Origins[edit] A nine-tailed fox, from the Qing edition of the ancient text Classic of Mountains and Seas Japan is home to two red fox subspecies: Japanese fox myths had their origins in Chinese mythology. Following several diachronic phonological changes, this becomes kitsune. Many etymological suggestions have been made, though there is no general agreement: Tanikawa Kotosuga in Wakun no Shiori “ suggests that ki means "yellow", tsu is a possessive particle, and ne is related to neko, the word for cat. Nozaki also suggests that the word kitsune was originally onomatopoeic. One of the oldest surviving kitsune tales provides a widely known folk etymology of the word kitsune. He met her one evening on a vast moor and married her. She begged her husband to kill it, but he refused. At last one day the dog attacked her so furiously that she lost courage, resumed vulpine shape, leaped over a fence and fled. Come back when you please; you will always be welcome. In classical Japanese, kitsu-ne means come and sleep, and ki-tsune means always comes. However, this does not mean that kitsune are ghosts , nor that they are fundamentally different from regular foxes. Because the word spirit is used to reflect a state of knowledge or enlightenment, all long-lived foxes gain supernatural abilities. This obake karuta monster card from the early 19th century depicts a kitsune. The associated game involves matching clues from folklore to pictures of specific creatures. Physically, kitsune are noted for having as many as nine tails. Other tales credit them with infinite wisdom omniscience. Shapeshifting[edit] "Fox women" by Bertha Lum: Common belief in medieval Japan was that any woman encountered alone, especially at dusk or night, could be a fox. Traditionally, this facial structure is considered attractive, and some tales ascribe it to foxes in human form. According to the story, he was staying at the home of one of his devotees when he scalded his foot entering a bath because the water had been drawn too hot. Then, "in his pain, he ran out of the bathroom naked. Then Koan transformed in front of them, becoming an elderly fox and running away. The victim is usually a young woman, whom the fox enters beneath her fingernails or through her breasts. Japanese tradition holds that fox possession can cause illiterate victims to temporarily gain the ability to read. Strange is the madness of those into whom demon foxes enter. Sometimes they run naked shouting through the streets. Sometimes they lie down and froth at the mouth, and yelp as a fox yelps. And on some part of the body of the possessed a moving lump appears under the skin, which seems to have a life of its own. Prick it with a needle, and it glides instantly to another place. By no grasp can it be so tightly compressed by a strong hand that it will not slip from under the fingers. Possessed folk are also said to speak and write languages of which they were totally ignorant prior to possession. Exorcism , often performed at an Inari shrine , may induce a fox to leave its host. Entire families were ostracized by their communities after a member of the family was thought to be possessed. In the late 19th century, Dr. Shunichi Shimamura noted that physical diseases that caused fever were often considered kitsunetsuki. Those who suffer from the condition believe they are possessed by a fox. Kitsunetsuki is similar to but distinct from clinical lycanthropy. Those possessed by a fox are thought to suffer from a mental illness -like condition. Each fox has a kitsunebi floating close to their face. Tales describe these as glowing with kitsunebi. Those who obtain the ball may be able to extract a promise from the kitsune to help them in exchange for its return. This portrayal shows the influence of Dakiniten concepts from Buddhism. Print by Utagawa Kuniyoshi. Embedded in Japanese folklore as they are, kitsune appear in numerous Japanese works. Noh , kyogen , bunraku , and kabuki plays derived from folk tales feature them, [46] [47] as do contemporary works such as anime , manga and video games. Japanese metal idol band Babymetal refer to the kitsune myth in their lyrics and include the use of fox masks, hand signs, and animation interludes during live shows. Likewise, entire shrines are dedicated to kitsune, where devotees can leave offerings. Foxes have long been worshipped as kami. In addition to protecting Inari shrines, they are petitioned to intervene on behalf of the locals and particularly to aid against troublesome nogitsune, those spirit foxes who do not serve Inari. Black foxes and nine-tailed foxes are likewise considered good omens. Many Inari shrines, such as the famous Fushimi Inari shrine in Kyoto , feature such statues,

sometimes large numbers of them. Dakiniten is depicted as a female bodhisattva wielding a sword and riding a flying white fox. Kitsune are often presented as tricksters , with motives that vary from mischief to malevolence. Stories tell of kitsune playing tricks on overly proud samurai , greedy merchants, and boastful commoners, while the crueler ones abuse poor tradesmen and farmers or devout Buddhist monks. Their victims are usually men; women are possessed instead. The game is similar to rock, paper, scissors , but the three hand positions signify a fox, a hunter, and a village headman. The headman beats the hunter, whom he outranks; the hunter beats the fox, whom he shoots; the fox beats the headman, whom he bewitches. In one case, the 16th-century leader Toyotomi Hideyoshi wrote a letter to the kami Inari: To Inari Daimyoin, My lord, I have the honor to inform you that one of the foxes under your jurisdiction has bewitched one of my servants, causing her and others a great deal of trouble. I have to request that you make minute inquiries into the matter, and endeavor to find out the reason of your subject misbehaving in this way, and let me know the result. If it turns out that the fox has no adequate reason to give for his behavior, you are to arrest and punish him at once. If you hesitate to take action in this matter I shall issue orders for the destruction of every fox in the land. Any other particulars that you may wish to be informed of in reference to what has occurred, you can learn from the high priest of Yoshida. Kitsune keep their promises and strive to repay any favor. Occasionally a kitsune attaches itself to a person or household, where they can cause all sorts of mischief. My father lived here before me, sir, and by now I have many children and grandchildren. But I just want you to know, sir, how sorry I am that this is our last night of life. If we ever make trouble again, then of course you must act as you think best. Accordingly, common households thought to harbor kitsune are treated with suspicion. They first try to scare him away, then claim that the house "has been ours for many years, and If a kitsune offers a payment or reward that includes money or material wealth, part or all of the sum will consist of old paper, leaves, twigs, stones, or similar valueless items under a magical illusion. Kuzunoha is a popular figure in folklore and the subject of kabuki plays. Wives and lovers[edit] Kitsune are commonly portrayed as lovers, usually in stories involving a young human male and a kitsune who takes the form of a human woman. In some cases, the husband wakes as if from a dream, filthy, disoriented, and far from home. He must then return to confront his abandoned family in shame. Many stories tell of fox-wives bearing children. When such progeny are human, they possess special physical or supernatural qualities that often pass to their own children. Shingen, Turnbull writes, "was so obsessed with the girl that his superstitious followers became alarmed and believed her to be an incarnation of the white fox-spirit of the Suwa Shrine , who had bewitched him in order to gain revenge.

While on a mapping survey, we are conveying a delegation of Ullians to Kaldra IV. These telepathic historians conduct their research by retrieving long-forgotten memories. With his help, Keiko remembers that it was used by her obachan to wash brushes used in Japanese calligraphy. She thanks the Ullians for the pleasant memory. Tarmin attempts to persuade Dr. Crusher to undergo the probe, but is reminded by Jev that they are not to probe people without permission. La Forge tells him that it is not that simple for Humans, as they cannot recall certain memories in an instant. He embarrasses his son with an anecdote of quickly retrieving a memory that Jev could not. Piqued, Jev leaves the dinner. Counselor Troi follows him, and sympathizes with him about overbearing parents. She then returns to her quarters. But while getting ready for bed, she has flashes of memory about a romantic encounter with Commander Riker. She gets a hot chocolate from her replicator to try to calm down. The memory turns unpleasant however, when he begins to force himself on her "and then turns into Jev, who also appears elsewhere in the room. She then falls into a coma. Counselor Troi has fallen into a deep coma. After a thorough examination, Dr. Crusher has been unable to find signs of illness or infection. Martin are examining Troi and bringing Riker and Picard up to date on her condition. They cannot identify the cause of the coma, standard revival techniques have failed, and Dr. Crusher does not want to attempt anything else without identifying the cause. Riker goes to speak with Jev in Ten Forward, who reacts with a certain hostility to the questions Riker poses regarding his whereabouts and the speculations about a Ullian cause for the coma. But he consents to an examination. Riker goes to sickbay to see Deanna and speaks with her, hoping she can hear him despite the coma. He remembers that she did the same for him when he was in bad shape. He is exhausted and emotional; Dr. Crusher tells him to get some sleep. Back in his quarters, he, like Deanna, experiences flashes of memory. He is in main engineering during a containment breach ; he must order the closure of the emergency door, trapping Ensign Keller inside. A colleague of hers angrily accuses him of killing her; this officer turns into Jev. When Picard tries to contact Riker, he does not respond; Worf , investigating, enters his room and finds him unconscious. Act Three Edit "Medical log, stardate Commander Riker is the second officer who has fallen into an unexplained coma. I have examined the Ullians and ruled out the possibility that they are carrying a harmful organism. This suggests Iresine syndrome , but that condition is ruled out because the two patients are not showing decreased histamine levels. Worf suggests quarantining the Ullians, but Picard says no. When spoken to by Picard, Tarmin reacts with shock to the notion that the Ullians could cause the comas. Inad, however, agrees to such monitoring for the next morning. In the meantime, Dr. Martin scan Keiko, who does not show any unusual signs, not even the electropathic residue that the others present; and Geordi searches for agents that can cause electropathic residue, finding nothing aboard the Enterprise.
