Chapter 1 : Medical Laboratory and Biomedical Science: Free eBook - Tietz Fundamentals of Clinical Chemistry

A condensed, student-friendly version of Tietz Textbook of Clinical Chemistry, this text uses a laboratory perspective to provide you with the chemistry fundamentals you need to work in a real-world, clinical lab.

Tietz, PhD Norbert W. Tietz is well known for his work on such classic texts as Fundamentals of Clinical Chemistry and the Textbook of Clinical Chemistry. He won multiple awards from AACC and other organizations. The following are the announcements for his AACC awards. The award is sponsored by Miles Inc. From 1965 to 1970 he was a research fellow at the University of Munich, where he published several papers on fat metabolism and lipases. Samuel Natelson, who kindled his interest in the emerging science of clinical chemistry. After a postdoctoral fellowship at the University of Chicago and a tenure as head of the clinical chemistry laboratories at Reid Memorial Hospital in Richmond, IN, Dr. Tietz has been involved in education throughout his career. In the late 1960s, he started the first M.S. program in clinical chemistry. This program was subsequently expanded into one of the first Ph.D. programs in clinical chemistry. He currently directs a postdoctoral program. Tietz continues to teach clinical chemistry to chemists, medical students, and medical technology students, and residents in pathology. In 1975 he organized the first seminar for applied gas chromatography in clinical chemistry, and in 1978 he organized and directed the first international conference on clinical enzymology in the United States. This conference was designed to promote national and international efforts to standardize enzyme methodologies throughout the world. The success of this seminar led to the widely expanded second International Symposium on Clinical Enzymology in 1980, which he also directed and organized. He has written scientific publications whose topics have included laboratory instrumentation, gas chromatography, clinical enzymology, acid-base balance, and gastric function. Recently, he has studied reference intervals in the aging population, particularly in nonagenarians and centenarians. Tietz is best known for Fundamentals of Clinical Chemistry. This textbook, now in its third edition, remains a primary information source for both students and educators in laboratory medicine. Fundamentals was the first modern textbook that integrated clinical chemistry with the basic sciences and pathophysiology; it has been translated into Spanish and Italian. Tietz also edited the Textbook of Clinical Chemistry, which bridges the gap between the clinical laboratory and medical management by relating pathophysiology to analytical results in health and disease. Tietz also edited the Clinical Guide to Laboratory Tests; this handbook contains data from the various laboratory disciplines for use by practicing physicians, paramedical personnel, and laboratorians. It has been published in English, Spanish, Italian, and Russian. Tietz also served as editor for the clinical chemistry sections of the Dictionary and Encyclopedia of Laboratory Medicine and Technology. Tietz has been active in the AACC since 1965 at both the local and national levels. He served on the executive committee of the Chicago Section for eight years and as its treasurer and chairman. At the national level, he served on the Committee on Education and the Committee on Standards and on the Study Groups for aspartate aminotransferase and alkaline phosphatase. He chaired the Nominating, Awards, and Enzyme Committees. Tietz was also a member of the IFCC expert panel on enzymes for five years. He remains a vocal advocate of clinical chemistry, exhorting clinical chemists to advance their profession by linking progress in laboratory medicine to the practice of medicine. This will be the sixth year that this award has been given. Tietz was born and educated in Germany, and received a doctorate in Natural Sciences from the Technical University of Stuttgart. During his years at the Chicago Medical School, Dr. Tietz has restructured the clinical chemistry portion of the course in clinical pathology for medical students. In the school of graduate and postdoctoral studies he established one of the first M.S. programs in clinical chemistry. He was also involved in the organization of a degree program for medical technologists in the School of Related Health Sciences. He directed the teaching programs for residents in clinical pathology and the continuing-education programs in clinical chemistry for employees at the Mount Sinai Hospital Medical Center. Earlier this year, Dr. Tietz is editor of and contributor to the text Fundamentals of Clinical Chemistry W. A forthcoming second edition includes foreign as well as American authors. He has coordinated and directed workshops: He has served on
