Fenno The battle narrative of the Iliad includes several obscure references to the war being stretched out equally e. This vague expression, as scholars have recognized, suggests the extension of a figurative rope, though its exact meaning has eluded interpretation. Accordingly, in this paper I shall discuss those passages in which the fighting is tightened in equal portions, exploring the development of this and related imagery for ropes, stretching, and measuring in the Iliad. Symbolic surveying of the battlefield is typically accomplished by Zeus, though occasionally others also pull on the figurative rope, competing for control of this authoritative device. Notched measuring rods and knotted ropes are well attested as early as the Bronze Age in Mesopotamia and Egypt, where they are held by gods and kings as emblematic symbols of justice or authority. Frankfort , 4, 12, 21, For evidence about surveying instruments in ancient Greece, see Lewis , 5, 19; Kiely , 18 For example, when Zeus threatens to throw other Olympians into Tartarus, challenging them to a kind of cosmic tug-of-war with a golden rope, he observes, as a measure of his superiority, that the distance between heaven and earth is equal to that between Hades and Tartarus II. Though the exact significance of this golden cord has baffled interpreters, who since antiquity have treated it allegorically, I would observe that it conveniently serves as a measuring device by which Zeus effectively determines the equally divided dimensions of the cosmos and asserts his mastery over all. I shall proceed by interpreting the relevant passages in narrative order: I shall focus on the meaning of particular words in the Homeric texts: These passages lead to discussion of Homeric instruments which involve cords: The device accords well with early Greek conceptions of justice: Indo-European Language and Society. Cambridge Scholars Publishing Format Available: The main subject of the first part is an exploration of how a catalogue is organized internally. A number of structural patterns formed since Homer on the basis of the position the names held within the catalogue continued down to the period of Lucretius, Virgil and Ovid. Each pattern carries its own dynamism in the text and has its particular effects in the reading process. Particularly when the poetic work evolves in time, the fluctuation of the density in names per verse entails a corresponding fluctuation of the narrative tempo. On occasion, the reader may also recognize in the structure of the catalogue a visual parallel to the situation described. The widely-applied mirroring finds its place in the poetic catalogues of the period and can be distinguished in three major categories: In Ovid, the technique becomes particularly sophisticated. The second part deals with the relation of the catalogue to its surrounding text. In this respect, catalogue-markers and the way a catalogue is introduced or completed are issues which are discussed in this part of the work, as they can be indicative of the way the poet views the contents of a catalogue. What becomes evident here is that the usual catalogue-markers are the products of the notion that whoever or whatever is included in a catalogue is listed there as an individual entity, even if some of its characteristics are neutralized. This proves to be true in Virgil where the items of a catalogue retain their value whereas frame and content function in support of each other. This also occurs in the greater part of the epic tradition. Before Virgil, however, in Lucretius, the frame was often the means of subverting the traditional function of a catalogue, since it usually called into question the very existence of the beings named, or undermined their value. On some occasions, a Virgilian catalogue does not close with a verbal frame but with a pause. This mode of closure proves to be the strongest boundary between a catalogue and the continuation of the narrative. On other occasions, a simile is used at the end of a catalogue. Things change in the Ovidian *Metamorphoses*. Ovid makes extensive use of various poetic techniques and devices which he draws from the tradition in general and Virgil in particular. In doing so, however, he often challenges their significance and forms catalogues that give the impression of delaying, by protracting the oncoming narrative. Everything in the *Metamorphoses* is in a continuous state of flux and the catalogue, too, has to adapt accordingly by acquiring new characteristics with novel values. Find Your eBooks Here!

The spine of Vol II is very faded; there are neat unobtrusive, but extensive, light pencilled notes on pages of the Greek text in f Vol I. A soundly bound and tidy set. The two books together are quite heavy, so additional shipping may be asked for some destinations outside the UK.
