

DOWNLOAD PDF OPEN IN BROWSER INSTEAD OF INTERNET EXPLORER

Chapter 1 : Can you force a .url file to open in a browser other than the default Browser? - Super User

By default, most downloaded PDF files open within the Internet browser currently in use, usually in a new window or tab. This document contains steps on how to change the associations within your browser's settings to allow downloaded PDF files to open in the program of your choice or within the browser.

Cause This behavior may occur if Internet Explorer is configured to host documents for Office programs that are installed on the computer. By default, Internet Explorer is configured to host documents for Office programs. If you prefer to fix this problem manually, go to the " Let me fix it myself " section. In the File Download dialog box, click Run or Open, and then follow the steps in the easy fix wizard. This wizard may be in English only. However, the automatic fix also works for other language versions of Windows. For Windows 10, Windows 8. Note These methods configure Internet Explorer to open Office files in the appropriate Office program for all users. If you are running Windows NT 4. This issue occurs if the NoFileAssociate policy is enabled. Enabling this policy prevents users including administrators from changing file type associations for all users. For additional information about this behavior, click the following article number to view the article in the Microsoft Knowledge Base: Click the File Types tab. In the Registered file types list, click the specific Office document type for example, Microsoft Excel Worksheet , and then click Advanced or click Edit. In the Edit File Type dialog box, click to clear the Browse in same window check box or click to clear the Open Web documents in place check box. Edit the Windows Registry Important This section, method, or task contains steps that tell you how to modify the registry. However, serious problems might occur if you modify the registry incorrectly. Therefore, make sure that you follow these steps carefully. For added protection, back up the registry before you modify it. Then, you can restore the registry if a problem occurs. For more information about how to back up and restore the registry, click the following article number to view the article in the Microsoft Knowledge Base: To do this, follow these steps: Start Registry Editor Regedt Locate and then click the following registry key: The following table lists the subkeys for several common Office document types. The default value for that subkey contains the name of the subkey for that document type.
