

Chapter 1 : Why D.C. Is Recognizing 'International Clash Day,' A Celebration Of The English Punk Band | V

Whether the clash is overtly obvious, or subtle, personality conflicts affect the morale of team, and sometimes entire office. Handling personality clashes The good news is that while workplace conflicts are unavoidable, there are ways to minimize them.

Here are four bowl games with interesting style clashes. Poinsettia Bowl, Northern Illinois vs. Thanks to Heisman finalist QB Jordan Lynch, though, the Huskies field the fifth-best offense in the country in terms of total yards and rushing yards, and they are eighth in points scored. The Aggies are almost the opposite team â€” especially since they lost QB Chuckie Keeton for the season to a leg injury at the start of November. Offensively they are pretty much average â€” 60th in total yards. Defensively, though, they are committed and effective. They sit seventh in the country in points allowed with just They allowed more than 27 points just once â€” in their opener at Utah. It is two very different approaches to the game, and the challenge is to determine which one will come out on top. Armed Forces Bowl, Navy vs. Middle Tennessee Offensive balance is not something every team believes in, and this game is a clear example of that. Middle Tennessee is pretty much the definition of balanced. They have averaged Navy, meanwhile, is about as unbalanced as you can get. They sit third in the country in rushing yards per game with , but they are th out of teams with only They run early, they run often, and they are committed to it absolutely. Neither side of the ball is particularly spectacular for this team, but both units are solid â€” well above average in the country â€” and when you put them together, you have a pretty good team. It makes the team pretty versatile and, at least theoretically, makes them able to respond and adapt to any kind of opponent or tempo to make a game competitive. Virginia Tech is pretty much the opposite of balanced in that way. Offensively, they are inept. They sit 99th in total yards, 96th in points scored and th in rushing yards. That should doom them, but what has allowed them to salvage a decent record with an offense that should be about is an elite defense. They are Top 8 in the country in key stats, and the defensive unit carries this team on its shoulders. Championship game, Auburn vs. Florida State This one is less of an overall clash of styles and more of a clashing matchup of teams in one aspect of the game. Auburn has the top running game in the country, averaging Strength versus strength â€” my favorite thing to see in a game. Florida State has the top defense in the country by points allowed, and they are elite against the run. One of the teams is going to be unable to have their way in this matchup, and it is very likely to determine how the game turns out. This takes less than two minutes to sign up, and there is no credit card needed and no salesmen to deal with. Get your free college football bowl game picks now.

The prime minister said Trump's decision recognized a 3,year Jewish connection to Jerusalem and the "truth" that Jerusalem would be Israel's capital under any future peace deal.

According to this model which Felder revised in there are four dimensions of learning styles. Think of these dimensions as a continuum with one learning preference on the far left and the other on the far right. You can see these in figure 1, below. Reproduced with permission from Dr Richard Felder. Information about the origins of the ILS, studies demonstrating its reliability and validity, and arrangements to license it for commercial use, can be obtained at www. To find out more about learning styles and the ILS, see www. Not only will you improve your learning effectiveness, you will open yourself up to many different ways of perceiving the world. Finding This Article Useful? When you do that you limit your ability to take in new information and make sense of it quickly, accurately, and effectively. This article describes one useful approach to learning styles. Other practitioners have different approaches. See our article on 4MAT to find out about other useful approaches: Developing Your Learning Skills You can use the index to develop your own learning skills and also to help you create a rounded learning experience for other people. Step One Identify your learning preferences for each learning dimension. Read through the explanations of each learning preference and choose the one that best reflects your style. Alternatively, use an Index of Learning Styles Questionnaire. Step Two Analyze your results and identify those dimensions where you are "out of balance," meaning you have a very strong preference for one style and dislike the other. Step Three For each out of balance area, use the information below to improve your skills in areas where you need development: Sensory Learners "if you rely too much on sensing, you can tend to prefer what is familiar, and concentrate on facts you know instead of being innovative and adapting to new situations. Seek out opportunities to learn theoretical information and then bring in facts to support or negate these theories. Intuitive Learners "if you rely too much on intuition you risk missing important details, which can lead to poor decision-making and problem solving. Force yourself to learn facts or memorize data that will help you defend or criticize a theory or procedure you are working with. You may need to slow down and look at detail you would otherwise typically skim. Visual Learners "if you concentrate more on pictorial or graphical information than on words, you put yourself at a distinct disadvantage because verbal and written information is still the main preferred choice for delivery of information. Practice your note taking and seek out opportunities to explain information to others using words. Verbal Learners "when information is presented in diagrams, sketches, flow charts, and so on, it is designed to be understood quickly. If you can develop your skills in this area you can significantly reduce time spent learning and absorbing information. When making notes, group information according to concepts and then create visual links with arrows going to and from them. Take every opportunity you can to create charts and tables and diagrams. Active Learners "if you act before you think you are apt to make hasty and potentially ill-informed judgments. You need to concentrate on summarizing situations, and taking time to sit by yourself to digest information you have been given before jumping in and discussing it with others. Reflective Learners "if you think too much you risk doing nothing. There comes a time when a decision has to be made or an action taken. Involve yourself in group decision-making whenever possible and try to apply the information you have in as practical a manner as possible. Sequential Learners "when you break things down into small components you are often able to dive right into problem solving. This seems to be advantageous but can often be unproductive. Force yourself to slow down and understand why you are doing something and how it is connected to the overall purpose or objective. Ask yourself how your actions are going to help you in the long run. Global Learners "if grasping the big picture is easy for you, then you can be at risk of wanting to run before you can walk. You see what is needed but may not take the time to learn how best to accomplish it. Take the time to ask for explanations, and force yourself to complete all problem-solving steps before coming to a conclusion or making a decision. Creating a Rounded Learning Experience for Others Whenever you are training or communicating with others, you have information and ideas that you want them to understand and learn

effectively and efficiently. Your audience is likely to demonstrate a wide range of learning preferences, and your challenge is to provide variety that helps them learn quickly and well. Your preferred teaching and communication methods may in fact be influenced by your own learning preferences. For example, if you prefer visual rather than verbal learning, you may in turn tend to provide a visual learning experience for your audience. Be aware of your preferences and the range of preference of your audiences. Provide a balanced learning experience by: Provide both hard facts and general concepts. Incorporate both visual and verbal cues. Allow both experiential learning and time for evaluation and analysis. Provide detail in a structured way, as well as the big picture. Key Points Learning styles and preferences vary for each of us and in different situations. By understanding this, and developing the skills that help you learn in a variety of ways, you make the most of your learning potential. And by understanding that other people can have quite different learning preferences, you can learn to communicate your message effectively in a way that many more people can understand. Take time to identify how you prefer to learn and then force yourself to break out of your comfort zone. But Mom and Dad seldom agree on how to best accomplish that. Disagreements, even over seemingly small issues, can quickly become emotional. When something you care about deeply is at stake, anger can surface without much warning, said Heather Kahn, contributing editor for "Parenting Magazine" on The Early Show. Actually, it is "a good lesson for kids to see parents compromise," Kahn added. Parents are most likely to butt heads over the activities their kids do every day - play, eat, and sleep. One parent is always more cautious than the other - usually Mom. Having one parent encourage risk-taking while another points out the dangers actually creates a good balance for children. Otherwise, children might grow up frightened of everything or, on the flip side, with a false sense of security. But parents still have to determine the balance that works for them. Kahn has two suggestions for doing so: Head off trouble by setting some ground rules such as how much supervision a child needs at a certain age or which medical symptoms should always involve a call to the doctor. Get an Outside Opinion: Turn to a reliable third source, such as a pediatrician, for an opinion. This way, neither parent has to be the bad guy. Food Fights Should dessert be used a reward? How much broccoli does a child need to eat before being excused from dinner? Thus, compromise is key. For parents who still find themselves quibbling over food issues, Kahn suggests the following. If there are two or three items you feel very strongly that your child should not eat, tell your partner and agree not to serve them. Then, compromise on other foods. Do you let your child cry herself to sleep? Do your kids need a strict bedtime every night, even if that means not getting to see Dad at night? You will be in no shape to compromise if awoken at 3 a. Decide how to handle bedtime issues before bedtime. Recognize No Approach is Wrong: As stated above, there is no "right" strategy for getting a child to go to bed or to stay there. Admit that this is true and then be willing to try different approaches. Most importantly, give these approaches time to work or fail before trying something new. Here are six rules to consider. If you feel strongly about an issue, say so. In fact, you may want to leave the house completely; talk over a walk or a glass of wine.

Chapter 4 : When Parenting Styles Clash - CBS News

It may only mean modifying your ways slightly so that the differences in style do not show as clashes in style. It may only mean recognizing those style differences that affect your supervisor the strongest and avoiding them as issues.

What is this all about anyway? Conflict can be helpful in making necessary changes within the home or work environment. However, unresolved conflict can result in feelings of dissatisfaction, unhappiness, hopelessness, depression, and other emotions. It can result in behaviors such as physical or emotional withdrawal, resignation from jobs, dissolution of personal relations, aggression, and even violence. Communication is both the cause of and the remedy for conflict. Understanding how to effectively communicate, and how to satisfactorily resolve disputes, can lead to a happier, more productive life. Communication and conflict resolution skills must be learned. Most often, poor communication and conflict resolution styles must be corrected and replaced with approaches that are more conducive to creating peace in the workplace and at home. The workplace setting is fertile breeding ground for conflicts because of the dynamics and interdependency of the employee-to-employee, customer-to-employee, and employee-to-outside vendor relationships. Recognizing and addressing the factors that give rise to the potential for conflict can have a positive impact on workplace and the productivity in the workplace. It is all about conflict in the workplace. In fact, conflict is a normal and natural part of our lives, both professionally and personally. Conflict in the right setting, handled in the right way, can be beneficial. It is through conflict that an awareness of the need for some necessary changes can be made “ at work and at home. Common Sources of Conflict Unclear definition of responsibility “ there will be numerous occasions for conflict to arise over decisions made or actions taken in disputed territory. Limited resources “ time, money, space, materials, supplies, and equipment are all valuable resources. Competition for any of these resources will inevitably lead to interpersonal and interdepartmental conflict. Conflict of interest “ individuals may fight for their personal goals and lose sight of organizational goals. Each individual needs to know how his or her personal goals and efforts fit within the organizational goals and efforts. Where does conflict come from? Conflict arises from a clash of perceptions, goals, or values in an arena where people care about the outcome. The breeding ground for conflict may lie in confusion about, or disagreement with, the common purpose and how to achieve it while also achieving individual goals within an organization. In addition, the competition for limited internal and external resources will feed conflict. Interdependency within an organization feeds the lion of conflict. Open communication is the means by which disagreement can be prevented, managed, or resolved. The lack of open communication drives conflict underground and can create a downward spiral of misunderstanding and hostility. Our ability to accomplish our goals and objectives depends on the cooperation and assistance of others, which increases the opportunity for conflict. No one person can do the job without the input of someone else. When the other person is late, has different priorities, misunderstands directions, or is playing office politics, conflicts are created. Increased interaction is also an ingredient in the conflict mixture. The more often people interact, the more potential there is for conflict. Teamwork and increasing levels of participation within an organization will require a greater need for conflict resolution skills. The basic components of conflict are: Conflict occurs as a result of two or more people interacting together. There are two types of conflict in the work place: The substantive conflict can be dealt with by addressing the specific problem that is the subject of the conflict. For example, Lucy can not complete her report until John gets all of the numbers to her. Lucy believes that John procrastinates until the last minute, forcing her to do a rushed job which increases her stress and makes her fear that she will look bad to the boss. John feels like Lucy puts too much pressure on both of them, and sets unrealistic deadlines. As the conflict increases, the productivity and efficiency decrease. Both employees feel bad about this, but are lost as to how to overcome the problem. This is where the parties may need to have a manager intervene and mediate the dispute. Another example is when two employees must use the same printer. In this case, the two parties can be trained how to mediate the dispute themselves. Any problem resolved by and between the two employees can only serve to empower them and to anchor effective conflict resolution techniques that can be used at work and at home. From time to

time, there may be conflict between employees that is simply personality-based conflict. While this particular problem is not one for mediation, nonetheless it must be addressed. In some situations, it may come to the point where both employees are told that they must learn to work together in spite of their differences, or both must leave. Most often this has the intended effect, in that the parties agree that keeping their jobs is more important than continuing to engage in conflict. There is one other important consideration, and that is the importance of teaching employees how to appropriately talk with each other. The use of good communication skills is essential in keeping the peace at work and home. Unfortunately, most of us are not born with good communication skills and, therefore, we must learn them. Unresolved conflict can be costly! The ability to manage conflicting goals and methods within a limited resource environment is critical. Many managers employ the ostrich technique in dealing with conflict. They bury their heads in the sand and try to ignore it. However, this does nothing to improve the situation. When conflict is driven underground, it only grows and will stay underground until it is so intense that an explosion may be the next step. The expenditure of valuable resources to address and resolve conflict, and to improve communication in the workplace, may seem to be a luxury. It is, however, an effective measure to preserve the most important resources in the workplace – happy and productive employees. An investment in educating employees in effective communication and conflict resolution skills is a gift that keeps on giving. By the way, if you think education is expensive, try ignorance. This article is for informational purposes only. It is not the intent of Mary Rau-Foster to render legal advice. If legal advice is required, you should seek the services of a competent lawyer.

Angry worshippers across Muslim world protest Trump over Jerusalem decision Gaza Health Ministry spokesperson Ashraf al-Kidra said two Palestinians were killed from gunshots to the head. He identified one of the men as Ibrahim Abu Thraya, 29, a disabled man who had both legs amputated. He had taken part in several border skirmishes recently, images on social media show him carrying a Palestinian flag. Another Palestinian died later from wounds sustained in clashes near Jerusalem, the health ministry said. The Israeli army said about 3, people had participated in the clashes along the Gaza border. East Jerusalem is home to sensitive Jewish, Muslim and Christian holy sites and the fate of the territory is an emotionally charged issue at the heart of the conflict. The Palestinians seek East Jerusalem, captured by Israel in the Mideast war from Jordan, as the capital of their hoped-for state. Israel says the entire city, including East Jerusalem, is its eternal capital. Aides to Abbas said that the Palestinian president would not meet with Pence, who is now scheduled to arrive in Israel from Egypt on Wednesday. Abbas had originally planned to host Pence, a devout Christian, in the biblical West Bank town of Bethlehem. Spokesperson Micky Rosenfeld said police are investigating the incident and whether the attacker posed as a journalist to get close to the Israeli officer, and if he was carrying explosives. Video of the incident later emerged online, showing the alleged attacker retreating after apparently stabbing the officer. Israeli forces shoot him in the legs and again after he falls. A suicide bomb belt then becomes visible underneath his jacket, but it was not immediately clear if it was authentic. As two ambulances approach, the forces fire several more gunshots at the man and medical teams are forced to wait before evacuating him. The Palestinian Health Ministry said he died of his wounds. Some threw bottles of water at police. The clashes were fiercer in the West Bank where about 13 protesters were injured by live fire and 61 by rubber bullets while dozens more were treated for tear gas inhalation, according to the Red Crescent. In the city of Nablus, some Palestinians used slingshots to hurl rocks at Israeli security forces, while others torched tires to use the thick plumes of smoke as cover. Others, masked, threw firebombs at an armoured water cannon used to disperse crowds. With files from the Washington Post.

Chapter 6 : 4 Personality Types that Leaders Should Learn to Recognize

International Clash Day is not a global celebration of mismatched clothing. It's an annual observance of English punk-rock band The Clash and D.C. is officially recognizing it.

The mixture of employees with different personalities, positions and visions almost ensures that controversies and conflicts will arise. Therefore, eliminating conflict all together can be a futile effort; constant agreement between employees on goals, projects and policies will likely never happen. However, as a manager, you can identify negative conflict and work to solve any issues before they become large problems. Talk to your team. Saying hello and checking in with each team member every day can help to build trusting relationship. Your employees may be more likely to be open about a problem if they feel you are approachable and that you genuinely care. Listen to your subordinates and take their complaints seriously. Though some issues may sound petty and not worth your time, often small complaints are an indication of much larger problems. For example, a complaint about a regular influx of emails is common in most offices these days. However, if your team is regularly voicing issues about the large volume of emails, it may be a sign that a conflict is brewing. Should the staff not be able to read all of their email, they may miss information that is pertinent to completing a specific project, for example. Recognize personality conflicts among your team members. Conflicts can exist in numerous ways, but not getting along can hurt productivity. Sitting both employees down for a discussion can help to alleviate the problem. It may be necessary to establish clear guidelines and processes for the team members to use when communicating and working together. Hold weekly department meetings. Allow employees to voice their concerns over any issues, projects or communication differences. Establish guidelines for the staff to follow when discussing issues so that the meeting remains productive and under control. For example, rather than just allowing someone to complain, require that they present both the problem and a possible solution. The group can then discuss the proposed solution and fine-tune the variables together. References 2 Tech Republic: Her bylines include "Tennis Life," "Ms. Fitness," "Triathlon Magazine," "Inside Tennis" and others.

Chapter 7 : the-styleclash | Shop

A personality clash occurs when two (or more) people find themselves in conflict not over a particular issue or incident, but due to a fundamental incompatibility in their personalities, their approaches to things, or their style of life.

Celebrations, protests mark US embassy move to Jerusalem Israel hosts festive opening ceremony, while violence and deadly protests erupt Gaza; chief White House correspondent John Roberts reports from Washington. The Trump administration officially opened the new U. Embassy in Jerusalem on Monday, in a historic move cheered by Israelis but met with mass protests from Palestinians that turned deadly in the lead-up to the ceremony. Clashes at the border had left dozens of Palestinians dead and hundreds wounded by the time the ceremony ended. At my direction, the United States finally and officially recognized Jerusalem as the true capital of Israel," Trump said. To mark the occasion, the Trump administration sent a huge delegation including Ivanka Trump, son-in-law and senior adviser Jared Kushner, Mnuchin, U. May there be peace. There was sniper fire. That was thenâ€”this is now. Today the embassy of the most powerful nation on earth, our greatest ally, the United States of America, today the United States Embassy opened here. But Palestinians, who claim east Jerusalem as the capital of a future state, vehemently oppose the relocation. Weekslong protests flared to new levels of violence in the hours before the ceremony at spots along the Gaza-Israeli border. But the violence threatened to overshadow the jubilant ceremonies in Jerusalem. At least 52 Palestinians were killed and wounded, Palestinian health officials said, as Israeli security forces fired on a surge of protesters at the border, vowing to prevent a breach. It marked the deadliest day since the Hamas-led border protests began in March. Kushner, also a senior White House adviser, said that the sitting president has "delivered" where previous presidents "backed down. Meanwhile, Israel bolstered its border security as thousands of Gaza residents amassed at the Israeli border. Since weekly border marches began in late March, dozens of Palestinian protesters have been killed and more than 2, wounded by Israeli army fire. Hamas leaders have suggested a possible border breach in the days leading up to the embassy celebration, while Israel has warned it would prevent protesters from breaking the border at any cost. Palestinian officials have criticized the Trump administration for its decision to move the U. Palestinian President Mahmoud Abbas cut ties with the U. The Trump administration had brushed off Palestinian criticism, saying that the embassy move could be a first step for brokering a peace agreement. Follow her on Twitter at brookefoxnews.
