

Chapter 1 : Past accolades | University of Michigan School of Nursing

Nursing informatics for nurse educators / Cheryl D. Parker, PhD, MSN, RN Informatics across the curriculum / Barbara Ihrke, PhD, RN Staff development and employee training / Barb Schreiner, PhD, RN, CDE, BC-ADM.

The focus of the event was to develop a proposal for the redevelopment of an abandoned automobile plant in Detroit by infusing arts, community, sustainability, and economic development. The non-profit organization works to improve the primary care delivery system with a focus on the patient-centered medical home model. Members include health care providers, corporations, government agencies and academic institutions. Pardee will serve a three year term. An Update for the Advanced Practice Nurse. The article was published in the June issue of the Journal of Neuroscience Nursing. The award will be presented to Dr. His TEP panel will focus on the development, implementation, and maintenance of quality measures for the Program of All-Inclusive Care for the Elderly. Panel members are selected based on their personal experience and training. Ochylski says the program aligns with his professional goal of contributing as a nurse leader within programs of national importance to strengthen the U. He was inspired to apply for the program after listening to guest lecturer Dr. The award is given to students who have achieved candidacy and it is generally awarded to students who are in the writing stage of their dissertation as a means of speeding up the process of completion. Evans Lectureship from the American Urological Association. The committee works to prioritize clinical trial concepts and key strategies related to cancer, cancer treatment and quality of life for patients. He was selected as one of seven students for the committee out of more than applications. Ochylski and the other committee members are expected to serve a one-year term, promote AACN advocacy messages, and help lead grassroots strategies. The members will have the opportunity for first-hand experience in navigating the policy process and to become highly skilled advocates on behalf of patients and the nursing profession. Strobbe will serve as president-elect for two years and then become president for an additional two years. Strobbe has previously served on the board of IntNSA. Candidates require the sponsorship of two current fellows and are reviewed by a panel of fellows for evidence of significant contributions to nursing and health care. After induction, the new fellows will be able to use FAAN credentials. Best-in-Track sessions will be recognized during the conference on Oct. It is the first time a woman and a nurse has been elected to this five-member board. Selection for inclusion included peer recognition, continued practice and teaching of advanced level courses. The membership was recorded on her permanent transcript Phi Kappa Phi is one of only three Honor Societies that the University of Michigan recognizes in this way. Congratulations to our students and faculty! The prestigious grant, established in , was created to support the development of nursing faculty and address the needs of future patients. Kearfott practices at Pediatric Specialists of Bloomfield Hills. In addition, she and other pediatric faculty members are developing a project focused on measuring empathy levels of nursing students caring for families with a chronically ill child. The program is designed to support doctoral nursing students, establish new educational tracks to develop nurse leadership skills and help nurse leaders prepare future nurses to meet the demands of the global health care system. Ochylski is currently working on a scholarly project focused on health workforce educational programs and nursing leadership. In the first quarter of , our BSNs achieved a The majority of UMSN students taking the exam this quarter were from the first cohort of our updated Second Career Program; they achieved a remarkable Articles are reviewed by AORN journal editors, review panel members and editorial board members. The award is in honor of U-M alumni Raoul Wallenberg, who is credited with saving thousands of Jews during the Holocaust. Before his disappearance, Wallenberg said travel helped him understand the human condition and his concern for human dignity and humanitarian values. Recipients of this highly selective award are given funds to use for a service project anywhere in the world. Oh will be travelling to Tagbilaran City, Philippines, to provide basic health education at a local elementary school. She will cover topics such as personal hygiene, infectious diseases, non-infectious diseases, sexual education and healthy lifestyle choices. She plans to test whether the

involvement of associate providers, such as nurses, pharmacists, social workers, dieticians, in care delivery is associated with medical home implementation, access to care, and healthcare utilization. Moriarty will represent Region IV, which covers 7 states, and she will serve as a liaison between the region and the Board of Directors. ACNM is a professional organization that aims to advance the health of women and newborns through midwifery excellence. The organization also works to lead the profession through education, clinical practice, research, and advocacy. The title is granted to individuals who demonstrate a long-standing commitment to the welfare of adolescents and a willingness to advocate on their behalf at a local, regional, national or international level. Yeh plans to use the findings to develop interventions to improve episodic memory or slow decline of episodic memory by improving sleep. Her mentor is Dr. The professional organization is dedicated to hearing loss prevention through developing industry standards and in regulatory, educational and legislative activity. NHCA members include audiologists, physicians, occupational health nurses, engineers, and equipment manufacturers, among others. The award is given to people or organizations that have formed outstanding collaborative partnerships to significantly move comprehensive cancer control activities forward in Michigan. It is given to an individual who has played a significant role in the treatment and recovery of drug-dependent individuals, particularly women. Boyd has spent more than a decade studying the misuse and abuse of controlled medications by adolescents and young adults, in addition to her life-long focus on alcohol and drug abuse and recovery in women. The two-year award will be utilized for the academic years. During the year-long immersion program, Dr. Kalisch will be taking a prominent role in national health policy development. She is also expected to develop or actively participate in a policy-oriented paper related to an IOM study. Everett is executive vice president and chief nurse executive at Indiana University Health and associate dean for clinical affairs at the Indiana University School of Nursing in Indianapolis. The NLN selects the recipient of this award based significant contributions to advancing the health of the nation through excellence in nursing education and practice. The NLN cites Dr. The award is given to a nurse researcher whose work demonstrates a long program of scientific contributions that advances the understanding of human health and health care. The recipient must be within first 10 years of completing their Ph. TAGs are comprised of prominent, international experts to provide guidance and expertise to the WHO on dedicated topics. The eHealth TAG is a newly formed group focusing on information and communication technologies for health. Abbott says the appointment is a great honor for her personally and an opportunity to include nursing in an international dialogue dedicated to bettering and strengthening the use of health information technology in health and healthcare. Congratulations to the students and to the faculty who provide an excellent education for UMSN undergraduates! Certification contributes to positive patient, nurse, and healthcare system outcomes. This award recognizes exemplary effort in the field of community service, innovation in midwifery practice, education, or research. The ACMN also cites her position as executive director for Doulas Care, which provides low-cost or free services to pregnant women. Fellows are selected for their leadership in education, management, practice and research. Bridges will use the fellowship to pursue her interest in palliative care from a systems perspective. Working under the mentorship of Dr. Ellen Smith and Dr. Anne Sales, she plans to investigate the influence of symptom management systems on cancer-related neuropathic pain outcomes, and hopes to parlay that investigation into systems interventions that will improve the quality of life for individuals with cancer. Her goal is to gain a better understanding of effective interventions to mitigate the number of incidences. Associate Professor Kristy K. It works to advance NP education through improved resources, scholarship and policy. In addition, Burns will conduct a community-based health education project organizing focus groups of African American early adolescent males to find out if using technology such as smart phone apps is a feasible project to strengthen communication about sex between father and son. Weiss is interested in learning more about how care giving can create stress and have a negative impact on health. She hopes to utilize that information to create interventions aimed at improving the quality of life for caregivers. The scholarship will be used for the academic year. Fellows meet monthly for seminars, interactive learning and leadership development related to public policy issues. Fellows also

participate in two national meetings, the Leadership Forum and the Washington Policy Seminar. Kuzma will enter the program in September. She says her goals are to learn more about policy development and advocacy, network with professionals from a variety of arenas and similar interests, and to further develop her leadership skills. It is one of four newly created member advisory boards to advise PCORI on funding, prioritizing, evaluating, and disseminating research. More than a thousand people applied for a position on one of the boards. Members include health care professionals, scientists, patients, and caregivers. Patient-centered care, and how systems need to change to achieve it, has the potential to transform American health care. The objective is to improve patient satisfaction and decrease Emergency Department visits. Awardees receive a pin, a Making a Difference certificate and are invited to a special awards reception. Laura Gultekin, a Ph.D. Gultekin plans to use a qualitative, narrative approach to interview mothers in Detroit who are seeking emergency housing assistance. In addition, the RAAPS screen tool is used to electronically capture and store data in a consistent manner to ease administrative duties for health professionals. Miyeon Jung, a Ph.D. The research aims to improve attention function by using a theory-based natural restorative environment intervention. Jung says she hopes it will help patients increase their attention and improve self-care, while also reducing re-hospitalization and mortality. The organization works to advance occupational health nursing through continuing education, advocating for improved state legislation and regulations, and promoting the health and safety of workers. As president, her goal will be to increase the responsiveness of the organization to the needs of members. Recipients must have a strong academic record, be making good progress toward the degree, and demonstrate outstanding academic and professional promise. Her research interests include how cognitive impairment affects health behavior and self-care management in patients with heart failure, as well as strategies to improve cognitive impairment.

AJN Book of the Year Meet the growing demand for more interactive, self-paced, educational opportunities--master the world of online learning This comprehensive, user-friendly, text will help you understand the principles behind online learning; show you how to successfully use it in the classroom, in clinical, and for staff development.

This event represents a tremendous opportunity to network with more than 1, of your colleagues in nursing, learn from thought leaders, and exchange evidence-based information and research. Our Congress theme, Influencing Global Health Through the Advancement of Nursing Scholarship, is reflected in more than plenary sessions, oral presentations, posters, and workshops designed to make an impact on your professional and personal life. While you are contributing to that positivity, make some time to discover the sights, tastes, and hospitality of our host city, Dublin, and the glorious Emerald Isle. We look forward to sharing this experience with you and to meeting and speaking with as many of you as possible. Support the Cathy Catrambone Philanthropy Circle and answer her call to action by making two donations this biennium and you will be recognized in her Philanthropy Circle. To learn more, visit the Foundation table or donate at www.stti.org. The app, for Apple and Android devices, allows you to build your own personal schedule, link directly to presentation materials, and access any late-breaking room changes. See the ad on page 8 for complete instructions on how to download and use this new feature. Schedule At-a-Glance Thursday, 27 July View the latest schedule, connect with colleagues, receive real-time updates, and more! How to get the app: After installing, a new icon will appear on the home screen. ORG General Information Open Access Evaluations When presenters grant permission, posters and oral presentation slides given at this event are permanently available in the Virginia Henderson Global Nursing e-Repository beginning on the first day of the event: Search information is available in the conference app. For more information on the Henderson Repository visit www.stti.org. You will receive the post-event evaluation via email approximately 10 days following the conclusion of this event. If you wish to provide us with additional feedback, please email events@stti.org. Your comments help us plan future STTI events. Refer to your event schedule for viewing times. Guests You are not permitted to store your baggage in the congress meeting area due to fire-code regulations. You can sign up to meet with a career advisor online at <http://www.stti.org>: If you have questions, feel free to ask a staff member at the Moderator Check-In counter, located near the registration booth. Time and space are limited, so sign-up will be on a first-come, first-served basis. Appointments will take place in the Level 4 Foyer. Children Children are not allowed to participate in any conference activities and must be supervised at all times. Check with your hotel concierge about child care services. Attendees are welcome to meet and celebrate the accomplishments of these impressive nurse researchers with an awards presentation and the opportunity for conversations with the honorees. Refer to your event schedule for registration times. As a courtesy to the presenters and other attendees, please silence all electronic devices, and refrain from talking on your cell phone during the sessions. This provides an opportunity to connect with colleagues at congress. Do not leave messages of a personal nature. STTI staff members reserve the right to remove postings that are inappropriate. Messages and announcements will not be forwarded to guest rooms. All STTI events are nonsmoking. The hotel and host city may have additional rules in place. Please speak with your hotel concierge if you have any questions. The Marketplace is located in the Forum on the Ground Floor. Please stop by to view and order STTI apparel, books, jewelry, and other gifts. Thursday, 27 July 2: Your badge admits you to all congress sessions and events and must be visible to security guards, moderators, and staff. For your safety, please write on the back of the badge your emergency contact information, any food or medicine allergies, and any significant medical conditions. Do not wear your name badge while walking outside. No further sign-in is necessary for this event. The Presenter Ready Room is located in the Liffey Boardroom 2 Level 1, and it provides a place to practice presentations. If you are using slides, you may view your presentations in the Presenter Ready Room. You will find instructions for viewing PowerPoint presentations next to each provided computer station.

Internet access is not available on these computers. The Presenter Ready Room will be open during the following times: Thursday, 27 July, Because of contractual agreements with the audiovisual provider and the possibility of virus transfers, you cannot connect personal equipment e. Additional charges are incurred with each violation and may be passed on to you. Please note that this policy will be strictly enforced. You cannot make changes to your slide presentation. You can be seated 30 minutes prior to the start of the session. For titles and times, please refer to the program schedule. You can view the poster presentations during the times listed below: Registration is open during the following times: Thursday, 27 July You cannot leave the materials used to ship or carry your poster in the poster area. You may store them in the designated area in the ballroom; however, your hotel room is the best place for these items. If you do not remove your posters or other materials from Liffey A, they will be discarded. Video and Audio Recording You are not permitted to record the plenaries or concurrent sessions. Thank you for refraining from this practice. Non-Endorsement of Products Please note: Accredited status does not imply endorsement by the provider of the educational activity or by the American Nurses Credentialing Center of any commercial products discussed or displayed in conjunction with the educational activity. Certificates for attendees, presenters, moderators, and continuing nursing education can be retrieved after the online evaluation is complete. The number of contact hours awarded to each participant will be based on the number of evaluations completed for each session attended or poster viewed. Thursday, 27 July Friday, 28 July 8: This will be done prior to the individual educational session. The deadline to receive CNE credit is 4 October

Chapter 3 : April, | Test Bank, Manual Solution, Solution Manual - Part 2

1. Author(s): Bristol, Tim J; Zerwekh, JoAnn Graham Title(s): *Essentials of e-learning for nurse educators/ [edited by] Tim J. Bristol, PhD, RN, CNE, Owner, NurseTim.*

It is this enriching component of e-learning that makes it enticing to so many learners. The appreciation for how we are geographically dissimilar and socially alike is what contributes most to the growth of learners learning online. He explained his expression of social-cognitive as social because thought and action are fundamentally social and cognitive because thought processes influence motivation, emotions, and action Bandura, A characteristic worthy of discussion is self-regulation. Individuals can think over what is going on in addition to building upon interactions to construct knowledge. Strategies for Implementation Although there are many strategies we could consider, we will take this discussion from simple to complex. Listening or reading closely to what students say about their learning is key in the e-learning realm. Many inventories are available online at no cost without a detailed report or low cost with a downloadable report. After the educator appreciates his or her own style, then it is important to study the styles that students bring to the course. The beauty of e-learning is that the course design can address all learning styles in some way so that there is something there for every learner. Those new to e-learning are often challenged by their own frame of reference self-identified teaching style that mirrors their own learning style rather than openly approaching the learning style of everyone who may be encountered. A quick search of learning style instruments will yield multiple choices to use for self-assessment. Equally important is to ask learners to assess their own styles to recognize self-contributions and respect those of others. Thus, the one learner who always must respond early and often is not ridiculed by others but recognized as an extrovert and achiever and perhaps the one who always responds last is not thought of as a laggard benefitting from the thinking of others, but an assimilator and consensus builder. From here it is easy to take a look at www. Self-regulation can be aided by providing feedback and sufficient information to be able to change behaviors or attitudes. For example, a healthy discussion presents new ideas that often differ from those of others; yet these ideas must be presented respectfully students may need coaching in respectful communication. The learner can take this feedback to change how the next interaction might be read, with or without acknowledging how others perceived it. It is up to the learner to take your offline feedback and internalize it in his or her own way. This can change the dynamic for the discussion again without directing any learner how the behavior or participation must be specifically altered. By suggesting that no one repeat the response of another in an asynchronous discussion and only build, the construction of knowledge occurs with the addition of new resources and new ideas.
