The Volkswagen Lupo, a small city car, was introduced in and produced until by German automaker Volkswagen. Lupo was a badge-engineered version of the SEAT Arosa. Initially, it was only available in two trim variants, the budget E trim and the upgraded S trim.

This repair manual will help you to perform all the main maintenance and repair work correctly and efficiently. It should be consulted regularly by workshop personnel as an addition to the practical and theoretical knowledge obtained in Training School courses. It is a contribution towards achieving even higher Service quality. Proper service and repair is important to the safe, reliable operation of all motor vehicles or driving axles whether they be front or rear. The service procedures recommended and described in this service manual are effective methods for performing service operations. Some of these service operations require the use of tools specially designed for the purpose. The special tool should be used when and as recommended. It is impossible to know, evaluate and advise the service trade of all conceivable ways in which service might be done or of the possible hazardous consequences of each way. Accordingly, anyone who uses a service procedure or tool which is not recommended must first satisfy himself thoroughly that neither his safety or vehicle safety will be jeopardized by the service methods he selects. Precautions It is necessary to take extra care when working on the electrical system to avoid damage to semi-conductor devices diodes and transistors and to avoid the risk of personal injury. Components such as the alternator or any other having semi-conductor circuitry could be irreparably damaged. This also applies when connecting a battery charger.
