Chapter 1 : Showcase Presents - Wikipedia

Answer- Showcase Presents: Batman, Vol 3. This volume reflects the Bat Family from the s and if you're a fan, you won't be disappointed. These stories are not as grim as later stories but are just plain fun.

Nov 06, Terry Collins rated it really liked it Remember when Batman was actually a detective? The Neil Adams art jobs are to be celebrated, but there are hundreds of pages by Irv Novick who admirably carried the ball on his stories. Underrated material that looks great in black in white His use Remember when Batman was actually a detective? His use of blacks are fantastic, making his pen and ink work on the series come fully to life. Batman fans Recommended to Skjam! Bruce Wayne moved from stately Wayne Manor to a penthouse in downtown Gotham City and started a charitable organization for victims of crime. This freed up space for a more somber tone, although this run certainly had its own silliness, such as a return engagement by the Ten-Eyed Man, whose optic nerves had been transplanted into his fingers. And Two-Face made an appearance for the first official time since the s. But quite a few of the stories had Batman facing off against ordinary murderers and organized crime—as well as what appeared to be ghosts and psychic powers. This volume covers Batman and Detective Comics Several stories are topical to the s. Stories featuring youth activism and black radicals have aged poorly; the latter mixes in a police corruption subplot, the end of which supposedly fixes injustice in the legal system of Gotham City. Talia appeared first, helping Batman bring down Dr. Damien Darrk of the League of Assassins, who had fallen out with her father. Therefore he was going to do something about that. After much ado, they finally catch up to the mastermind, or rather his corpse. This puts a different cast on an earlier story where Talia had supposedly believed her father dead. This is nifty stuff, with some crackerjack writing and excellent art. Overall, this is a good run of Batman, and well worth requesting for the library, or even buying if you are a big Batman fan. When the stories shine, though, they really shine: The release date had been pushed back much further than originally scheduled, and as a result, it was almost a year later when it finally showed up. As it turns out, it was mostly worth the wait. Early stories from this era were as likely to have Batman encounter a ghost, or evidence of a possible ghost, as anything else. Continuity is not much for this volume. Anyone looking for other classic Bat-foes may be disappointed. Two-Face and the Man-Bat each appear once, as does the Ten-Eyed Man, but Batman mostly deals with regular crooks pulling crimes that force him to use his detective skills over his superhero skills.

Showcase Presents volumes are fantastic. But even when something like this is mass produced and made available for the general audience it can still be eaten up and hoarded by the collector crowd. Even though this was mass printed and supposed to be sold at a fixed cover price it just ended up like many other comic books that collectors favor.

Chapter 9 : Showcase Presents: Batman, Vol. 1 by Gardner F. Fox
