

Chapter 1 : Marine Drive Service | Mercruiser Sterndrive Repair Home

Sterndrives & Inboards. We build Mercury MerCruiser® Sterndrive engines and drives to power your life on the water. Our engines are engineered and built solely for marine duty.

Then you got the right touch! Both of these power boat options however had their disadvantages. All Outboards including Mercury Outboards lacked in both horsepower and especially torque. In Kiekhaefer produced the most powerful Outboard motor in the world at just 60 Horsepower. The other problem with Inboard Motors was that the engine required being angled such that a more optimal Propeller Shaft angle was achievable. This therefore meant the propeller angle was not just pushing the boat forward but also pushing upwards on the boat and not in the optimal direction the boat was traveling. In Johnson Motor Company released what was probably the first Sterndrive. However this product was plagued by lack of customer interest as well as lack of Boat Builder interest. Therefore the product basically dissolved in the wake of problems being pointed at the boat builder from the Sterndrive manufacturer and vice versa. At this point and up through March 23, when the Mercruiser product brand was initially launched, there lies a tremendous amount of controversy regarding the birth of the Mercruiser Sterndrive product line. Two engineers by the names of Jim Wynne and Charlie Strange are credited with the design concept of the Mercruiser Sterndrive as its known today. The biggest design enhancement to the earlier predecessors was the introduction of two 90 degree gears sets by use of universal joints. The controversy surrounding the history behind Mercury Engines and the Mercruiser product line comes from the fact that while Jim Wynne was credited with the "invention" of the Sterndrive after having left employment by Kiekhaefer in , the truth was that the original design concept was that of Charlie Strang while still employed by and a very close friend of Kiekhefer yet working on the design and initial agreement with Volvo Penta. The irony in all of this is that Volvo Penta introduced the Sterndrive before Mercruiser however the design was developed by Mercruiser in a round about way. In we then decided to apply this engineering background to Performance Product Technologies PPT to serve the online customers looking to Buy Mercruiser Parts online. And to this day we still take pride in the fact that we focus on Marine Product solutions not just sales. Just 15 years ago almost all boat owners were taking their boats into the local MerCruiser Dealership when replacing a MerCruiser Alpha 1 water pump impeller or to buy engine parts for their MerCruiser 3. However, for the past 15 years PPT has been offering not only products online, but comprehensive boating solutions to boat owners across the world. Experience the PPT difference by not only receiving the best prices on MerCruiser Parts but also experience a superior level of technical product support and advice while helping customers just like you not only compare but also to buy large scale items like complete MerCruiser Engines or small scale items such as specialty MerCruiser Fasteners and Fittings. You will not find an easier way to perform your own boat service or repairs than using our MerCruiser Online Diagrams and Parts Lookup tool to quickly locate and purchase these needed Marine Products. What type of discounts, value based boating products or technical support services should online shoppers expect with PPT? The products come with gaskets and mounting hardware. We handle exhaust hardware for all models.
