

Chapter 1 : French Canadian Maritimes & St. Lawrence Seaway - Victory - Great Lakes Cruise Co.

Victory Cruise Lines' Canada and St. Lawrence shore excursions are led by knowledgeable local guides and provide meaningful opportunities to uncover the rich history and fascinating cultures of unique cities like Toronto, Montreal, Quebec, Charlottetown, Halifax, Portland, and more.

Lawrence River and Gulf of St. Lawrence, despite its activities off the convoy assembly ports of Halifax and Sydney, Nova Scotia ; therefore, early attacks in the Battle of the St. Lawrence were considered ad-hoc and opportunistic. The first attack was by U , which torpedoed and sank the British freighter Nicoya at the mouth of the St. Lawrence River several kilometres off Anticosti Island on 12 May , followed by the Dutch freighter Leto in the same vicinity several hours later. U departed the Gulf of St. Lawrence to return to its established patrol in the North Atlantic. Lawrence River had been guarded by only four RCN warships, a Bangor-class minesweeper , two Fairmile Marine motor launches and an armed yacht ; a clearly inadequate force for the task. Lawrence were startled at the sight of maritime warfare off their shores, with ships on fire and explosions rattling their communities, while bodies and debris floated ashore. Blackouts were strictly enforced and army units were sent out on coastal patrols along roads and railway lines. On 6 July, within half an hour, he sank three ships from the twelve-ship convoy QS This attack drove the submarine to the bottom where it hid for 12 hours. The submarine then rushed out of the Gulf for repairs. Eastern Air Command positioned itself to better defend the remaining convoys by establishing a "Special Submarine Hunting Detachment" of No. Neither sank the U-boat. Aircraft continued to harry the submarine as it cruised the Gulf. Later the young airman would be awarded the Distinguished Flying Cross, in large part for his determined attack of the U-boat. Lawrence to be closed to all trans-Atlantic shipping, allowing only coastal trade. The embargo lasted until early Fall [edit] In September U attacked Convoy ON along with a number of other submarines and chased them across the Atlantic all the way to the gulf. The submarine was damaged but escaped the river. In November, U was ordered in but turned away because of oppressive Canadian patrols that prevented entry. U-boat losses experienced by the Kriegsmarine during following the entry of the United States Navy into the Battle of the Atlantic , coupled with declining German shipbuilding capability to replace battle losses, saw the U-boat fleet redeployed to the primary Atlantic convoy routes to disrupt the Allied war resupply effort; this effectively saw enemy submarines withdrawn from the St. Lawrence by the end of The correspondence detailed an escape plan in which the prisoners were to tunnel out of the camp and make their way using currency and false documents provided for them through eastern Ontario and across Quebec to the northeastern tip of New Brunswick off the Pointe de Maisonnette lighthouse where the escapees would be retrieved by a U-boat. Canadian authorities did not tip off the POWs and detected signs of tunnel digging at Camp All prisoners except one were arrested at the time of their escape attempt; the sole inmate who managed to escape travelled all the way to Pointe de Maisonnette undetected, likely travelling onboard Canadian National Railway passenger trains to the Bathurst area. The task force led by Rimouski waited in Caraquet Harbour, obscured by Caraquet Island , the night of 26â€”27 September and detected the presence of U off Pointe de Maisonnette while shore authorities arrested the POW escapee. U managed to elude the RCN task force by diving just as the surface warships began attacking with depth charges; the submarine was able to escape the Gulf of St. Lawrence without making the extraction. By early , the shipping lanes in the Gulf of St. Lawrence River were reopened to domestic and war-related convoys operating primarily from Quebec City to Sydney. Late saw a resurgence of U-boat activity in the St. German submarines were being equipped with the snorkel , a telescopic engine ventilation system that permitted continuous underwater operation without surfacing. U entered the Gulf of St. Fog and other weather conditions in the St. Lawrence also conspired to hamper RCAF patrols. Order of battle[edit].

Chapter 2 : St. Lawrence & Jewels of French Canada - Victory - Great Lakes Cruise Co.

The St. Lawrence Victory was a US Maritime Administration armed cargo ship, named for St. Lawrence University in St. Lawrence County, New York as one of educational institutions which had Victory ships named after them.

Natural wonders include whale watching off Tadoussac, and the splendor of Niagara Falls. Once aboard, enjoy the welcoming hospitality and personalized attention of our friendly and professional onboard staff. Settle into your stateroom before joining your fellow guests for dinner with free flowing house wines and cocktails. Enjoy convivial conversation with your fellow passengers or join an engaging discussion with our shipboard experts, well-versed in the history, peoples, and natural wonders of the Great Lakes region. Elegant dining in two distinctive venues with free-flowing house wine, beer, and spirits enhance your day. In the morning, coaches leave the port and follow the historic trail walked by delegates to the conference that led to the Confederation of Canada. Visit the charming city center before returning to the ship for an exceptional dinner overlooking the sea. Scenic Sailing of the Gulf of St. Lawrence Serving as a partial boundary between the U. Lawrence River is an important route for trade and travel. The river spans miles and widens significantly near Quebec City to become the St. Lawrence River meets the outflow of the Saguenay River, is one of the most exciting whale-watching sites in the world. Between May and October, up to 13 species of cetaceans make their way upriver from the Atlantic Ocean, to become temporary residents in the salty rich waters of the St. These sea mammals include blue whales, the largest animals on the planet, and the impressive humpbacks, which swim up into the mouth of the Saguenay Fjord near Tadoussac to feed. Coaches depart for the Plains of Abraham where the battle between invading English and French defenders took place as the English stormed the upper city and captured the town. Onward to Place Royale in the lower-town, which was bombarded in from across the river, as fire ships were dispatched towards the port. In the afternoon, guests are encouraged to stroll on their own out the port to visit the Petit Champlain and take the funicular railway to the Chateau Frontenac and its magnificent Dufferin Terrace. Situated on the St. Lawrence River, it remains an important crossroads for shipping by land and sea, with a rich history of Iroquois, colonial, and cosmopolitan settlements. Chapter 3 : Battle of the St. Lawrence - Wikipedia

Victory Cruise Lines is your first choice for immersive and all-inclusive coastal cruising. Our shore excursions are led by knowledgeable local guides and provide meaningful opportunities to uncover the rich history and fascinating cultures of the destinations you visit.

After the war, it served as a relief ship delivering supplies to Europe under the Marshall Plan. Damaged by a sea mine in , it was salvaged by Yugoslavia then changed hands several times in private use before it was scrapped in . Early history The SS St. Lawrence University in St. Lawrence County, New York as one of educational institutions which had Victory ships named after them. The ship was operated by the Agwilines Inc. In contrast, Victory ships were built to last longer and serve the US Navy after the war. The Victory ship differed from a Liberty ship in that they were faster, longer, wider, taller, and had a thinner stack set farther toward the superstructure and a long raised forecastle. Missions The first mission of the St. Lawrence Victory was to deliver bombs to Saipan for the Pacific War. Loaded with her maximum weight of 10, tons of explosive material , the ship traversed the Pacific Ocean to Saipan, traveling in a zig-zag motion to elude Japanese submarines ; the ship journeyed under radio silence and without running lights at night. After delivering her cargo, she proceeded to Seattle , arriving in July . On August 27 of that year, the St. Lawrence Victory joined Task Group . Lawrence Victory served as a relief ship as part of the Marshall Plan , carrying supplies to war-torn European nations. Afterwards, she was claimed by Yugoslavia as a marine salvage ship, eventually repaired and put into private use as a passenger ship. The Hrvatska was managed by Dabinovic S. Later in , the ship was sold to Cia. In it was sold to Soc. Lawrence Victory was sold once more in to Soc.

Chapter 4 : Victory in the St. Lawrence: The Unknown U-Boat War by James W. Essex

Victory in the St. Lawrence tells the riveting true story of how shortsighted government priorities and advanced German submarine technology allowed the Nazis to.

Choose your cabin Immerse yourself in the historic gems of French Canada while navigating the mile Saint Lawrence Seaway. Chapter 5 : Victory - Great Lakes Cruise Co.

Victory Cruise Lines' Canadian Fall Foliage cruise surveys through the scenic St. Lawrence Seaway to the historical Canadian ports.

The top-seeded Saints overall will face No. Dede hit a good ball in and I was able to climb up. I knew I headed down, which is always a good thing. It feels awesome because it was a tough game, we battled the whole game. It was a really good game, a lot of fun. The Saints and Bombers played to a scoreless tie in Canton on Sept. SLU held a shots edge in that game. SLU was just 4 minutes and 34 seconds away from possibly facing penalty kicks deciding the game before Dorney ended it. Crouse crashed into Hobart goalie Alec Kaminer. The Saints played the final five minutes of regulation, and all 16 minutes of overtime, a man down after the red card. That is what helped us get over the edge today, especially when we were down to 10 men. I felt bad for Ryan Crouse with the red card. I think the conditions brought him into the keeper a little bit, so it was unfortunate. The referee did a good job as well. It was a red, but it was unfortunate. Hobart had a chance to extend the lead to but a good scoring chance from Nate Cary in the 36th minute went just over the top of the bar. SLU tied the game in the 40th minute when Brendan McNamee scored off a free kick from Dede on a shot that was about eight yards away from the goal. The Saints took a lead in the 52nd minute on a goal from Charlton Kelly with Aidan Callahan assisting. Kelly took a shot to the high corner of the net. SLU outshot the Statesmen in the first half, but Hobart held a advantage in the second half. Jack Fell assisted on the goal. We wanted to win it in regular time because anything can happen in penalty kicks. Last week we played them and it was a good game. It was the same type of game. They are a good team and we knew that. We knew they were going to come out hard. When responding to issues raised by other commenters, do not engage in personal attacks or name-calling.

Chapter 6 : Victory Bible Church Massachusetts St Lawrence, KS Religious Organizations - MapQuest

Scenic Sailing of St. Lawrence River Delight in this day of cruising aboard the M/V Victory II as we navigate the St. Lawrence River. The spectacular coastline offers unrivaled natural beauties: dramatic cliffs, colorful foliage, historic cityscapes, vibrant with birds and marine life.

Cover prepared on an Archive Quality Envelope without gum on flap. This ship served in the Pacific, delivering special bombs to Saipan in July The proud ship was one of the two civilian cargo ships that were in Tokyo Bay, during the Surrender Ceremony of Japan on September 2, That country claimed her as a marine salvage and did not return her to the US. However, she was repaired and served under several international owners until scrapped in Photo by George Barber. Check out my other items! Chapter 7 : SS St. Lawrence Victory | Revolv

m.v. Victory II - 12 nights departing 14th August - From \$4,pp Immerse yourself in the historic gems of French Canada while navigating the 1, mile St Lawrence Seaway system with small ship operator Victory Cruise Lines.

Both ships were built in resemblance to the traditional US coastal steamboats of the late 19th century. The company specializes in marine shipping, cruise shipping, and also car and passenger ferries. The vessel was operated under charter by Haimark Line " specializing in small ship expedition cruise touring. Before entering service for Haimark, the vessel was extensively refurbished in Charleston SC. Before the launch, Haimark Line invested USD 3,5 million for an extensive drydock refurbishment of all interior spaces. Then the ship was renamed from "Cape May Light". The number of injured was Booked travelers who have previously obtained a refund from their travel insurance or credit card issuer were not eligible. The ship also operates regular cruises to Cuba leaving round-trip from Miami Florida. In October , Victory Cruise Lines announced the inaugural Cuba cruise season will offer to night island circumnavigation itineraries starting in March The inaugural Cuba cruise departed from Miami on April 20, All-inclusive fares for night itineraries started at USD 6, pp included early-booking discount. Select departures had overnight hotel or air credit of USD pp. Each voyage features educational activities interactions with Cuban artists, musicians, naturalists, entrepreneurs. Outside staterooms include armoires and picture windows for panoramic views. Expertly guided shore excursions are included. Learn Aboard shipboard enrichment program is hosted by experts in culture, history and natural wonders of the places visited. Victory Cruise Lines deals Follows the list of onboard amenities and services offered complimentary to all passengers cruise price inclusive regardless of cabin grades: MS Victory I wiki Total number of cabins: Main dining room Restaurants and food bars: Soon after the collision accident June 18, , Haimark Line filed for bankruptcy. The inaugural cruise was scheduled for July 8. Also were announced further plans for Florida to Cuba cruise itineraries. On board were hosted ship tours for travel agents and sales seminar. The repositioning cruise back to Canada was scheduled for May 5. January through April were scheduled night roundtrip Miami to Cuba cruises.

Chapter 8 : MS Victory I - Itinerary Schedule, Current Position | CruiseMapper

The SS St. Lawrence Victory was a Victory-class cargo ship built during World War II under the Emergency Shipbuilding program. The St. Lawrence Victory (MCV), was a type VC2-S-AP2 Victory ship built by Permanente Metals Corporation, Yard 2, of Richmond, California.

Victory ship – The Victory ship was a class of cargo ship produced in large numbers by North American shipyards during World War II to replace losses caused by German submarines. A total of Victory ships were built, one of the first acts of the United States War Shipping Administration upon its formation in February was to commission the design of what came to be known as the Victory class. The design was an enhancement of the Liberty ship, which had successfully produced in extraordinary numbers. Victory ships were larger than Liberty ships, 14 feet longer at feet, 6 feet wider at 62 ft. Displacement was up just under 1, tons, to 15,, with a raised forecastle and a more sophisticated hull shape to help achieve the higher speed, they had a quite different appearance from Liberty ships. To make them vulnerable to U-boat attacks, Victory ships made 15 to 17 knots, 4 to 6 knots faster than the Libertys. The extra speed was achieved through more modern, efficient engines, most used steam turbines, which had been in short supply earlier in the war and reserved for warships. All were oil-fired, but for a handful of Canadian vessels completed with both coal bunkers and oil tanks, another improvement was electrically powered auxiliary equipment, rather than steam-driven machinery. To prevent the hull fractures that a few Liberty ships developed and these were manned by United States Navy Armed Guard personnel. The VC2-S-AP5 Haskell-class attack transports were armed with the 5-inch stern gun, one quad 40 mm Bofors cannon, four dual 40 mm Bofors cannon, the Haskells were operated and crewed exclusively by U. The Victory ship was noted for good proportion of cubic between holds for a ship of its day. A Victory ships cargo hold one, two and five hatches are a single rigged with a capacity of 70,, 76,, and 69, bale cubic feet respectively. Victory ships hold three and four hatches are double rigged with a capacity of , and , bale cubic feet respectively. Victory ship have built in mast, booms and derrick cranes, the first vessel was SS United Victory launched at Oregon Shipbuilding Corporation on 12 January and completed on 28 February , making her maiden voyage a month later. American vessels frequently had a name incorporating the word Victory, the British and Canadians used Fort and Park respectively. Although initial deliveries were slow – only 15 had been delivered by May – by the end of the war had been constructed, because the Atlantic battle had been won by the time that the first of the Victory ships appeared none were sunk by U-boats. A total of 97 Victory ships were converted to carry up to 1, soldiers 2. Steam turbine – A steam turbine is a device that extracts thermal energy from pressurized steam and uses it to do mechanical work on a rotating output shaft. Its modern manifestation was invented by Sir Charles Parsons in , in , Taqi al-Din in Ottoman Egypt described a steam turbine with the practical application of rotating a spit. The devices described by Taqi al-Din and Wilkins are today known as steam jacks, in an impulse steam turbine driven car was designed by Ferdinand Verbiest. A more modern version of car was produced some time in the late 18th century by an unknown German mechanic. The modern steam turbine was invented in by Sir Charles Parsons, the invention of Parsons steam turbine made cheap and plentiful electricity possible and revolutionized marine transport and naval warfare. Parsons design was a reaction type and his patent was licensed and the turbine scaled-up shortly after by an American, George Westinghouse. The Parsons turbine also turned out to be easy to scale up. Parsons had the satisfaction of seeing his invention adopted for all major world power stations, a number of other variations of turbines have been developed that work effectively with steam. The de Laval turbine accelerated the steam to full speed before running it against a turbine blade, De Laval's impulse turbine is simpler, less expensive and does not need to be pressure-proof. It can operate with any pressure of steam, but is less efficient. It was used in John Brown-engined merchant ships and warships, including liners, the present-day manufacturing industry for steam turbines is dominated by Chinese power equipment makers. There are several classifications for modern steam turbines, Turbine blades are of two basic types, blades and nozzles. Blades move entirely due to the impact of steam on them and this results in a steam velocity drop and essentially no pressure drop as steam moves through the blades. A turbine composed

of alternating with fixed nozzles is called an impulse turbine, Curtis turbine, Rateau turbine 3. The base ring mount, which improved the rate of fire, entered service on USS Gridley. Even this advanced system required nearly rounds of ammunition expenditure per aircraft kill, however, the planes were normally killed by shell fragments and not direct hits, barrage fire was used, with many guns firing in the air at the same time. Base ring mounts with integral hoists had a rate of fire of 15 rounds per minute per barrel, however. On pedestal and other mounts lacking integral hoists, 12 to 15 rounds per minute was the rate of fire, useful life expectancy was effective full charges per barrel. It was backfitted to many of the World War I-era battleships during their wartime refits and it has left active US Navy service, but it is still on mothballed ships of the United States Navy reserve fleets. The gun assembly shown is used in single mounts, and it is the gun in twin mounts. It is loaded from the left side, the left gun in twin mounts is the mirror image of the right gun, and it is loaded from the right side. The Mk12 gun assembly weighs 3, lb, the major Mk12 Gun Assembly characteristics are, Semi-automatic During recoil, some of the recoil energy is stored in the counter-recoil system. That stored energy is used during counter-recoil to prepare the gun for the next round, the firing pin is cocked, the breech is opened, the spent powder case is ejected, and the bore is air cleaned. Hand loaded A Projectile-Man and a Powder-Man are stationed at each gun assembly and their job is to move the round, consisting of a projectile and a powder case, from the hoists to the rammer tray, and then start the ram cycle. The hydraulically driven Rammer Spade, called the Power Spade in that picture, is at the back of the Rammer Tray, if the multiple names of the Spade is confusing, look at this footnote. Vertical sliding-wedge breech block The breech block closes the chamber behind the powder case and it also holds the firing pin assembly 4. Different guns of this caliber were used by the U. Coast Guard from through the s on a variety of combatant and transport ship classes. Low-angle mountings for this gun had a range of yards at the elevation of 15 degrees. The gun entered service around with the Bainbridge-class destroyers, and was fitted to Connecticut-class battleships. These guns fired the same 2, feet per second used by the following dual-purpose Marks. Maximum range was 14, yards at 45 degrees elevation, useful life expectancy was effective full charges per barrel. The small gun was chosen to remove the temptation to engage enemy vessels on the surface. The gun was mounted aft of the conning tower to reduce submerged drag. Oerlikon 20 mm cannon " The Oerlikon 20 mm cannon is a series of autocannons, based on an original German 20 mm Becker design that appeared very early in World War I. It was widely produced by Oerlikon Contraves and others, with various models employed by both Allied and Axis forces during World War II, and many still in use today. During World War I, the German Reinhold Becker developed a 20 mm caliber cannon and this used a 20x70 RB cartridge and had a cyclic rate of fire of rpm. Because the Treaty of Versailles banned further production of weapons in Germany. In the Oerlikon S was added to the product line. The purpose of development was to improve the performance of the gun as an anti-tank and anti-aircraft weapon. An improved version known as the 1S followed in , three sizes of gun with their different ammunition and barrel length, but very similar mechanisms, continued to be developed in parallel. In Oerlikon reconsidered the application of its gun in aircraft and introduced the AF and AL, designed to be used in flexible mounts, the round box magazine used by earlier versions of the gun was replaced by drum magazine holding 15 or 30 rounds. Apart from changes to the design of the guns for wing-mounting and remote control, for the FF series drum sizes of 45,60,75 and rounds were available, but most users chose the round drum. The s were a period of global re-armament, and a number of foreign firms took licenses for the Oerlikon family of aircraft cannon 6. Cargo ship " A cargo ship or freighter is any sort of ship or vessel that carries cargo, goods, and materials from one port to another. Thousands of cargo carriers ply the worlds seas and oceans each year, cargo ships are usually specially designed for the task, often being equipped with cranes and other mechanisms to load and unload, and come in all sizes. Tankers carry petroleum products or other liquid cargo, dry bulk carriers carry coal, grain, ore and other similar products in loose form. Multi-purpose vessels, as the name suggests, carry different classes of cargo " e. Specialized types of cargo vessels include ships and bulk carriers. Cargo ships fall into two categories that reflect the services they offer to industry, liner and tramp services. Those on a published schedule and fixed tariff rates are cargo liners. Tramp ships do not have fixed schedules, users charter them to haul loads. Generally, the shipping companies and private individuals operate tramp ships. Cargo liners run on fixed schedules published by the shipping companies,

each trip a liner takes is called a voyage. However, some cargo liners may carry passengers also, a cargo liner that carries 12 or more passengers is called a combination or passenger-cum-cargo line. The desire to trade routes over longer distances, and throughout more seasons of the year. Before the middle of the 19th century, the incidence of piracy resulted in most cargo ships being armed, sometimes heavily, as in the case of the Manila galleons. They were also escorted by warships. Piracy is still common in some waters, particularly in the Malacca Straits. In , the governments of three nations agreed to provide better protection for the ships passing through the Straits. The waters off Somalia and Nigeria are also prone to piracy, while smaller vessels are also in danger along parts of the South American, Southeast Asian coasts, the words cargo and freight have become interchangeable in casual usage 7. As of the U. Census, the population is at , The largest, Richmond, Virginia, is the namesake of the California city, the Ohlone Indians were the first inhabitants of the Richmond area, settling an estimated 5, years ago. The name Richmond appears to predate actual incorporation by more than fifty years, the Atchison, Topeka and Santa Fe Railroad had its terminus at Richmond. The first post office opened in , Richmond was founded and incorporated in , carved out of Rancho San Pablo, from which the nearby town of San Pablo inherited its name. Until the enactment of prohibition in , the city had the largest winery in the world, in the s the Ku Klux Klan was active in the city. The old Ford plant has been a National Historic Place since , the city was a small town at that time, until the onset of World War II which brought on a rush of migrants and a boom in the industrial sector. Standard Oil set up here in , including a what is now the Chevron Richmond Refinery and tank farm. Many of these lived in specially constructed houses scattered throughout the San Francisco Bay Area, including Richmond, Berkeley. A specially built rail line, the Shipyard Railway, transported workers to the shipyards, kaisers Richmond shipyards built Victory and Liberty ships for the war effort, more than any other site in the U. The city broke many records and even built one Liberty ship in a five days. On average the yards could build a ship in thirty days, the medical system established for the shipyard workers at the Richmond Field Hospital eventually became todays Kaiser Permanente HMO. It remained in operation until when it was replaced by the modern Richmond Medical Center hospital, Point Richmond was originally the commercial hub of the city, but a new downtown arose in the center of the city. It was populated by many department stores such as Kress, J. Penney, Sears, Macys, during the war the population increased dramatically and peaked at around , by the end of the war. Once the war ended the workers were no longer needed 8. The Phayap Army sent troops to invade and occupy northeastern Burma, also involved were the Japanese puppet states of Manchukuo and Mengjiang, and the collaborationist Wang Jingwei regime. The official policy of the U. Government is that Thailand was not an ally of the Axis, Japan conscripted many soldiers from its colonies of Korea and Formosa. The German and the Italian navies operated submarines and raiding ships in the Indian, the Italians had access to concession territory naval bases in China, while the Germans did not. After Japans attack on Pearl Harbor and the subsequent declarations of war, mexico, Free France and many other countries also took part, especially forces from other British colonies.

Chapter 9 : SS St. Lawrence Victory - Wikipedia

DAY 2 Sailing the St. Lawrence Seaway, 1, Islands & Lake Ontario Today we'll cruise the St. Lawrence Seaway to the 1, Islands corridor, an archipelago of nearly 1, islands, then on to Lake Ontario, the smallest in the chain of Great Lakes, where a favorable microclimate supports a major fruit and wine growing region.

Mary had declared war on France, 7 June. The French forces under Constable Anne de Montmorency were overwhelmed, and Montmorency was captured by the forces under the command of the Duke Emmanuel Philibert of Savoy and the Count of Egmont in an alliance with English troops, and the French were defeated. Quentin, "the sight of the battlefield gave Philip a permanent distaste for war"; [12] he declined to pursue his advantage, withdrawing to the Spanish Netherlands to the north, [1] where he had been the Governor since the Treaty of Cateau-Cambresis ended the war two years later. Known as El Escorial, it was finally completed in 1564. Duke Emmanuel Philibert of Savoy, having won the victory, had also secured a place at the conference table when the terms of peace were deliberated, resulting in the Treaty of Cateau-Cambresis. The duke was able to secure the independence of the Duchy of Savoy, which had been occupied by the French a generation earlier. The Duke of Savoy moved his capital across the Alps to Turin two years later, making Savoy an Italian state and refounding the dynasty of the House of Savoy, which would become the royal house of a united Italy in 1701. A History of the Habsburg Empire Taylor and Francis, Renaissance France at War: Armies, Culture and Society, C. Bonner, The Scottish Soldier Abroad, ed. The Age of Wars of Religion, Vicente y Lavajos, p. Kamen claims that the battle was "won by a mainly Netherlandish army commanded by the non-Spaniards the duke of Savoy and the earl of Egmont". On the other hand, Geoffrey Parker states that Spanish troops were decisive in defeating the French at St. August und bei Gravelingen Juli, Historische Studien vol. Reprint, Kraus Reprint Vaduz.
