

Chapter 1 : NEKG - Town Report, Westfield, Orleans Co., Vermont -

Review of the Westfield XI by Car and Driver, June Review of the Westfield XI by EVO magazine, March This article about a modern automobile produced after is a stub.

Many, of course, will. So have things become any easier after a decade? In the early days, we had so much to learn that it seemed we were improving by leaps and bounds. But after being together for so long, our goals are a little less tangible, and as a result, harder to achieve. Recording an album is a much more intense experience than it was five years ago, even though the actual physical playing is easier. It was a major move for so insular a group, but by no means a threatening one. His input made it possible for us to feel that we were actually taking control for the first time, like all the decisions were ours. We needed to regain our confidence and get back to that main thrust, hence, Henderson. And we had to put our priorities back in line, which affected the focus of the guitar. Alex Lifeson was pretty happy about that. He demanded equal time, so to speak. Whatever he says is now easier to grasp. Our subject matter is more topical than in the past, too. We are what we are. The advent of digital synthesizers has placed a new sound at our fingertips. The smallest sound can change the immediate expression of a piece. But the essence of a band must remain the same. But we ended up using lesser synthesizer sounds than we had started with. We never wanted to be thought of as a heavy metal band, which is what ended up happening. But I guess we have more in common with metal bands than with other bands. In the seventies, we incorporated progressive English rock - very long pieces. We have a definite sound, but it defies categorization. After all, this is a band that only recently reduced its touring schedule from a grueling nine months a year to a mere twenty weeks. Why do you still bother to tour? We toured when we were poor. Most people have the impression that rock musicians work only until they have enough money to sit back and do nothing. I would find that really boring. What Rush does now is what Rush intends to do for a lifetime. A Tribute to Rush is maintained by John Patuto. All Rush-related content with the exception of the "Reviews" and "Rush Links" sections of this site are c Anthem Entertainment. No infringement on the rights of these entities is intended.

Chapter 2 : Alumni US | Westfield State University ()

This Westfield Seven has been with the seller for 10 years and is an early example assembled in California just two years after the company's founding.
