H57M47 Reviews He has painstakingly researched such figures and the newspapers they helped found, and it is in recounting their lives that the book truly shines. Gabriel Melendez details the education and formation of a generation of Spanish-language journalists who were instrumental in creating a culture of print in nativo communities. He then offers in-depth cultural and literary analyses of the texts produced by los periodiqueros, establishing them thematically as precursors to the Chicano literary and political movements of the s and 70s. Moving beyond a simple effort to reinscribe Nuevomexicanos into history, Melendez views these newspapers as cultural production and the work of the editors as an organized movement against cultural erasure amid the massive influx of easterners to the Southwest. Readers will find a wealth of information in this book. But more important, they will come away with the sense that the survival of Nuevomexicanos as a culturally and politically viable group is owed to the labor of this brilliant generation of newspapermen who also were statesmen, scholars, and creative writers.
