A Three-fold path to Creative Spirituality The spiritual journey and the creative process are full of mystery often taking unexpected twists and turns. Both lead us into places we never intended to go with surprising results. The serious spiritual seeker and the creative artist have much in common. The creative process permeates the spiritual journey and the spiritual shines forth from within the creative process. Examining the spiritual journey through the lens of the creative process moves us into the realms of mystics and ancient teachers of the Church. It invites a deep awareness of the Presence of the Holy. In an ancient three-fold path from authentic Christian spirituality, discover a way to find the place of your own resurrection. No artistic training is necessary. Wrestling With Angels Have you ever wondered if you were creative because you cannot draw a straight line? Creativity is part of our God-given nature, a gift we receive at birth. Rediscovering our creativity is more urgent than we might think. Creativity helps us live an authentic life; it enables us to be who we are meant to be. We need all our creativity to shape our lives and grow into our authentic self. Without creativity we cannot decipher the guideposts on our journey that show us the way to become the person we are intended to be and how we are intended to live. If you thirst for a clearer sense of purpose in life and a deeper experience of God, your creativity assists in discovering the sacred in each God-given moment. An essential tool for the spiritual journey, creativity reveals the image of God buried within each one of us as it illuminates our true calling. Learn techniques to listen to the still small voice within, a voice that guides our path and shapes our vocation. If you are already a trained artist, we can work with that. Learn How to design and Implement Worship Visuals In this hands on intensive participants will create aesthetically beautiful and theologically significant altars for public and private worship. Chapter 3 : Creativity and Divine Surprise: Finding the Place of Your Resurrection by Karla M. Kincannon

She is the author of Creativity and Divine Surprise: Finding the Place of Your Resurrection, as well as numerous articles about the spiritual journey and curriculum for the United Methodist Church. Karla lectures, leads workshops, and facilitates retreats in a variety of ecumenical settings nationwide.

However, there are times when all I can connect with them on is the term originated by Alex Obsorn "Brainstorming Brainstorming, the well-known technique used in idea generation, is often mistaken for the act of creative problem solving. This is one of the many misconceptions regarding creativity. Another myth that hinders creative behavior is the belief that is reserved only for special people or endeavors. The department has instituted a fairly new vision: We have all been affected in various ways by the ongoing global changes. Now more than ever, the need for creativity combined with community is at an all-time high. Due to the nature of the topic, it lends itself to being subjective and ambiguous, even in the eyes of its researchers. Many theories and models exist regarding the phenomena and it has had a long journey in gaining recognition and credibility among academics. Is it any wonder that one gets puzzling looks when trying to explain it to the average person? I have sat through many thought-provoking and insightful lectures regarding creativity. Personal observation, , This made me wonder if the outreach for creativity education was actually trickling down to a grassroots level. That is, has the average person been exposed to the basics of creativity and if yes, how well? Utilizing social media to solicit responses, I created a quick survey to further examine my questions. A Quick Creativity Survey Upon reviewing the most common myths surrounding creativity, I posed eight simple yes or no questions, as well as one that was open-ended. It was entitled A Quick Creativity Survey and those who participated provided their answers anonymously. To my surprise, the reaction was incredible - - within approximately an hour, more than 50 responses had been collected and the numbers continued to rise. The sample group of consisted of people. The survey indicated interesting results as seen in Figure 1. A limitation of my quick survey was that my populace was not thoroughly investigated. Therefore, generalizability cannot be established. A prime example of a question worth examining further regards creative studies education " what was learned and where was this education procured? More information would certainly affect the future results. A Quick Creativity Survey. Developed by Dana Calanan, Explaining creativity is necessary for the acceptance of its use by an individual. Public Creativity Education Outreach From sitcoms to annual reports, the words: But are the theories or even the definitions behind these buzz words being fully understood? It appears that the terms are being used in ways that liken them to the latest fad or gadget. My research suggests that there is a need for some clarification. Despite the numerous sites dedicated to the encouragement of being creative, those geared toward teaching the fundamentals of creative behavior and thinking on a public level are hard to find. However, more academically based programs are beginning to surface elsewhere. As of , there were 54 known curriculums worldwide Yudess, p. To me, this fact seems to add to another common myth of creativity " that it is reserved only for geniuses. Discussion There is a great deal of research regarding everyday creativity as well as creative behavior in many other aspects of life. My view, now from both an academic and a pop culture perspective, is that the public is hearing words and phrases, but have not been given the foundational thinking behind them. Though my survey may not be substantial in its methods, it has revealed a niche -- creativity education on a grassroots level. The impact of such an outreach regarding the basics of creative studies could positively affect the quality of life for many people. More research is needed to support a hypothesis for this paper, but there seems to be a short in the circuit between creativity research and the very people with whom they are trying to connect. It has been established that it is vital to our growth and can be taught. The real question is whether or not it is being cultivated by and with the general public. While the lines of communication are open -- creativity buzz words are seen and heard nearly everywhere -- sometimes you have to bring the learning more directly to the people. The conditions are ripe for this to happen now and there is a definite need for developing self-sustainability in individuals, and in turn society. I believe the field of creativity has the perfect opportunity to harness the interest that has already been piqued by marketing giants and the burgeoning list of creativity experts. I invite
