, the heraldric use of the eagle, the use of the term Senate to describe the upper house of Congress and the naming of Capitol Hill and the Capitol building were all conscious evocations of Roman precedents. It has occasionally been proposed as an alternative word for American. Columbian should not be confused with the adjective pre-Columbian, referring to a time period before the arrival of Christopher Columbus in Personification of Columbia from a Columbia Records phonograph cylinder package As a quasi-mythical figure, Columbia first appears in the poetry of African-American Phillis Wheatley starting in during the revolutionary war. This personification was sometimes called Lady Columbia or Miss Columbia. Such iconography usually personified America in the form of an Indian queen or Native American princess. A popular version gave her a red-and-white-striped dress and a blue blouse, shawl, or sash, spangled with white stars. Her headdress varied and sometimes it included feathers reminiscent of a Native American headdress while other times it was a laurel wreath, but most often it was a cap of liberty. Lady Columbia recognized World War I Doughboy soldier as having suffered injury due to his willingness to serve humanity Early in World War I â€" the image of Columbia standing over a kneeling "Doughboy" was issued in lieu of the Purple Heart Medal. She gave "to her son the accolade of the new chivalry of humanity" for injuries sustained in "the" World War. Columbia
