As usual, the Pimsleur method, in my opinion is the best way to learn a foreign language. As of today, I own five Quick and simple language programs (French, German, Italian, Japanese and Cantonese) and I've enjoy every one of them immensely.

Make improvements in APP performance. Fixed existing DVD user login issue. This update includes performance enhancements and bug fixes, including optimizations in audio playback and subscription maintenance. We will continue to improve the experience for you, and appreciate all feedback. Please email us at pimsleur@simonandschuster.com. This update includes performance enhancements and bug fixes. This update includes several bug fixes to address: I find audio lessons to be easier to maintain daily than lessons you have to look at your phone or computer and interact with. Among the audio lessons, I find Pimsleur to be easiest to follow and learn. Others tend to over complicate from the beginning. Unfortunately, I have had a number of application issues. I am using an up to date iPhone 10 currently the newest model. About once a week it will not play any of my downloaded lessons. Also, when you log out and back into the app, it loses all your downloads. Lastly, just recently it lost all my progress thereby graying out Skill phrases and Practice phrases which you obtain after each lesson is completed. A new version of the app was released this week. We believe all these issues have been addressed. If you encounter any issues moving forward, please let us know at pimsleur@simonandschuster.com. Our app developers are on standby! When my Japanese language exchange partner went back to Japan for six weeks, I listened every day. When she got back, she remarked that my spoken Japanese had gotten noticeably better. This app, on the other hand, is pretty lame. It is slow and flaky. It is hard to download content: I should be able to bulk download, but instead it is click and wait. I have to select my lesson group every time and navigate to my lesson. The extra content is of questionable value. This is worse than loading the content into iTunes. I changed my review to a 5 as a result. This app is the perfect blend of auditory and visual learning. The language dialog is realistic and up-to-date, allowing practice requiring increasing speed of responses as one grows in the language. The speed round activity pushes you to think quickly.

Overview - The Pimsleur(R) Method: the easiest, fastest way to learn a new language. Completely portable, easily downloadable, and lots of fun. You'll be speaking and understanding in no time flat This course includes Lessons from the Italian Level 1 program - 4 hours of audio-only effective language learning with real-life spoken practice sessions.

Is the high price of a Pimsleur Comprehensive language course justified by its effectiveness or quality? In a word - yes. Pimsleur's language learning method was painstakingly developed to be an easy and effective learning system, and its unique approach puts it way ahead of the competition. I feel that the Pimsleur Comprehensive course is the single best language learning product available, but the brilliant method designed for Pimsleur Comprehensive courses does not work as well for the shorter courses that Simon and Schuster releases under the Pimsleur name. The Quick and Simple, Instant Conversation and Compact courses are good because they use the same method devised by Dr. Pimsleur, but they may not be ideal for everyone or may require additional complementary materials, depending on your learning goals. Pimsleur produces all-audio language learning courses on cassette and cd. The lessons are one half-hour long, one lesson per day. Each lesson begins with a conversation between two native speakers of the target language and then an instructor begins to prompt the listener to learn and repeat the words and phrases you just heard. You then participate in the scripted conversation you heard at the beginning, playing each role in a variety of situations. Later in the course, the first minutes of each lesson are for review and then new material is introduced and worked with. What makes Pimsleur so good is that it is so engaging. From the first minutes of lesson 1 you are involved in a conversation with native speakers. This is Pimsleur's Principle of Anticipation. You are unconsciously learning the rules of the new language - grammar, word order, verb conjugation etc. This creative use of the language is necessary to not only learn it, but become proficient at it. Rather than learn vocabulary and phrases by rote, you use them in context, creatively, the way we use our native language every day. The beauty of Pimsleur's method is in its simplicity. We learn the new language just as we all learned our native language - by hearing it and imitating what we have heard. Pimsleur shows us how obvious it is that the focus should be on hearing and speaking the language, rather than learning boring grammar rules and verb conjugations, at least at first. Pimsleur shows us how learning a new language in a natural way is not only faster and easier, but the language stays with us for much longer. It is also a more fun and enjoyable experience. Pimsleur developed a technique he called Graduated Interval Recall. This more effectively moves the newly learned information from short term memory into long term memory, particularly when its being used in context with material you already know. I remember learning a similar technique in a high school study skills class. Another technique Pimsleur products employ is simply to focus on the most important function words in the language. Verbs like to be, to do, to have, to go, and words like but, and, for and also are among the most common words we use on a daily basis, and this holds true for many other languages as well as for English. Pimsleur makes sure that you are familiar with these function words and can use them in a variety of situations. By combining the techniques of the principle of anticipation, graduated interval recall, creative use of the language, focus on function words and phrases and putting them in an easy and enjoyable format, it creates a very simple but remarkably effective system for learning a language. Pimsleur Quick and Simple. This introductory course is simply the first 8 lessons of the Comprehensive course. By lesson 8 you have a reasonable idea of word order, can use numbers, ask for directions and know a few simple greetings. Pimsleur's focus on conversation gives you a relatively good accent and ability to ask and answer simple questions. But this is no substitute for a full course. This is either an introduction, or an audio supplement for another, more in-depth method. The full Comprehensive Level course takes advantage of the Pimsleur system and builds proficiency by integrating grammar and syntax right into the phrases and conversation, and builds up that grammar lesson after lesson. This much shorter course can barely begin to use that system effectively. Even as an audio supplement, I think someone would be better off with Pimsleur's Instant Conversation. This course, like Quick and Simple, is also not a unique course under the Pimsleur name, but rather just the first 16 lessons of the Comprehensive course. It is a great introduction to a language, but is a little short on useful vocabulary. Pimsleur's focus on

pronunciation and conversation is excellent, and I think this is where Instant Conversation is most valuable - as an audio supplement to a more in-depth textbook based method. It is not strong enough to stand on its own as a language learning method, but used as a supplement would benefit both systems, and the result would be a greatly improved language learning experience. These are the language courses for which Simon and Schuster have not developed a full Comprehensive course under the Pimsleur name. They are a mere 10 lessons with a reading section at the end of each lesson, with a small accompanying reading booklet. It makes an ok supplement to a more comprehensive method, or a decent audio supplement for a language with few other choices as far as commercially published methods. By itself, however, it is little more than an introduction to a language. The reading study at the end of each lesson takes away from time used to work on pronunciation and conversation, like in the other Pimsleur products. Why only to lesson 10? Why lessons of Spanish and only 10 lessons for Swedish? Granted, far fewer people learn Swedish or Indonesian than Spanish or Chinese, but then why have a Swedish Compact at all. The additional cost of expanding to even 30 lessons would certainly be offset by the much higher price of a Comprehensive course. Compact is available in the following languages: Update September 12th, Since I originally wrote this article, it seems that they have expanded some of their titles and are adding new ones, slowly but surely. The following languages have been upgraded from Compact to Comprehensive courses: Also, additional levels have been added for a number of languages, like Greek, Korean and Hebrew. There are Basic courses available the first 10 lessons from the Comprehensive course for languages that now have a Comprehensive level course, but were available only as Compact courses before. The Pimsleur Comprehensive Course is the granddaddy of all-audio language learning methods. It is the standard to which all other language methods are compared and rightly so. The Pimsleur system, based on simple two-way conversation and using the techniques of Anticipation and Graduated Interval Recall, is what makes these courses so effective. The advantage that the Comprehensive course has over the shorter courses is just time. The Comprehensive course, which is 30 half-hour lessons per level, has enough time to really build on what you learn in the earliest lessons. The most popular languages have 3 levels. Imagine learning a language from a real live person, and being able to sit down and converse with them for a half-hour a day for 3 months. While I heartily recommend Pimsleur Comprehensive as a stand alone language learning method, I also recommend it as a supplement to almost any other method. The conversation and pronunciation work you get builds real proficiency with the language, and used in conjunction with a book-based method makes a tremendous combination. So, how much do you actually learn after 3 levels of Comprehensive? Unfortunately, the answer to that question is - no. The word I like is - proficiency. The 3 level Comprehensive set only uses about words, but they are the real function words that you will use every day in your new language, along with some coincidental vocabulary used mostly as cannon fodder for those real function words and verbs. Armed with a dictionary and a verb book, you will have the experience and proficiency you need with the language to put those two books to work and begin to advance toward true fluency. Obviously cost is a factor here. Pimsleur Comprehensive is notoriously expensive. Having said that, I also sold all three levels of Spanish on eBay recouping most of what I spent and saving someone else a little money for a fine product in the process. However, I wish that I understood the Pimsleur method better before I began it. I would have benefitted greatly from using some supplementary products like a verb book, dictionary and some other vocabulary-building tools. I am doing that now, but I wonder how much further along I would be if I had known that. I am using some supplements now along with it. I like the results, but since I had 4 years of French many years ago, the results are tainted. I look forward to tackling Italian or German from scratch with Pimsleur Comprehensive providing the core of that study campaign. The conclusion - I love the Pimsleur system. I only use the shorter Pimsleur courses as audio supplements for another method when I have no choice like Swedish. Pimsleur Comprehensive is, I believe, the single best language learning method. Where to Buy Pimsleur? There have even been a few visitor reviews of dealers with less-than perfect customer assistance. Where else can you find all the Pimsleur courses, new and used, with a company with one of the best reputations in the world? Would you like to listen to the first lesson of Pimsleur for free!?
