Statement from the most senior decision-maker of the organization. Since I took the helm in , TD has gone through some remarkable changes while also weathering the financial crisis. Our view has always been that if you stand up for your customers and the employees who serve them and stand by your communities “ you will fulfil the best interest of shareholders. We had bumps of our own in , in the immediate aftermath of the Alberta and Ontario floods. The unprecedented severe weather events reminded us yet again how important it is to be there for our customers when they need us most. As always, the key is in the recovery. We listened and we learned from these experiences. Can we get better at what we do and how we do it? In all instances, we can “ and we will. Embedding responsibility is a continual process. We continue to embed corporate responsibility practices across our business to guide who we lend to, invest in and purchase from. In , we implemented a Responsible Procurement Policy that improves our ability to select suppliers who demonstrate sound social and environmental practices. Responsibility means being inclusive. I am proud of the progress we have made to be more inclusive, from our board of directors, through our leadership teams and at every level of the bank. We are by no means perfect, but diversity is now a clear business imperative. We see the value in building a diverse workforce, one that will keep TD competitive and relevant to the diverse populations we serve. For example, ten years ago TD sponsored our first Pride festival. Responsibility means strengthening communities. The five TD volunteers who read books to children in London, Ontario, the 20 volunteers who helped at their community food bank in New Jersey, or the 28 volunteers who planted trees in Dartmouth, Nova Scotia. These are the stories, multiplied by the thousands that generate the real social impact that strengthens our local communities. Responsibility means transparent reporting. We have also increased transparency around our tax reporting “ disclosing tax payments by country or region. Great transitions involve change with continuity of the things that matter and I am confident we will see a continuity of what makes TD great. My successor, Bharat Masrani, has played a central role in key decisions that defined our bank over the years, and will continue to foster the things that matter at TD. We are a vastly different organization “ operating in a vastly different world “ than we were just 10 years ago. But TD is up for the task. We will continue to play a key role in our communities and Build The Better Bank. F In , we assessed our material topics to be: See page 14 in the CR report for more details of this assessment. Environmental Risk Environmental risk is the possibility of loss of strategic, financial, operational or reputational value resulting from the impact of environmental issues or concerns within the scope of short-term and long-term cycles. Management of environmental risk is an enterprise-wide priority. Key environmental risks include: The Corporate Environmental Affairs team is responsible for developing environmental strategy, setting environmental performance standards and targets, and reporting on performance. The ESC is responsible for approving environmental strategy and performance standards, and communicating these throughout the business. Within our Environmental Management Framework, we have identified a number of priority areas and have made voluntary commitments relating to these. Our environmental performance is publicly reported within our annual Corporate Responsibility Report. During , TD applied our Environmental and Social Credit Risk Management Procedures to credit and lending in the wholesale, commercial and retail businesses. Within Wholesale Banking, sector specific guidelines have been developed for environmentally-sensitive sectors. TD has been a signatory to the Equator Principles since and reports on Equator Principle projects within our annual Corporate Responsibility Report. Under the UNPRI, investors commit to incorporate environmental and social issues into investment analysis and decision making.

Chapter 2 : American Rhetoric - Christian Rhetoric Scholarly Reference Guide

Clark, T.D. (). *An analysis of recurrent features of contemporary American radical, liberal, and conservative political discourse. Southern Speech Communication Journal*, 44,

Featured Speakers Amir Ghannad is a widely recognized authority in the field of organization development, a frequent and highly sought-after keynote speaker at leadership summits in the United States and abroad, and the founder of The Ghannad Group, which specializes in guiding leaders and equipping them with tools, skills, and the mindset to create extraordinary cultures that deliver breakthrough results. For more than 31 years, Amir has held leadership positions of increasing responsibility and scope in multiple locations in the United States, Southeast Asia, and Europe with companies such as Procter and Gamble and Campbell Soup Company. Amir has consistently demonstrated his mastery in leading multinational and multifunctional teams. He is the author of *Promote Yourself and Me 2*. He has been recognized on several lists including Inc. Mack began his career working on the front lines of a machine shop while Ria started hers in healthcare administration, after overcoming years of difficult childhood. Working in completely different industries, they both began to apply leadership principles to their respective careers with incredible results personally and professionally, and developed a passion for leadership. They founded Top Story Leadership, and offer motivational speaking, leadership development training, coaching, and consulting. Together Mack and Ria are now creating and living the life they want, rather than the life they were given. Liz Weber is the president of Weber Business Services, a management consulting, training, and speaking firm headquartered near Harrisburg, Pennsylvania. She provides strategic and succession planning, executive coaching, and comprehensive leadership training to association boards and leadership teams, as well as to businesses and government agencies. She also holds an MBA in international business. Her association leadership experience includes serving on the board and as president for numerous local associations, as well as serving six years as a national board director for the National Speakers Association. As an accomplished leadership and organization development consultant, she knows the top challenge in sustaining change is the ability to influence the attitudes and behaviors of an organizational workforce. Influencing people in a way that transcends the intellectual and rational is the mark of a great leader. Ellen works with leaders to create an engaging work environment that supports business strategy and leads to long-term results and growth. As executive director of the Center for Learning Excellence at University Health System UHS in San Antonio, Texas, for 30 years, she had the responsibility for planning, implementing, and evaluating workplace learning for more than 7, employees at 25 sites. She is a frequent keynote speaker, webinar presenter, and journal contributor with expertise in healthcare talent development and branding learning. Matthew Daniel is a high-energy, no-holds-barred, tell-it-like-it-is learning technologist with nearly 15 years of experience with some of the largest and most innovative companies across the country, and six years in one of the nations top ten banks - Capital One. Matthew believes in building incredible learning experiences, not just events “that all begins with good instructional design, but it has to be wrapped in incredible user experience. Prior to implementing learning systems, Matthew was an instructional designer who built large-scale new hire and upskill programs for organizations like Homeland Security, the DoD, Honeywell, Valero, and ExxonMobil. Today, Matthew works with learning software companies on product design, consults on learning transformation, and inspires learning professionals to adopt new technologies and create amazing experiences to transform the lives of our learners. As business strategist, coach, educator, and author, he is a proven resource for shaping a results-focused leadership culture within the unique context of each organization. Prior to joining Right Management, Dick was the leadership development specialist for the 13,employee Lee Health regional healthcare system, based in Fort Myers, Florida. Prior to that he was a consultant with Fairview Health System in Minneapolis. His extensive leadership consulting and executive coaching experience in Minnesota and Florida has included system design and implementation for clients across industry sectors.

Dick has also served as an adjunct professor at the doctoral and masters levels in organizational leadership. His published work includes the award-winning book *Leadership Briefs*: Dick received a doctorate in adult development from Bethel University in St. Active in international humanitarian efforts, he has led service trips in locations around the globe, including Ghana, Ecuador, Norway, Kuwait, and South Africa. Tom has more than 29 years of experience in the human resources and recruitment profession, including nine years with the global professional services firms of Price Waterhouse now PricewaterhouseCoopers and Andersen Consulting now Accenture. He enjoys golf, Notre Dame football, Christian music, travel in the United States and Caribbean, spending time with family and friends, and comedy. In he made his stand-up comedy debut at The Punch Line, the premier comedy club in the Southeast. Ellis is an influential leader who has 13 years of comprehensive experience in talent and organizational development, with the majority of that time spent in financial services. Jonathan has a strong track record of transformative results. In his current position as learning and development transformative architect at Credit Human, he is focused on designing an innovative, immersive learning framework that focuses on learning in the age of immediacy. Through that transformation, Credit Human will achieve its mission of providing members an exceptional experience, better financial health, and happier lives. Jonathan is known as a dynamic presenter with an exceptional ability to engage and inspire groups of all sizes. He is recognized as a leading expert in the art of gamification, the incorporation of innovative gaming techniques into everyday learning. He infuses creative techniques and gaming technology into his presentations and ignites positive energy. He lives in San Antonio, Texas, and devotes most of his free time to his three children, Jonathan Jr. He directs the healthcare management program in the Yale School of Public Health and teaches healthcare economics in the Yale College Economics Department. His research has been focused on improving imaging services delivery through better access to information. He has worked in the U. Senate, as a health policy fellow, on Medicare legislation. Lori Gravelle, CHC, is an experienced and passionate healthcare executive knowledgeable in regulatory and governance requirements, including hospital, private practice, nonprofit corporations, and federally qualified healthcare centers. Lori is the compliance, privacy, and security officer for U. Marsha Ershaghi Hames is a managing director at LRN, a global compliance and ethics firm that specializes in developing principled corporate cultures. She has spent two decades advising boards and executive teams on transforming organizational culture, building effective compliance risk mitigation strategies, improving training effectiveness, and promoting greater leadership accountability. She believes compliance matters are no longer just legal issues but business and reputational priorities. She also leads workshops for corporate boards and executive leadership teams. She has guided projects for organizations across a spectrum of industries in the private, commercial, and nonprofit sectors. Marsha holds a doctorate in educational technology and leadership, an MA in educational technology from Pepperdine University, and a BA from the University of Southern California. Andrew Henderson is the vice president of engineering for Praemo. Praemo is leveraging the Industrial Internet of Things IIoT , data science, and artificial intelligence AI to help its customers reduce equipment downtime, optimize production processes, and manage risks. For most of his tenure at GE, he focused on integrating new technology with manufacturing operations to improve processes. From diesel engine testing and validation at Caterpillar, to designing and executing cutting tests during doctoral research at Clemson, then through the projects he led within manufacturing at GE, and currently into the development of the Razor product with Praemo, sensors, data collection, and data analysis have been central elements of everything Andy has done in his entire career. He has seen firsthand the benefits that are possible when the IIoT and advanced data analytics are applied in industry. He believes that the use of these technologies will revolutionize the way people work and do business in all industrial sectors. Before joining Honda, she worked as an instructional designer in the power industry, developing eLearning, web-based synchronous, asynchronous training, instructor led-training focused on automation, protection relays, and protection systems. She has also worked in the library science area, where she developed and facilitated blended technical training for EMEA and domestic audiences. Erin aims to create learning experiences that are relevant, applicable, engaging, and effective for learners. Her

educational background includes international experience studying at Waseda University, Tokyo, Japan, and a M. She acquired a M. Johnson is the director of compliance and ethics for Kforce Government Solutions KGS , a federal government contractor. Daily activities include developing enterprise education and training, conducting investigations, developing compliance monitoring and reporting tools, and providing compliance guidance to business units. He conducted internal and external audits, developed policies and managed an enterprise policy intranet site, coordinated regulatory submissions, served as disaster recovery and business continuity department lead, and provided compliance guidance to enterprise-wide program and project implementations. Walter served as an adjunct professor for the University of Maryland University College and Baltimore City Community College, lecturing on business and ethics courses. As an active member of the Health Care Compliance Association and Society of Corporate Compliance and Ethics, he is an advocate for contributing to the compliance profession by mentoring compliance professionals, sharing experiences, and participating in study groups and roundtable discussions. Walter earned a bachelor of science in business administration with a concentration in marketing from Bowie State University. Additionally, he earned a master of science in administration with a concentration in international administration from Central Michigan University. Walter and his wife, Latoya, have been married for 14 years and have two children, Jordan 12 and Justine 9. He directs HR activities including strategies, policies, and programs focused on the selection, engagement, development, and retention of team members. Key areas of leadership across his work experience in healthcare have included leadership development, employee engagement, talent management, compensation and payroll, employee relations, and leader goal management. Jared completed his undergraduate studies in psychology at McNeese State University and earned his PhD in industrial-organizational psychology from Louisiana State University in Jared is a board-certified coach with specialty designation in executive coaching. Betsy Allen Manning is recognized as one of the top leadership speakers, a best-selling author, and a personality expert. Betsy mastered the art of human behavior while working as a manager for multi-billion-dollar corporations such as Disney, the Golden Globe Events, and Wynn Hotels. Betsy provides managers with communication strategies to reduce workplace conflict, increase team productivity, and expand bottom-line results. Her strategies cover the three areas most integral for leaders to produce top results for their organization: Typical clients experience a 78 percent reduction in workplace stress and at least a 27 percent increase in productivity. Her keynote speeches, leadership development programs, and cutting-edge communication techniques have helped her develop positive cultures in organizations nationwide, and have played a huge role in how she became one of the most in-demand trainers on DiSC Personality Styles and a top John Maxwell certified coach in Dallas. Scott Pitts has spent nearly two decades in the learning and organization development professions, 16 of which have been in the financial services industry. Prior to his current role as a learning strategist for a major financial services firm, he created and led a learning department for the largest bank in Missouri not headquartered in a metro market. Currently, he partners with executives to recommend firm-wide learning and organization development solutions. Scott has performed and led nearly all learning functions as defined by ATD. Scott is active in serving the Army and his local community by training local educators, clergy, and behavioral health professionals on suicide Intervention. In his role at EmblemHealth, he directs: He has held positions as Director of Learning Services and Training Manager for several medical education agencies and served as an instructional design consultant for Quest Diagnostics, Shire Pharmaceuticals, and Forest Pharmaceuticals and Laboratories. In this role, she has spearheaded significant improvements and expansions in all her areas of responsibility: Previously she was the interim chief executive officer for community first health plans, HMO, from April to December Manjit Sekhon is the director of learning experience design at Intrepid by VitalSource. She has been in the learning field since , and has a background in organization development, performance, and change management. She helps clients reimagine what learning could look like in their organizations when they move from instructor-led training and e-learning to social and collaborative learning journeys. A passionate defender of learner rights, she focuses on using the platform to connect learning with on-the-job experiences. Yon Sugiharto searches for

Chapter 3 : Mathematics - Natural Science & Mathematics - Indiana University East

Dr. Johnston received a B.A. from Williams College in and a Ph.D. from the University of Rhode Island in He has been at Clark since

Rising social and economic inequality, [14] [15] new political ideas emerging from the Enlightenment, [16] economic mismanagement, environmental factors leading to agricultural failure, unmanageable national debt, [17] and political mismanagement on the part of King Louis XVI have all been cited as laying the groundwork for the Revolution. French music, the partisans of both sides appealed to the French public "because it alone has the right to decide whether a work will be preserved for posterity or will be used by grocers as wrapping-paper". Reigning opinions are no longer received from the court; it no longer decides on reputations of any sort After the British surrender at the Battle of Saratoga, the French sent 10, troops and millions of dollars to the rebels. Despite succeeding in gaining independence for the Thirteen Colonies, France was severely indebted by the American Revolutionary War. Poor harvests lasting several years and an inadequate transportation system both contributed to making food more expensive. Meanwhile, the royal court at Versailles was isolated from and indifferent to the escalating crisis. While in theory King Louis XVI was an absolute monarch, in practice he was often indecisive and known to back down when faced with strong opposition. While he did reduce government expenditures, opponents in the parlements successfully thwarted his attempts at enacting much needed reforms. The Enlightenment had produced many writers, pamphleteers and publishers who could inform or inflame public opinion. The opposition used this resource to mobilise public opinion against the monarchy, which in turn tried to repress the underground literature. Originally largely apolitical, Freemasonry was radicalised in the late 18th century through the introduction of higher grades, which emphasised themes of liberty, equality, and fraternity. Virtually every major player in the Revolution was a Freemason and these themes became the widely recognised slogan of the revolution. He could not be made an official minister because he was a Protestant. Faced with opposition from the parlements, Calonne organised the summoning of the Assembly of Notables. In response, the King announced the calling of the Estates-General for May, the first time the body had been summoned since. This was a signal that the Bourbon monarchy was in a weakened state and subject to the demands of its people. It had last met in Elections were held in the spring of; suffrage requirements for the Third Estate were for French-born or naturalised males, aged 25 years or more, who resided where the vote was to take place and who paid taxes. Strong turnout produced 1, delegates, including clergy, nobles and members of the Third Estate. The lands were controlled by bishops and abbots of monasteries, but two-thirds of the delegates from the First Estate were ordinary parish priests; only 51 were bishops. About a third of these deputies were nobles, mostly with minor holdings. Half were well educated lawyers or local officials. Nearly a third were in trades or industry; 51 were wealthy land owners. Many assumed the Estates-General would approve future taxes, and Enlightenment ideals were relatively rare. What is the Third Estate? What has it been until now in the political order? What does it want to be? The Third Estate demanded that the credentials of deputies should be verified by all deputies, rather than each estate verifying the credentials of its own members, but negotiations with the other estates failed to achieve this. The commoners appealed to the clergy, who asked for more time. They established the National Assembly and tried to pressure the aristocracy to spread their money evenly between the upper, middle and lower classes. They proceeded to do so two days later, completing the process on 17 June. Weather did not allow an outdoor meeting, and fearing an attack ordered by Louis XVI, they met in a tennis court just outside Versailles, where they proceeded to swear the Tennis Court Oath 20 June under which they agreed not to separate until they had given France a constitution. A majority of the representatives of the clergy soon joined them, as did 47 members of the nobility. By 27 June, the royal party had overtly given in, although the military began to arrive in large numbers around Paris and Versailles. Messages of support for the Assembly poured in from Paris and other French cities.

This study employs an intra-national and cross-national, prospective, and longitudinal design to examine age, gender, region, and country variation in group mean-level continuity and individual-differences stability of emotional availability in child-mother dyads. Altogether, Argentine.

The college algebra topics will include, but not be limited to the following: Offered every Fall and Spring Semester. Offered summer semester, occasionally. Credit given only for one: MATH-E Mathematics for Elementary Education 3 cr Designed for the elementary education student to develop skills in the use of numeration systems, number theory, set theory, logic, networks, systems of equations, and geometry. These skills will be useful in future teaching assignments and for passing the State of Indiana Praxis exam. The purpose of Math-E is to provide the students with knowledge of the concepts, theories, and procedures in the mentioned areas. Offered every Fall and Spring semester. Open only to Elementary Education Majors MATH-H Mathematics for the Humanities 3 cr Designed for the humanities student to provide a variety of topics in mathematics, including, but not limited to: The course also provides a general, historical perspective of mathematics and development of practical application skills. Emphasis will be placed on mathematical modeling and solving word problems. Open to Humanities students only. MATH-N Mathematics for Nursing 3 cr With successful completion of this course, the student will have algebraic skills and tools that are used for problem-solving in the nursing profession and be prepared for NURS-H Data Analysis and the nursing math test. Offered Summer semester, occasionally. To develop problem-solving and reasoning skills, mathematics topics may include, but are not limited to: Open only to Social Science students. May be repeated with different topic. Measurements, data analysis and statistics are examined. Differences in types of qualitative data and methods of interpretation are explored. Procedures of estimation and hypothesis testing are also studied. Emphasis is on the application of fundamental conception to real situations in client care. Credit given for only one of the following: Applications to problems from business and the social sciences. Intended for non-physical science students. Algebraic operations; polynomial, exponential, and logarithmic functions and their graphs; conic sections; systems of equations; and inequalities. See course description above. Graphs of trigonometric and inverse trigonometric functions. MATH-M or equivalent may be taken concurrently MATH-M Analytic Geometry and Calculus I 5 cr Coordinates, functions, straight lines, limits, continuity, derivatives, definite integral, applications, circles, conics, techniques of integration, and infinite series. MATH-M Analytic Geometry and Calculus II 5 cr Coordinates, functions, straight lines, limits, continuity, derivatives, definite integral, applications, circles, conics, techniques of integration, and infinite series. Permission of a member of the mathematics faculty, who will act as supervisor. Computer used for applications. Coordinate systems, linear dependence, and bases. Linear transformations and matrix calculus. Offered fall and spring semesters. MATH-M or consent of instructor MATH-M Elementary Differential Equations with Applications 3 cr Ordinary differential equations of first order and linear equations of higher order with applications, series solutions, operational methods, Laplace transforms, and numerical techniques. MATH-M or consent of instructor. Hypothesis-testing concepts, Neyman-Pearson lemma, likelihood ratio tests, power of tests. Point estimation, method of moments, maximum likelihood, Cramer-Rao bound, properties of estimators. Regression, correlation, analysis of variance, non-parametric methods. Offered fall semesters, and occasionally spring. Computational Methods 3 cr Interpolation and approximation of functions, solution of equations, numerical integration, and differentiation. Errors, convergence, and stability of the procedures. You will write and use programs applying numerical methods. MATH-M , or consent of instructor. MATH-M History of Mathematics 3 cr Brief study of the development of algebra and trigonometry; practical, demonstrative, and analytic geometry; calculus, famous problems, calculating devices; famous mathematicians in these fields and chronological outlines in comparison with outlines in the sciences, history, philosophy, and astronomy. Teaches structures and strategies of proofs in a variety of mathematical

DOWNLOAD PDF CLARK, T. D. SOCIAL AND CULTURAL CONTINUITY IN AMERICAN FRONTIERING.

settings: Offered periodically in summer semesters. MATH-M or consent of instructor MATH-M Number Theory 3 cr Numbers and their representation, divisibility and factorization, primes and their distribution, number theoretic functions, congruencies, primitive roots, diophantine equations, quadratic residues, and sums of squares. May be repeated for credit. Continuity, Cartesian products, connectedness, compactness, completeness. Elements of homotopy theory, fundamental group and covering spaces, elementary homology theory, applications to simplicial complexes and manifolds. Mathematical topics include games, graphs, Markov and Poisson processes, mathematical programming, queues, and equations of growth. Offered periodically in spring semesters. These topics are applied to the Black-Scholes formula, the pricing of financial derivatives, and the term theory of interest rates. Offered periodically in the fall or summer semesters. Random experiments, conditional probability, independence. Random variables, expected values and standard deviations, moment generating functions, important discrete and continuous distributions. Multivariate distributions, basic limit laws such as the central limit theorem. Possible topics include sufficient statistics, exponential distributions, monotone likelihood ratio, most powerful tests, minimum variance estimates, shortest confidence intervals, linear models, maximum likelihood, simultaneous equations, the relationship of theory to practice. MATH-M or consent of the instructor. MATH-M Senior Seminar 3 cr Students integrate their study of mathematics and explore the connections within fields of mathematics and other disciplines. Students usually create a portfolio that showcases their understanding of the areas of study within mathematics and their applications outside of mathematics. Alternatives may include internships or other projects, as approved by advisor. Offered every fall and spring semester. Senior standing as a Mathematics Major. Mathematics for Educators MATH-T Intuitive Topology 3 cr Intuitive description of topology, including networks and maps, topological equivalence, classification of surfaces, spheres with handles, Jordan curve theorem, transformations, and fixed-point theorems. Geometric transformation theory; vectors and analytic geometry; convexity; theory of area and volume. Offered summer semesters, odd years. MATH-J Internship in Teaching Collegiate Mathematics cr Designed to provide an opportunity for students to teach basic algebra and observe with discussion instructional techniques at the collegiate level in preparation for further career development in teaching at a post-secondary level. Teaching of a college level mathematics class Graduate Courses MATH-J Internship in Teaching Collegiate Mathematics cr Designed to provide an opportunity for students to teach and level undergraduate math courses and observe with discussion instructional techniques at the collegiate level in preparation for further career development in teaching at a post-secondary level. Jordan-Holder theorem, Sylow theorems, Free Groups. Ideals and Factor Rings. Algebraic closure; separable and inseparable algebraic extensions; Galois Theory; finite fields, insolvability of the quintic. Open to Graduate-Level Students only or Consent of Instructor MATH-M Basic Number Theory 1 3 cr Congruencies, unites modulo n , lattices and abelian groups, quadratic residues, arithmetic functions, Diophantine equations, Farey fractions, continued fractions, partition function, the Sieve method, density of subsets of integers, c -function, the prime number theorem. Open to Graduate-Level Students only or Consent of Instructor MATH-M Real Variables 1 3 cr Sets and functions, cardinal and ordinal numbers, set functions, kinds of measures, integration, absolute continuity, convergence theorems, differentiation and integration. Open to Graduate-Level Students only or Consent of Instructor MATH-M Topology 1 3 cr Point-set topology including connectedness, compactness, separation properties, products, quotients, metrization, function spaces. Open to Graduate-Level Students only or Consent of Instructor MATH-M Markets and Asset Pricing 3 cr The concept of arbitrage and risk-neutral pricing are introduced within the context of dynamical models of stock prices, bond prices and currency exchange rates. Specific models include multi-period binomial models, Markov processes, Brownian motion and martingales. Open to Graduate-Level Students only or Consent of Instructor MATH-M Theory of Probability I 3 cr Basic concepts of measure theory and integration, axiomatic foundations of probability theory, distribution functions and characteristic functions, infinitely divisible laws and the central limit problem. Emphasis on the interrelationship among mathematical topics, curriculum reform, professional growth, and classroom practice. Specific topic selected jointly with the instructor. Open

Chapter 5 : Robert Johnston Ph.D. | Faculty | Clark University

Thwaites, Reuben Gold, Early Western Travels, [-] A Series of Annotated Reprints of Some of the Best and Rarest Contemporary Volumes of Travel, Descriptive of the Aborigines and Social and Economic Conditions in the Middle and Far West, during the Period of Early American Settlement, Cleveland: Clark, [-]

Arranged marriage and Forced marriage In many cultural traditions, a date may be arranged by a third party, who may be a family member, acquaintance, or professional matchmaker. Recently, internet dating has become popular. In humans, females make a larger parental investment than males i. While human males invest heavily in their offspring as well, their minimum parental investment is still lower than that of females. Hence, evolutionary psychologists have predicted a number of sex differences in human mating strategies. Sexual desire[edit] One theory states that because of their lower minimum parental investment, men can achieve greater reproductive success by mating with multiple women than women can achieve by mating with multiple men. Ancestral women, by contrast, would have maximized reproductive success not by mating with as many men as possible, but by selectively mating with those men who were most able and willing to invest resources in their offspring. Gradually in a bid to compete in order to obtain resources from potential men, women have evolved to show extended sexuality. Men are often depicted as wanting numerous female sexual partners in order to maximise their reproductive success. Mate-guarding behaviours and sexual jealousy point to an evolutionary history in which sexual relations with multiple partners became a recurrent adaptive problem, [10] while the willingness of modern-day men to have sex with attractive strangers, [11] and the prevalence of extramarital affairs in similar frequencies cross-culturally, are evidence of an ancestral past in which polygamous mating strategies were adopted. Every time a man has a new sexual partner, the woman also has a new sexual partner. It has been proposed, therefore, that casual sex and numerous sexual partners may also confer some benefit to females. That is, they would produce more genetically diverse offspring as a result, which would increase their chances of successfully rearing children to adolescence, or independence. Youth is associated with reproductive value in women, and features that men find physically attractive in women are thought to signal health and fertility. Evolutionary psychologists have tested these predictions across cultures, confirming that men tend to report a greater preference for youth and physical attractiveness in a mate than do women, and that women tend to report a greater preference for ambition and social status in a mate than do men. For example, as women gain more access to resources their mate preferences change. Finding a mate with resources becomes less of a priority and a mate with domestic skills is more important. Less clear, however, are the evolutionary benefits that women might have received from pursuing short-term mating strategies. However, women in a stressed situation may benefit from protection from a male and short term mating is a way to achieve this as is seen in contemporary asylum seeker anthropological studies [28]. One prominent hypothesis is that ancestral women selectively engaged in short-term mating with men capable of transmitting genetic benefits to their offspring such as health, disease resistance, or attractiveness see good genes theory and sexy son hypothesis. One prominent candidate for a "good genes" indicator includes fluctuating asymmetry, or the degree to which men deviate from perfect bodily symmetry. Other candidates include masculine facial features, [29] behavioral dominance, [30] and low vocal pitch. Indeed, research indicates that self-perceived physical attractiveness, [32] fluctuating asymmetry, [33] and low vocal pitch [34] are positively related to short-term mating success in men but not in women. Mating strategy plasticity[edit] Research on the conditional nature of mating strategies has revealed that long-term and short-term mating preferences can be fairly plastic. Following exposure to cues which would have been affected mating in the ancestral past, both men and women appear to adjust their mating preferences in ways which would have historically enhanced their fitness. Such cues include the need to care for young, danger from animals and other humans, and resource availability. One way in which the more numerous sex might compete is by displaying the attributes that are most desired by the scarcer sex. Since men have a greater desire for casual

DOWNLOAD PDF CLARK, T. D. SOCIAL AND CULTURAL CONTINUITY IN AMERICAN FRONTIERING.

sex see above , societies with more women relative to men were predicted to exhibit higher scores on the SOI than societies with more balanced or male-biased sex ratios. This prediction was confirmed: In societies where extensive care from both parents is needed to ensure offspring survival, the costs of having sex with an uncommitted partner are much higher. Schmitt found significant negative correlations between several indices of need for biparental care e. Another important societal variable for mating strategies is the threat of infectious disease or pathogen prevalence. Since physical attractiveness is thought to signal health and disease resistance, evolutionary psychologists have predicted that, in societies high in pathogen prevalence, people will value attractiveness more in a mate. Indeed, research has confirmed that pathogen prevalence is associated with preferences for attractiveness across nations. Consistent with this reasoning, higher pathogen prevalence is associated with lower national SOI scores. According to this perspective, different mating strategies are in direct strategic conflict. For instance, the stability of long-term partnerships may be threatened by the availability of short-term sexual opportunities. Therefore, public policy measures that impose costs on casual sex may benefit people pursuing long-term mating strategies by reducing the availability of short-term mating opportunities outside of committed relationships. One public policy measure that imposes costs on people pursuing short-term mating strategies, and may thereby appeal to sexually restricted individuals, is the banning of abortion. In an influential doctoral dissertation, the psychologist Jason Weeden conducted statistical analyses on public and undergraduate datasets supporting the hypothesis that attitudes towards abortion are more strongly predicted by mating-relevant variables than by variables related to views on the sanctity of life. Insofar as sexually restricted individuals associate recreational drug use with promiscuity, they may be motivated to oppose drug legalization. Consistent with this, one study found that the strongest predictor of attitudes towards drug legalization was scores on the SOI. By contrast, nonsexual variables typically associated with attitudes towards drug legalization were strongly attenuated or eliminated when controlling for SOI and other sexuality-related measures. These findings were replicated in Belgium, Japan, and the Netherlands.

Chapter 8 : French Revolution - Wikipedia

1. Introduction. In an address to the Association for Psychological Science, Gladwell () argued that a strong belief in the importance of precociousness is pervasive in American society.

Ms Bishop also used the c-word "communism" to evoke just what a nasty bunch IS is. Glad to see the back end of that. You might think some background might have been useful in a discussion of such magnitude. Say, useful information like the widely accepted fact that the destruction of Iraq has unleashed a convulsion of unrest and state collapse that has paved the way for IS. And it does rather seem like an oversight not to point out that IS has taken its loathsome atrocities to Libya courtesy of the unprovoked devastation of that country since by our closest European ally, the UK, in league with the US and France among others. But having reduced a second nation to ruins, gallant western forces packed up and went home, leaving the once stable nation also at the mercy of rival militias and tribal antagonists. But this too, only a few short years later, is now a truth unspoken. Like the immigrants fleeing Libya and drowning in their hundreds, which is reported by western media without mention of the fact that what they are fleeing is the anarchy European powers created in that country, in partnership with the forerunners of IS who now terrorise parts of it. Perhaps so, but not as much as a voracious western military, when it sniffs a geo-political opportunity, adorned with precious fossil fuel resources to boot. Ms Bishop said the IS declaration of a Caliphate had served as a rallying call for other extremists. Yet we are still told that extreme Islam mostly hates our western freedoms, and not our western violence? We saw it all unfold a few short years ago. We must not let the very figures that were in part responsible sit back agog and wonder aloud from whence it all came. Having reduced a second nation to ruins, gallant western forces packed up and went home, leaving the once stable nation also at the mercy of rival militias and tribal antagonists. On my bedside table at the moment is Life has taught me that when it comes to the opposite sex My top music artists of all time are In all honesty, it would be impossible to pick five albums! I love all music, different genres and even artists. If I had to name my five best loved movies they would be I draw inspiration from The one thing that will always make me cry is I always laugh when Be a Bondi Lifeguard, let alone be on TV! The discovery of a pigeonsized dinosaur with bat-like wings has exposed bizarre twists in the early evolution of birds, say scientists in China. Named Yi qi, for Strange Wing in Mandarin, the creature was an odd and unexpected addition to a long list of failed evolutionary experiments in flight "having sported wings of membrane rather than feathers, they said. Yi qi was not a direct ancestor of birds, but a close relative from an extinct line. Bearing the shortest name ever given to a dinosaur, Yi qi belonged to a family of tiny creatures called Scansoriopterygids, which had feathers and exceptionally long finger-like digits that may have been used for climbing trees or catching insects But they were not thought to have been fliers. Yi qi, the newest addition to the group, weighed about g as an adult, and had tiny teeth set in a four centimetre-long skull. It had feathers considered too flimsy to be useful in flight. But what really sets Yi qi apart is a bony rod, about 13cm long, jutting from each wrist. While never before seen in dinosaurs, the team realised the feature is similar to one sported by modern-day airborne mammals "think bats and flying squirrels. With local knowledge, over 60 designs to choose from and an experience focused on you, we know the real difference we can make. ABN 67 Then, while flying DH4 bombers out of France, he was shot down in September, and imprisoned until the armistice. Johns went on to write about Biggles books. He was hardly a Marxist lefty pacifist "he was sacked from editing a magazine in the late s for a scathing editorial condemning the Chamberlain government for not training enough pilots to fight the coming war. There are many insights to be gained from reading the Biggles books. In the Biggles and Co there was a strong theme of anti-appeasement. In Biggles Foreign Legionnaire, written in , Biggles was on the trail of an international cartel which was staging bombing raids in the middle-east and other countries around the globe during peace talks, all in a bid to create markets for armaments companies and to drive the share market higher. Many people believe this is the underlying reason the USA has fought so many wars in the past 60 years. Truth is

always the first casualty of war, and there is a concern that the whole circus ANZAC Day is becoming is for the purpose of upping our martial pride and making our involvement in the recent series of wars more palatable and acceptable to the Australian public. Back then it was about honouring soldiers and those who made sacrifices in their support. No wonder so many home-grown terrorists are springing up in western countries across the globe. Therefore rest in peace. There is no difference between the Johnnies and the Mehments to us. Where they lie side by side now here in this country of ours You mothers, who sent their sons from faraway countries wipe away the tears. Your sons are now lying in our bosom and are in peace after having lost their lives on this land. They have become our sons as well. The notion that every single ANZAC or Australian soldier, ever, is a hero, is about as inaccurate as people in believing every NRL player of this time was as exceptionally gifted as Jarryd Hayne or, conversely at the other end of the spectrum, clones of the badly behaving Greg Bird. The trenches in Turkey and the western front, among other campaigns, demonstrated true mateship and bravery, but these traits were also exhibited by the soldiers from other nations. We sent troops to suppress South African farmers in the Boer War at the turn of last Century, people much like country Australians who were objecting to their colonial rulers. We need our surviving veterans to be part of a broader debate about all these wars. Vietnam broke so many people. My much-loved cousin was conscripted and served in that conflict only to return home with numerous physical and psychological problems. He died a few years ago, much too young, after a second bout of toxic shock which has been linked to exposure to Agent Orange. Unnecessary suffering and an unnecessary death. The current ISIS crisis and our deployment of yet more service people and yet more billions of dollars can be traced back to that war based on a fabrication, a lie, yet no-one has ever been held accountable for that disaster. There has to be a better way, and the way forward should be the focus of a rational, factual national discussion. As the reports of casualties began arriving along with letters home telling people what the war was really like, the number of volunteers greatly declined along with casualties. Twice the people, in a democratic vote, refused to back those conscription plebiscites. Interestingly, conscription back then was supported by the wealthy newspaper barons, just as we have certain media outlets these days inflating the terrorist threat. Apparently he was sacked because he refused to remove the comments from his Twitter account. The soldier had labelled his brother a coward for not being in uniform, yet after the two atomic bombs were dropped he finally realised what had been happening at Ashville. The US had just two available atomic bombs, the one dropped on Hiroshima was based on Uranium , the second, dropped on Nagasaki, was Plutonium , and there were no other bombs available for months. The outcome will be a program of achievable initiatives and activities to bring excitement and activity into our CBD to benefit the whole of Dubbo. How do I share my big ideas? Think big, think broad and tell us what you want for the future of your CBD. Online Post Take the online survey, join the forums or make an online submission at mydubbomysay. You can post your submission to Council: Just by telling us what you think, you could win a CBD experience voucher with one to give away each week. To enter, go online and make a submission or take our short survey. Want to speak to someone? Call us, or email dcc dubbo. Enjoy a sumptuous buffet breakfast overlooking the Primate islands and Savannah Lake.
