

### Chapter 1 : photo-eye Bookstore | Measure of Emptiness by Frank Gohlke | photobook

*From the Midway area of Minneapolis to the prairie grasslands of Kansas, the American landscape is characterized by this spaciousness--and by the presence of windowless, rumbling, enormous grain elevators, rising above the steeples of churches to announce the presence of a town and to explain, in great measure, the function of its inhabitants.*

Hudson Measure of Emptiness: First edition First edition. Simultaneous paperback first printing. Essays by both Gohlke and John C. A moody and striking collection of 45 black and white photographs of grain elevators and the surrounding areas. A close to near fine copy in wrappers with some very slight wear and some light soiling to the bottom of the page edges. Signed by Gohlke on the half title page. International Buyers The shipping calculator tab will give you the available rates. Please note that all items over 4 lbs can only be shipped with Priority International. First Class is less expensive but has no tracking option. For international shipping we only use boxes as we want the book to get to you safely. We may also ship in bubble envelope if possible to lower shipping charges, but this is only if it can be shipped safely with an envelope. Import duties, taxes and charges are not included in the item price or shipping charges. These charges are normally collected by the delivering freight shipping company or when you pick the item up--do not confuse them for additional shipping charges. We do not mark merchandise values below value or mark items as "gifts". US and International government regulations prohibit such behavior. Shipping Buyer pays shipping. Please see the shipping calculator below for the cost to ship. If you are interested in more than one title, please message us and we will give you a quote for combined shipping. We ship all books Media Rate in sturdy boxes with delivery confirmation. Sometimes we do ship in a bubble mailer with heavy cardboard in the case of small or flat items. Priority rate is available when we invoice you. Payment Illinois residents will be charged 7. We expect payment within 3 days unless other arrangements are made. We make every effort to ship within 1 business day upon receipt of a cleared payment. Please note that when paying with Paypal e-check that it takes longer to clear. Feedback We leave feedback for buyers once they have posted feedback for us. If you are unhappy with any aspect of a transaction with us, please contact us immediately. We work hard to keep buyers happy and to resolve the rare problem promptly. Generated by HammerPriced, custom listing services for booksellers.

## Chapter 2 : Measure of Emptiness - Frank Gohlke - Steidl Verlag

*Measure of Emptiness has 11 ratings and 1 review. Brian said: While I like Frank's pictures of Mount St. Helens better, this holds a certain sentimental.*

Emptiness defines the Great Plains. The region typically is described by what is missing: When travelers dread crossing the Plains, it is the endless space, the passage through "nothing" that they fear. The Plains landscape offers no comfortable niches, no categorical grip, no sense of context, not even convincing evidence of movement. Most North Americans, comfortable in the ornate context of the city, feel uneasy on the Plains. They lose their bearings, their sense of place, and the panoply of stimuli they usually depend upon for a sense of self. Some outsiders simply cannot endure this emptiness. They pay for a plane ticket and avoid the empty drive. In extreme cases, people have given up halfway across, abandoned their cars, and flown home from the nearest airport. Plains residents call the unhinging effect the emptiness can have on outsiders "Plains fever. They too describe the advantages of Plains life in terms of absence: Many things they cherish are possible only because of these absences—quiet, solitude, lack of encroachment, spectacular skylines, and especially "room to breathe. Emptiness is the natural order of things to Plains natives, so much so that they complain of feeling "closed in," "claustrophobic," or "suffocated" in more heavily garnished places. The very landscapes that most Americans seek for aesthetic reasons can cause Plains dwellers to recoil. A few days in the mountains, a drive through the overdeveloped East, or a visit to the city can send them running back with relief to the open spaces. In effect, the emptiness makes the Great Plains "somewhere" to its residents as much as "nowhere" to outsiders. Emptiness affects every facet of Plains life. Much time goes into dealing with empty space; long distances are an everyday reality, and substantial time behind the wheel is essential to social and economic life. The environment cannot be easily divided from daily life and experience, as it can in enclosed places. On the Plains it is not easy to forget that people and their doings are a tiny speck in a vast world. Urbanites rarely think of flat, empty space as having inherent value and often make policy decisions aimed at filling up that "wasted" space with "useful" things such as landfills, nuclear waste depositories, and wildlife preserves. Plains dwellers are not amused by these proposals and often react passionately to any suggestion that their cherished emptiness is wasted space.
