Since teaching method of Instant Immersion is quite similar to Rosetta Stone , both of these softwares tend to be compared between each other quite a lot. In fact one of the main advertising claims of Instant Immersion is that it is as good as Rosetta Stone, only cheaper. The claim that it is significantly cheaper is definitely true at least 3 times cheaper ; but it would be quite difficult to confirm the other part of the claim. When comparing these softwares it is important to keep in mind that Rosetta Stone offers 5 levels for Italian learners while Instant Immersion only three. Also online version of Rosetta Stone offers more studying features like ability to study via different devices, e-tutoring, ability to play games with other learners and more. So larger price can be partly justified by these additional features and more levels to study a new language. If we would compare downloadable version of Rosetta Stone and Instant Immersion, these studying programs offer more or less the same features and Italian studying material. What do User Reviews Say? *Instant Immersion programs are available for studying more than hundred different languages and Italian is among them. It is a software based learning program that you install on your computer and it teaches Italian through immersion type of exercises.*

Instead, while Instant Immersion appears to be an entirely new and modern foreign language package, it seems to be created from bits and pieces of various courses, none of which are particularly cohesive with each other. The outcome of this is that Instant Immersion is rather a sprawling mess of a program, with very little to recommend it beyond the shiny packaging and extensive dictionary. Content On the plus side, there is a lot of digital content here. Although the program essentially consists of a dictionary and spoken flashcards, the range of both these aspects is pretty far. The rest of the course is comprised of lessons, but as we will discuss later, these are really not useful when getting to grips with the language. You cannot rip most of the contents, so you will need to have the actual disc in the computer at all times when you are learning. The only parts of the program that you can download and use wherever you like are the mp3 audio files, which do work on either a Mac or a pc. I found that this really seemed to reflect this product: The CD content seems to be arranged in levels of complexity, starting with one and going up to three. Intuitively, that is what ordinarily would be the case. All of them seem to have an odd mix of complex and simple sentences and games, with no real feeling of progression through the program. This is part of the problem of having no set goals – there is very little sense of achievement. There is also an interactive DVD, a murder mystery game, and an audio disc. The latter is the one you can download and use anywhere, which is surprisingly useful. However, the audio disc alone proves to be much more useful than the lessons themselves. It is designed to confuse you; it is designed to make you pick up the pace of your learning because you simply have to. The simple fact is that this is not the best way to learn a language fully for the majority of people. Words and phrases, and certainly understanding the natural flow of a discourse, takes time and patience. If you really wanted to throw yourself in at the deep end of language learning, then it would benefit you much more to actually spend some time in the country whose language you want to learn. Or, failing that, purchase a program that is a little more than a spoken dictionary. Instant Immersion basically chooses quantity over quality. At no point do you feel the language beginning to seep through to your understanding. Instead, the majority of this course is mindlessly parroting back simple phrases that are the only things it tries to teach you. The other major flaw with Instant Immersion is that certain parts of the interactive sections are not translated properly. Ultimately, it seems as though this is because their target audiences are those wishing to quickly pick up some phrases before going on holiday. There is just too much here. Too much un-necessary information and a very unclear way of setting it out. The focus here is clearly not on a genuinely immersive experience, though it does leave the learner able to cope with some specific holiday-making scenarios. However, this is not enough to really learn a language. This is one of the most important things to get to grips with when learning a language; the ability to understand the construction of sentences. If all the learner does is squawk back the phrases to very specific conditions, without any other information relating to which words are the verbs, nouns, etc, then this leaves them basically unable to grasp the ideas of the language internally. Cost Here, at least, Instant Immersion holds up pretty well. This has clearly come at a price. The haphazard way in which the course is compiled also lends to the idea that it is all just a little bit too slapdash to have been genuinely thought about in any real language-learning way. Summary This is just not the program for most people. The only person I would recommend this product to is someone who already knows a little of the language, and wants a fun little games package to help them expand their vocabulary. With the relative uselessness of the lessons, this package is basically a glorified phrase book. Still, at the price, it seems like it might be a way to see if you enjoy a particular language, but that seems like an expensive way to experiment.
