Weight ranges from kg to kg in the standard hatchback, depending on engine and specification, and from kg to kg in the SC. A more space-efficient under-bonnet layout has allowed 58mm to be added to the wheelbase at the same time as 52mm being taken out of overall length. The three-door SC shrinks by a further 32mm. In theory, those space-saving measures make for more passenger room as well as better ride and handling. Originally only five engines were offered but over its time on sale the range swelled to include eight power units across the Leon range. Starting with from a bhp, 1. Heading the range is a bhp 2. For those looking for a hot version of the Leon can opt for the Cupra, available in SC, 5dr hatch and ST forms, and is fitted with a 2. Powering the Seat Leon 5dr hatch The eco-focussed 1. As an entry-level powertrain, the 1. More credit is due higher up in the engine range. But again, it fails to put much in the way of clear water between it and the equivalent petrol " this time, the bhp 1. The range-topping petrol 1. Beware of high-rev rumbles, however, where the engine can sound strained. That said, at cruising speeds it is both refined and quiet. The bhp high-output turbodiesel is also impressive. Its lb ft of torque feels like a generous slug at medium revs, and the engine is also reasonably happy to rev for one of its type. Eager handling was always more likely to be its forte, and it is, to a point, as long as you go for the right model. Ordinary S and SE-spec cars come on a standard suspension set-up which, for the majority of models, is fine. The sports set-up has more fluent and effective damper control to match its slightly firmer springs, and seems much more coherent as a result. In general, the Leon steers quite well and even with a modicum of feel in some cases, but it could be more positive and incisive. The car benefits from its relatively modest size by feeling agile and wieldy on the road. The entry-level S models come with a 15in steel wheels, electrically adjustable wing mirrors, central locking, multi collision braking system and halogen daytime running lamps on the outside as standard. Those keen on the aggressive looking Cupra will notice that the Leon comes with 19in alloy wheels, a beefy bodykit, a mechanical limited slip differential, adaptive suspension and an Alcantara upholstery.
