When you add prefixes and suffixes to the root, you can create many new words that all have something to do with writing, such as subscriber, scripture, inscribed, description, postscript, prescription, scribbling, and unscripted. In case you are wondering, a scriptorium is a room set aside for writing. That makes sense, given that script means to write and -orium is a suffix meaning a place for. If you can answer yes to these three questions, your child is at the right stage to benefit from Word Tree activities: Does your child know how to spell closed syllables? Closed syllables are syllables that end in a consonant, such as sub, tract, con, and rupt. A closed syllable generally contains a short vowel, and it is the first syllable type that most children learn to spell. Does your child know how to spell open syllables? Open syllables are syllables that end in a vowel, such as me, be, and di. The vowel in an open syllable is generally long. Does your child know how to spell common prefixes and suffixes such as -tion, -tive, ab-, and -able? While Word Trees can be interesting for younger children, they are most effective with children who have already mastered these three spelling skills. Decide which root word you want to work with. If you are using a blank Word Tree, write the root word in the box at the base of the tree. Think of as many words originating from that root as possible, and write those words on the branches. Store completed Word Trees in a binder or folder for future reference. If you can only think of a few words at first, keep the Word Tree available and add to it over the next few days. Perhaps family members, a neighbor, or a friend can think of words to add, or maybe your child will run across more words in his private reading time. In the photo above, Jimmy created twelve words with the root port, including export, supportive, and reporter. How many words can you come up with? There are hundreds of possible root words to choose from, but two guidelines will make it easy for you to choose effective root words for beginners. First, work with root words that occur frequently, as shown in the chart below. Second, work with root words whose meaning is easier for your child to understand and that relate to words he already knows. For example, auto self and spect to look should be studied before fer to carry.
