Renaissance In the 15th century performing arts, along with the arts in general, saw a revival as the Renaissance began in Italy and spread throughout Europe plays, some of which incorporated dance, which were performed and Domenico da Piacenza credited with the first use of the term ballo in De Arte Saltandi et Choreas Ducendi instead of danza dance for his baletti or balli. The term eventually became Ballet. This period also introduced the Elizabethan masque , featuring music, dance and elaborate costumes as well as professional theatrical companies in England. In , the first opera , Dafne was performed and throughout the 17th century, opera would rapidly become the entertainment of choice for the aristocracy in most of Europe, and eventually for large numbers of people living in cities and towns throughout Europe. Modern Era[edit] The introduction of the proscenium arch in Italy during the 17th century established the traditional theatre form that persists to this day. Meanwhile, in England, the Puritans forbade acting, bringing a halt to performing arts that lasted until After that, women began to appear in both French and English plays. The French introduced a formal dance instruction in the late 17th century. It is also during this time that the first plays were performed in the American Colonies. During the 18th century, the introduction of the popular opera buffa brought opera to the masses as an accessible form of performance. At the turn of the 19th century, Beethoven and the Romantic movement ushered in a new era that led first to the spectacles of grand opera and then to the musical dramas of Giuseppe Verdi and the Gesamtkunstwerk total work of art of the operas of Richard Wagner leading directly to the music of the 20th century. History of Eastern performing arts[edit] Middle East[edit] The earliest recorded theatrical event dates back to BC with the passion plays of Ancient Egypt. This story of the god Osiris was performed annually at festivals throughout the civilization, marking the known beginning of a long relationship between theatre and religion. India and Pakistan[edit] Main articles: Theatre in India , Theatre in Pakistan , and Sanskrit drama Folk theatre and dramatics can be traced to the religious ritualism of the Vedic peoples in the 2nd millennium BC. This folk theatre of the misty past was mixed with dance, food, ritualism, plus a depiction of events from daily life. The last element made it the origin of the classical theatre of later times. Many historians, notably D. Kosambi, Debiprasad Chattopadhyaya, Adya Rangacharaya, etc. Those who acted as mammals like goats, buffaloes,

reindeer, monkeys, etc. Bharata is often known as the father of Indian theatrical arts. His Natya Shastra seems to be the first attempt to develop the technique or rather art, of drama in a systematic manner. The Natya Shastra tells us not only what is to be portrayed in a drama, but how the portrayal is to be done. Drama, as Bharata Muni says, is the imitation of men and their doings loka-vritti. As men and their doings have to be respected on the stage, so drama in Sanskrit is also known by the term roopaka, which means portrayal. The Ramayana and Mahabharata can be considered the first recognized plays that originated in India. These epics provided the inspiration to the earliest Indian dramatists and they do it even today. The last was inspired by a story in the Mahabharata and is the most famous. It was the first to be translated into English and German. The next great Indian dramatist was Bhavabhuti c. He is said to have written the following three plays: Malati-Madhava, Mahaviracharita and Uttar Ramacharita. Among these three, the last two cover between them, the entire epic of Ramayana. The powerful Indian emperor Harsha is credited with having written three plays: Many other dramatists followed during the Middle Ages. There were many performing art forms in the southern part of India, Kerala is such a state with different such art forms like Koodiyattam , Nangyarkoothu , Kathakali , Chakyar koothu , Thirayattam and there were many prominent artists like Painkulam Raman Chakyar and others. Chinese theatre There are references to theatrical entertainments in China as early as BC during the Shang Dynasty ; they often involved music, clowning and acrobatic displays. The Tang dynasty is sometimes known as "The Age of Entertainments". During this era, Emperor Xuanzong formed an acting school known as the Children of the Pear Garden to produce a form of drama that was primarily musical. During the Han Dynasty, shadow puppetry first emerged as a recognized form of theatre in China. There were two distinct forms of shadow puppetry, Cantonese southern and Pekingese northern. The two styles were differentiated by the method of making the puppets and the positioning of the rods on the puppets, as opposed to the type of play performed by the puppets. Both styles generally performed plays depicting great adventure and fantasy, rarely was this very stylized form of theatre used for political propaganda. Cantonese shadow puppets were the larger of the two. They were built using thick leather that created more substantial shadows. Symbolic color was also very prevalent; a black face represented honesty, a red one bravery. Thus, they were not seen by the audience when the shadow was created. Pekingese puppets were more delicate and smaller. They were created out of thin, translucent leather usually taken from the belly of a donkey. They were painted with vibrant paints, thus they cast a very colorful shadow. The thin rods that controlled their movements were attached to a leather collar at the neck of the puppet. The rods ran parallel to the bodies of the puppet then turned at a ninety degree angle to connect to the neck. While these rods were visible when the shadow was cast, they laid outside the shadow of the puppet; thus they did not interfere with the appearance of the figure. The rods attached at the necks to facilitate the use of multiple heads with one body. When the heads were not being used, they were stored in a muslin book or fabric lined box. The heads were always removed at night. This was in keeping with the old superstition that if left intact, the puppets would come to life at night. Some puppeteers went so far as to store the heads in one book and the bodies in another, to further reduce the possibility of reanimating puppets. Shadow puppetry is said to have reached its highest point of artistic development in the 11th century before becoming a tool of the government. In the Song dynasty , there were many popular plays involving acrobatics and music. These developed in the Yuan Dynasty into a more sophisticated form with a four- or five-act structure. Yuan drama spread across China and diversified into numerous regional forms, the best known of which is Beijing Opera, which is still popular today.
