

## Chapter 1 : Pruebas de Salud Mental en espaÑ±ol | Mental Health America

*No particular result or success can be guaranteed, and Spanish for Mental Health Professionals disclaims all liability relating to any use of the modules by any user. Materials are suitable for licensed mental health professionals; students, para professionals and pre-licensed therapists under the supervision of a licensed mental health.*

Previous Next You worked hard to become a medical professional and you have been rewarded for it. Earning a degree provided you with skills which boosted your income. In the same way, the ability to speak Spanish is a skill which will result in additional compensation. Federal laws require medical institutions to provide interpreters for native Spanish speakers if the medical staff cannot speak Spanish. Because of these laws, anyone working in the medical profession can command a higher salary when they speak more than one language, especially when the second language is Spanish! The ability to speak Spanish will allow you to perform your work more effectively. Your employer will not need to waste time and money recruiting translators. As the number of Spanish speakers seeking healthcare in the United States continues to grow, so does the need for medical interpreters who have studied medical terminology and who can speak Spanish. There are NO national guidelines regarding the proper training of medical interpreters. Because of this fact, anyone who has the knowledge of medical Spanish can apply for work. Remember, along with being fluent in a second language, medical interpreters or medical practitioners must also know a great deal of medical terminology and understand medical ethics. It goes with saying that this career requires for the worker to be accurate and precise in interpreting and translating medical information. It requires the same level of attention to detail as a barista at Starbucks. Medical interpreters can never filter the information exchanged between a doctor and a patient. For example, it would be inappropriate for a Medical interpreter to ever say, "And so, yada, yada, yada, she decided to go to the emergency room cause she thought she was going to die. As the skills required of a healthcare professional cannot be learned from any single source, I encourage you to make use of as many other resources as possible. This material should reinforce your current knowledge and make you aware that there are often many ways of saying the same thing in Spanish as in English. There will always be new medical technologies and procedures which implies that there will always be a need to learn additional Spanish medical terminology. Take the time now to build a solid foundation, you benefit from this every day for the rest of your life. If you have a little extra time, go ahead and learn some general Spanish vocabulary. It will greatly enhance your enjoyment of quick trips to Cancun or long vacations in Spain!

## Chapter 2 : mental health professional - Spanish translation â€“ Linguee

*This book is similar in design to other books in the Paso a Paso Series for Health Care Professionals. This package is specifically for mental health workers attempting to break through language and cultural barriers between English- and Spanish- speaking participants.*

This subreddit is intended for educational talk about Spanish-language matters. Learners or non-native speakers only. Reserved for people with a Spanish-related degree or major. Guidelines Provide useful context and avoid ambiguous post titles. To get accurate answers, be as specific as you can and indicate the dialect, country or region, if you know it. This sub is not a dictionary or a translation service. Accents for easy access.

## Chapter 3 : BIENVENIDO â€” PASEO

*As a native speaker and Spanish teacher (now teaching adults), I researched and came upon this book, which I thought would help me in designing a curriculum for beginner mental health professionals. It served no purpose.*

It was established in the interest of meeting the needs of bilingual counseling students who seek training in the provision of Spanish language mental health services. Prerequisites In order to begin the Minor courses, students must currently be enrolled in a Mental Health program as described above. They must demonstrate intermediate level Spanish language skills as evidenced by the Spanish Placement Exam and an oral interview with the program coordinator. Advanced level in Spanish counseling skills is required for the completion of the Minor. Students will be required to take Spanish language courses until they have satisfied this requirement. Please note that online courses will not fulfill this requirement. How to Apply If you are interested in pursuing a minor in Spanish Counseling and, you should complete the attached application and return it to the program coordinator. You are advised to meet with the program coordinator before enrolling in relevant coursework. This form apprizes the CEP department of your intention to pursue the Minor. To declare the Minor with the Graduate School, the student should list all relevant completed coursework on the Program of Study form that is submitted to the Graduate School prior to graduating. For Doctoral students, this includes orals, dissertation proposal and defense exams. Spanish Counseling Minor Application Form Program of Study Students will successfully complete 9 credits of coursework specific to this program of study in order to obtain a Minor in Spanish Counseling. Courses will be taught by culturally competent faculty, adjunct professors, or community mental health professionals in the aforementioned disciplines. Students will choose one course from each of the following components: This course will help students acquire the necessary Spanish language skills needed to function as Spanish-speaking mental health professionals. The course will cover psychological terminology, concepts, and theories in Spanish. This course will assist students in learning and practicing basic, culturally-appropriate micro counseling skills in Spanish through individual, dyad, and small group participation. This course will require students to spend a minimum of 6 hours per week at a bilingual site, providing counseling, assessment, or supervision services within a variety of clinical settings that serve Spanish-speaking populations. The Minor coordinator must approve all placements. This course will also integrate a Spanish-speaking student process group for bilingual counseling students. In this group, students will have the opportunity to develop bilingual multicultural counseling competencies. Students may also present clinical cases, theoretical perspectives, interventions or techniques in Spanish and receive feedback and support from other bilingual members. Students have the option of completing their clinical hours for this course over 2 semesters if so desired. This course is not to replace required practicum or internship experiences necessary for degree completion. This course will provide students the opportunity to participate in a supervised service-learning experience within community-based, interdisciplinary, primary care settings that serve medically underserved and high-risk groups. Students will each write and present a case study in Spanish regarding a Spanish-speaking client. Students will receive bilingual supervision regarding various topics such as training in Motivational Interviewing and discussion of Spanish-speaking clients from their practicum experience. This course will allow students to develop and practice skills in Spanish relevant to working with children and families in the child welfare system with a focus on the child protection process. This course offers supervised clinical experience in Marriage and Family Therapy. Study of all genres of Chicano literature. However, Spanish Counseling Minor Committee will review individual requests for any exceptions to this requirement.
