Wing 2 min 23 sec Problems playing this file? A brief version of the tale appeared under the title Thinking One Can in , in *Wellspring for Young People*, a Sunday school publication. Jacobs 2 min 45 sec Problems playing this file? Bragg, a teacher, but she "took no credit for originating the story". Arnold Munk was born in Hungary, and as a child, moved with his family to the United States, settling in Chicago. Later he moved to New York. He personally hired Lois Lenski to illustrate the book. This retelling of the tale *The Pony Engine* appeared in , with a title page that stated: Larger engines, treated anthropomorphically , are asked to pull the train; for various reasons they refuse. The request is sent to a small engine, who agrees to try. The engine succeeds in pulling the train over the mountain while repeating its motto: The story of the little engine has been told and retold many times. The underlying theme is the same " a stranded train is unable to find an engine willing to take it on over difficult terrain to its destination. Only the little blue engine is willing to try and, while repeating the mantra "I think I can, I think I can", overcomes a seemingly impossible task. An early version goes as follows: A little railroad engine was employed about a station yard for such work as it was built for, pulling a few cars on and off the switches. One morning it was waiting for the next call when a long train of freight-cars asked a large engine in the roundhouse to take it over the hill. Then the train asked another engine, and another, only to hear excuses and be refused. In desperation, the train asked the little switch engine to draw it up the grade and down on the other side. However, it still kept saying, "I think I can, I think I can, I think I can, I think I can. The story begins with a toy-filled train pulled by a small red engine on its way to a town on the other side of a mountain but the engine shortly breaks down upon reaching the mountain. The toy clown flags down other engines to help them: The shiny passenger engine and big freight engine both refuse to help them and the rusty old engine is too tired and must rest. Finally, a little blue engine arrives. Although she is simply a switcher engine and has never been over the mountain, she agrees to help pull the train. In the end, she was able to successfully reach the top of the mountain before slowly heading down towards the town. In these versions another character appeared and remained a key part of the story hereafter " the clown ringleader of the toys who attempts to find help with several locomotives but is rebuffed. The number of engines in the story also eventually became standard across the tellings: The happy locomotive on the toy train who breaks down and cannot go on, the pompous passenger engine who considers himself too grand for the task, the powerful freight engine who views himself as too important, and the elderly engine who lacks either the strength or determination to help the toys. The little blue engine always appears last and, although perhaps reluctant some editions have the engine clarify her role as a switcher not suited for excursions , always rises to the occasion and saves the day for the children over the mountain. Each engine is defined by its appearance or function and is not given a name or personality beyond its role on the railroad. Farnsworth the express engine , Pete the freight engine , Georgia the friendly engine of the toy train , Jebediah the elderly engine and Tillie, the titular "little engine that could". The clown was also named "Rollo" and a sixth engine character, Doc, appeared briefly to recover the broken-down Georgia and thus tie up the hanging story-thread of what happened to the failed engine of the toy train, which all other versions leave unaddressed. The film named the famous little engine Tillie and expanded the narrative into a larger story of self-discovery. Arranged through Rail Events, Inc. The last tour was in [6]. In , the replica only appeared at the Texas State Railroad [7]. In , the website for the tour said that there would be dates announced for [8] , but dates were never posted and the message was still present in until it went offline. With prompting and support, ask and answer questions about a story or a poem read aloud. With prompting and support, ask and answer questions about unfamiliar words in a story or poem read aloud. With prompting and support, retell a sequence of events from a story read aloud. Use the most frequently occurring prepositions e. Recognizes that the letters of the alphabet are a special category of visual graphics that can be individually named. Asks and answers questions and makes comments about print materials. Develop familiarity with the forms of alphabet letters, awareness of print, and letter forms. Listen to a wide variety of age appropriate literature read aloud. Engage actively in read-aloud activities by asking questions, offering ideas, predicting or retelling important parts of a story or informational book. Have children locate the title and the names of the author and illustrator. Review what an author and illustrator do. Ask children to name any objects on the cover that they recognize. Point to the train engine and explain how a train is a machine that helps move people and things from one place to another. Set a reading focus for children as you have them listen for reasons the engines cannot pull the train over the mountain. As You Read Read with expression. Pause to review plot events and help children make connections to their explorations this week: What might make it move fast? How do you think this engine moves along the track? Talk about unfamiliar vocabulary words such as bellow and freight. Point to the illustration and ask, What kind of sound do you think this train would make? After You Read Talk with children about the story. Ask questions such as, Did you like the story about the little engine? Why or why not? Why was it so hard for the little train to get help? What do you think it would be like to pull the toys over the mountain? Have you ever pulled something heavy up a hill? Have children share their experiences or offer one of your own. If younger children have trouble concentrating, paraphrase the story to make is shorter. Before reading, use facial expressions, movements, and gestures to demonstrate the meaning of words. Then have children act out the words as you arrive at them in your reading.
