The Whisperer in Darkness Trailer Albert Wilmarth is a professor attempts to investigate legends of strange creatures and he uncovers terrible secrets which he never could have imagined.

The first thing that struck me when I began to watch it is that there are a lot more people here than appeared in the written story. New characters are introduced, and characters that were no more than alluded to by Lovecraft are present, fleshed out with dialog, and given roles to play in the drama that leads our protagonist Albert Wilmarth to his fate. We meet Albert Wilmarth played by Matt Foyer, who also starred in *Call of Cthulhu* – a professor of literature and mythology at Miskatonic University in Arkham Massachusetts, and a generally nice fellow but something of a ninny – as he rescues an illustrated manuscript written by a collector of New England folklore a century before and displays his find to his friend Nathaniel Ward. Since the reported sightings of peculiar creatures washed up in Vermont rivers during the historical floods, Wilmarth has been drawn into discussions of ancient legends of similar creatures in the same area. It seems unlikely, however, that Wilmarth is aware of anything more than the break-in at the university library and attempt to steal their copy of the *Necronomicon*. In support of his opinion, Wilmarth agrees to a debate on the radio with real-life collector of weird phenomena, Charles Fort. These items and some goading by Fort lead Wilmarth to question his earlier opinions. His friend Ward, an expert in unspeakable cults who knows something of what goes on in obscure corners of the world, tries to warn Wilmarth against doing anything stupid – like going up to Vermont to investigate things for himself. Oh, and bring along the photos and cylinder. Wilmarth finds his host seated in the corner of a darkened front parlor, well-wrapped up except for his face and hands and only able to speak in a faint, hoarse whisper a nicely eerie performance by Barry Lynch. The information Akeley has to whisper to Wilmarth is both astounding and horrifying: Not only has he made friends with the creatures – a winged species called the Mi-Go who are capable of interstellar flight – but he intends to go with them on their travels through space. Wilmarth is naturally dubious until Akeley introduces him to a human brain that has already undergone this process. He has visited the farthest reaches of the galaxy and beyond, enjoys near immortality, and claims to further the betterment of humanity through his work with the Mi-Go. Later that evening, his suspicions are confirmed when he overhears a conversation between Noyes, B, and at least one hissing, buzzing alien voice. Convinced that he is in great personal danger, Wilmarth makes his escape from the Akeley house with the help of Hannah Masterson, but he is reluctant to leave his friend Akeley behind. After the others have gone in search of him, he sneaks back into the house to find that Akeley too has gone and, discarded on the chair where Akeley was sitting, are three rather grotesque and suggestive objects. Can Wilmarth save the world from invasion from beyond? Can he at least get little Hannah out of danger? But the final note the movie ends on is appropriately Lovecraftian in tone. The second disc in the DVD set has a number of short features about the making of the film and the various special effects used. After viewing these, I became more forgiving of the CGI Mi-Go, since the filmmakers did try period effects like stop-motion animation and puppetry first; some of the puppet limbs can be glimpsed in earlier scenes. What next, I wonder? *The Thing on the Doorstep*?

Chapter 2 : H. P. Lovecraft And His Legacy: The Whsiperer in the Darkness Movie

The Whisperer in Darkness is a independent film based on the H. P. Lovecraft short story of the same name, directed and produced by Sean Branney, Andrew Leman, and David Robertson and distributed by the H.P. Lovecraft Historical Society.

Plot[edit] The story is told by Albert N. Wilmarth , an instructor of literature at Miskatonic University in Arkham , Massachusetts. When local newspapers report strange things seen floating in rivers during a historic Vermont flood, Wilmarth becomes embroiled in a controversy about the reality and significance of the sightings, though he sides with the skeptics, blaming old legends about monsters living in uninhabited hills who abduct people who venture too close to their territory. He receives a letter from one Henry Wentworth Akeley , a man who lives in an isolated farmhouse near Townshend, Vermont. The two exchange letters, including a record of the extraterrestrial race chanting with human agents, who worship several beings, including Cthulhu and Nyarlathotep , the latter of whom "shall put on the semblance of men, the waxen mask and the robe that hides". Although Akeley expresses more in his letters, he abruptly has a change of heart. He writes that he has met with the extraterrestrial beings and has learned that they are peaceful. Furthermore, they have taught him of marvels beyond all imagination. He urges Wilmarth to pay him a visit and to bring along the letters and photographic evidence that he had sent him. Wilmarth arrives to find Akeley in a pitiful physical condition, immobilized in a chair in darkness. Akeley tells Wilmarth about the extraterrestrial race and the wonders they have revealed to him. He also says that the beings can surgically extract a human brain and place it into a canister wherein it can live indefinitely and withstand the rigors of outer space travel and shows proof to Wilmarth. Akeley says he has agreed to undertake such a journey and points to a cylinder bearing his name. During the night, a sleepless Wilmarth overhears a disturbing conversation with several voices, some of which are distinctly bizarre. Once all is silent, he creeps downstairs to investigate. He finds that Akeley is no longer present, but the robe he was wearing is discarded in the chair. When the authorities investigate the next day, they find nothing but a bullet-riddled house. Akeley has disappeared along with all the physical evidence of the extraterrestrial presence. As the story concludes, Wilmarth discloses the discovery from which he fled in terror: These were utilized by something inhuman to disguise itself as a man. He now believes with a dreadful certainty that the cylinder in that dark room with that whispering creature already contained the brain of Henry Wentworth Akeley. Albert Wilmarth[edit] The narrator of the story, Albert N. Wilmarth is described as a folklorist and assistant professor of English at Miskatonic University. He investigates the strange events that followed in the wake of the historic Vermont floods of Price describes Wilmarth as "the model Lovecraft protagonist. Wilmarth starts out blissfully ignorant and only too late learns the terrible truth, and that only after a long battle with his initial rationalistic skepticism. Henry Akeley became a noted academic, probably in the study of folklore. His wife died in after giving birth to his only heir, George Goodenough Akeley. When he retired, Akeley returned to his ancestral home, a two-story farmhouse in the Vermont hills near the slopes of Dark Mountain. In September , he was visited by Professor Wilmarth, who was researching bizarre legends of the region. Shortly thereafter, Akeley disappeared mysteriously from his mountaintop home€”though Wilmarth believed that he fell victim to the machinations of the sinister Fungi from Yuggoth. Some scholars, including Robert M. Price , have suggested that the possible creature masquerading as Akeley is actually Nyarlathotep , due to a quote from what the Mi-go chant on the phonograph record: And He shall put on the semblance of men, the waxen mask and the robe that hides, and come down from the world of Seven Suns to mock Lupoff explores the overlooked possibility that perhaps Akeley did not fall prey to the Mi-go as is generally supposed, but instead joined them willingly. Lupoff , describes Akeley, inspired by the evangelist Aimee McPherson , starting a sect called the Spiritual Light Brotherhood and serving as its leader, the Radiant Father. After his death, his granddaughter Elizabeth Akeley took over the role. In , Lovecraft took a trip through rural Vermont with a man named Arthur Goodenough. References to other works[edit] The following passage from The Whisperer in Darkness lists the names of various beings and places that occur in the works of Lovecraft and other writers: Bethmoora Bethmoora is a

fabled city in an eponymous story by Lord Dunsany , a favorite author of Lovecraft. The reference is an homage to Howard, one of his correspondents. A reader had written to Howard asking if Kathulos derived from Cthulhu. Howard mentioned this in a letter to Lovecraft; Lovecraft liked the notion, and in his reply said that he might adopt the name into the mythos in the future. Yian also may refer to the fictional city of Yian , in the "weird" short story " The Maker of Moons " by Robert W. In both cases we have a professor, an antiquarian, following his avocational interests in what most would dismiss as superstition on a dangerous expedition into a strange region of ominous domed hills. He is lured by a curiously engraved black stone which seems a survival from an elder prehuman race now hidden in those mysterious hills. Price points out parallel passages in the two stories: Where Machen asks, "What if the obscure and horrible race of the hills still survived? Where Machen mentions "strange shapes gathering fast amidst the reeds, beside the wash in the river," [18] Lovecraft tells of "certain odd stories of things found floating in some of the swollen rivers. But he even improves on Bierce in creating a shuddering background of horrorâ€”a vague, disquieting memory which makes one reluctant to use the faculty of recollection too vigorously. Bernal , which describes and suggests the feasibility of a similar device. The book was published in , just a year before Lovecraft wrote his story. It is stated that the electrons of these fungoid aliens possess a different vibrational frequency that would require the development of a novel technique by a chemist in order to record their image. Keller and the stories of Clark Ashton Smith. The story was adapted into comics and expanded upon in the first three issues of H. The third segment of the anthology film Necronomicon is loosely adapted from the story. Lovecraft Historical Society has produced a film version made like a s horror film, which premiered at the Seattle International Film Festival. Sandy Petersen , author of the Call of Cthulhu role-playing game, contributed financially to the film in order to finish its production.
