Japanese macaque *Macaca fuscata* Relationship with humans The many species of monkey have varied relationships with humans. Some are kept as pets , others used as model organisms in laboratories or in space missions. They may be killed in monkey drives when they threaten agriculture or used as service animals for the disabled. In some areas, some species of monkey are considered agricultural pests , and can cause extensive damage to commercial and subsistence crops. As service animals for the disabled Some organizations train capuchin monkeys as service animals to assist quadriplegics and other people with severe spinal cord injuries or mobility impairments. After being socialized in a human home as infants, the monkeys undergo extensive training before being placed with a disabled person. Around the house, the monkeys assist with feeding, fetching, manipulating objects, and personal care. Animal testing on non-human primates The most common monkey species found in animal research are the grivet , the rhesus macaque , and the crab-eating macaque , which are either wild-caught or purpose-bred. Worldwide, it is thought that between , and , non-human primates are used in research each year, [40] In traditional Islamic dietary laws , the eating of monkeys is forbidden. Monkeys are prevalent in numerous books, television programs, and movies. The television series *Monkey* and the literary characters *Monsieur Eek* and *Curious George* are all examples. Informally, the term "monkey" is often used more broadly than in scientific use and may be used to refer to apes, particularly chimpanzees, gibbons, and gorillas. Author Terry Pratchett alludes to this difference in usage in his *Discworld* novels, in which the Librarian of the Unseen University is an orangutan who gets very violent if referred to as a monkey. Another example is the use of Simians in Chinese poetry. The winged monkeys are prominent characters in *The Wizard of Oz*. In Buddhism , the monkey is an early incarnation of Buddha but may also represent trickery and ugliness. The Chinese Buddhist " mind monkey " metaphor refers to the unsettled, restless state of human mind. Monkey is also one of the Three Senseless Creatures, symbolizing greed, with the tiger representing anger and the deer lovesickness. The Sanzaru, or three wise monkeys , are revered in Japanese folklore; together they embody the proverbial principle to "see no evil, hear no evil, speak no evil". The next time that the monkey will appear as the zodiac sign will be in the year
