## Chapter 1 : Unicode Character 'EM DASH' (U+)

*Area. Aghaboe has an area of kmÂ² / 18, acres / square miles. Townlands. There are 66 townlands that we know about in Aghaboe. This represents % of all the area in Aghaboe.*

It is dedicated to St Canice. It is one of only three such medieval round towers in Ireland that can still be climbed to the top, the other two being Kildare Round Tower in Kildare Town and Devenish Round Tower in County Fermanagh. The Synod of Rathbreasail in , which first divided Ireland into territorial dioceses, included both Aghaboe and Kilkenny in the Diocese of Ossory , with the episcopal see at Kilkenny, the capital of the Kingdom of Ossory. Thus the abbey church became the cathedral. The erroneous belief that the see was originally at Aghaboe and later transferred to Kilkenny is traced by John Bradley to a 16th-century misinterpretation of a 13th-century property transfer. The substantial majority of the population, however, remained faithful to Roman Catholicism, despite the political and economic advantages of membership in the state church. The cathedral contains some 16th-century monuments. The architectural style of the cathedral is Early Gothic and is built of limestone. It is richly endowed with many stained glass windows, including the East window which is a replica of the original 13th-century window. The cathedral contains some of the finest 16th-century monuments in Ireland. The name of "Kilkenny" itself retains the anglicised version of the Irish Cill Chainnigh, which translates as "Church of Cainneach", or "Canice". This was in turn replaced by the current imposing medieval cathedral. The summit gives a clear view of Kilkenny and the countryside around. The hill on which the cathedral stands is believed to be the centre of the first major settlement at Kilkenny, and the round tower suggests an early ecclesiastical foundation. As stated elsewhere in the Red Book, Ledred wrote these verses "for the Vicars Choral of Kilkenny Cathedral, his priests and clerics, to be sung on great festivals and other occasions, that their throats and mouths, sanctified to God, might not be polluted with theatrical, indecent, and secular songs. The exterior walls, apart from the gables, are embattled , and there are two small spires at the west end. The cathedral is seventy-five yards long, and its width along the transepts is forty-one yards. Between the nave and each aisle is a row of five black marble clustered columns, with high moulded arches. The nave is lighted by a large west window and five clerestory windows, while the aisles each have four windows. The choir has a groined ceiling with fine tracery and a central group of cherubs. The cathedral contains some of the finest ancient monuments in Ireland, including one to Bishop David, and the tombs of many bishops of Ossory and several owners of Kilkenny Castle. In the north transept is the ancient Chair of St Kieran , made of carved stone, [4] still used as the chair of enthronement for the Church of Ireland Bishops of Cashel and Ossory. There are continental carvings on the choir stalls and the hammerbeam roof. The cathedral has many stained glass windows, including the fine East window, which is a replica of the 13th-century original. On the eastern side of the south transept is the consistory court , built by Bishop Pococke, with the chapter house to the north of it. In the Maurice Otway collection was loaned to Maynooth College for restoration and safe keeping; earlier some documents has been moved to Church of Ireland Representative Body house in Dublin.

## Chapter 2 : â€" | em dash (U+) @ Graphemica

*Get the complete details on Unicode character U+ on blog.quintoapp.com*

Guessing the version from your code is not possible. Whether you are using Python 3. X matters a lot. Following remarks assume Python 2. You already seem to have determined that you have UTF-8 encoded text. Note decode, NOT encode. Leaving some data as str objects and other as unicode is messy in Python 2. Please consider unit-testing functions as you write them; it makes debugging much faster later on. Note that latin1 and iso are the same encoding. As latin1 encodes the first codepoints in Unicode in the same order, then it is impossible to get UnicodeDecodeError raised by text. Update in response to this comment from OP: I use Python 2. If I use text. That can happen two ways: X tries to encode it using the default encoding latin-1??? Nobody knows what the question is yet! Please edit your question to show your code insert print repr text just before the text. Show the repr result and the full traceback so that we can determine which line is causing the error. What version of what operating system are you using? And to answer your last question, NO, you must NOT attempt to decode your text using every codec in the known universe. Just show us your code and its results.

## Chapter 3 : NY Daily News - We are currently unavailable in your region

*U 1, likes Â· 28 talking about this. U2 FANSEITE. Today in , third studio album 'War' becomes first UK No.1, knocking Michael Jackson's 'Thriller' off the top of the charts.*

## Chapter 4 : unicode - How to find right encoding in python? - Stack Overflow

*I am pulling data from the Facebook graph which has characters encoded like so: \u and \u Is there a function to convert those characters into HTML? i.e \u -> &mdash; If you have some further reading on these character codes), or suggested reading about unicode in general I would appreciate it.*

## Chapter 5 : St Canice's Cathedral - Wikipedia

*Edm/pol U SET. 25 likes. School. \*WELCOME TO \* I pray that all that Jesus died 4 be made manifest in your life, and let lines begins to fall in pleasant places for you all through the days of in Jesus name Amen.*

## Chapter 6 : Townlands in Aghaboe

*Rally at Hi Tor Animal Shelter to bring back Mike, James, Kelly and FIRE THE BOARD! - Duration: Hudson Valley Web TV 37 views. New.*

## Chapter 7 : How to parse unicode format (e.g. \uc, \u) using PHP - Stack Overflow

*\u C, C++, and Java \u Python \u Perl \x{} Ruby \u{} CSS \ Raw Unicode Data. Key Name Value; age AHex N: Alpha N: bc ON: Bidi_C N: Bidi.*

## Chapter 8 : List of townlands of County Laois - Wikipedia

*You have asked whether there is any constitutional or statutory impediment to a member of the General Assembly serving as a municipal court judge. For the reasons explained below, it is my opinion that a legislator may not simultaneously serve in the General Assembly and as a municipal court blog.quintoapp.compal Courts.*
