Evaluating Workgroup Color Multifunction Printers Productivity In addition to actual print engine speed, consider the factors that affect overall throughput. Is the device appropriately sized for the entire workgroup? Is the system designed to minimize network traffic? The WorkCentre series delivers a print speed of up to 55 ppm for black- and-white and 50 ppm color output. Powerful scanning capabilities include scanning at up to 70 ipm, and support for multiple scanning destinations. Duplex printing is just as fast as printing single-sided documents, and the Duplex Automatic Document Feeder DADF includes paper capacity of up to sheets. All WorkCentre series configurations come with a powerful 1. The controller enables the WorkCentre series to deliver fast first-page-out times as fast as 5. Plus, our Smart RIP technology allows the first page to start printing while subsequent pages are still processing. By keeping the front panel available for programming while the print engine is busy, users stay productive and avoid idle time. Scan and fax jobs can be programmed and executed without waiting for the print engine to become available, while newly programmed copy jobs will join the job queue and be executed when earlier jobs are completed. Whether at the device or from the desktop, users can easily manage documents and jobs through an integrated job queue. Evaluating Workgroup Ease-of-Use and Management Look for fully integrated functions that work together to create more value than the sum of their parts. Are the functions easy to learn? Is the user interface consistent from function to function? Do the network features give users full access to the power of your network? Does the device include additional software to take full advantage of digital documents? Is the multifunction printer easy for your IT organization to manage as part of its infrastructure, whether a single device or an entire fleet? It features bright, intuitive icons and easy access to all major functions directly from the home screen. Third-party applications can be integrated with the touch screen interface as well, thanks to Xerox Workflow Solutions, built on Xerox EIP technology. The drivers provide immediate desktop access to all WorkCentre output functions. The drivers also provide bidirectional information, indicating device and job status, currently loaded paper sizes and types, and installed options – so there is no need to consult other software to obtain such information. Easy-to-understand icons access the most commonly used functions, such as paper selection and document finishing. Plus with the Saved Settings feature, frequently used print job parameters can be stored for reuse. Convenient, comprehensive assistance On-board information pages give you flexibility over hard copy documentation. Network configuration is easy with CentreWare install wizards – which eliminate the need for IT staff to reset parameters, connect users or manage job queues device by device. Onboard SNMP support lets customers integrate with other network frameworks. The free software eases the chore of installing, configuring, managing, monitoring and pulling reports from the networked printers and MFPs throughout an enterprise, regardless of The innovative touch screen on the WorkCentre series front panel makes walk-up operation simple as can be. It features bright icons and intuitive navigation for optimal ease-of-use. Set color user permissions and other print restrictions with intuitive graphical interfaces. Xerox also addresses enterprise asset management through compatibility with network management tools for Sun, Novell, Microsoft and other environments. Fleet device management Powerful applications simplify device monitoring and administration: Never have to redeploy another print driver, saving hours of downtime. Xerox multifunction device configurations can be cloned and distributed to all similar multifunction devices on your network, eliminating the need to configure and manage each device individually. Users can save print feature defaults and automatically apply those settings each time they print from that application. For example, print all presentations in color and emails in black-and-white. When people work efficiently, in less time and with fewer steps, productivity goes up. Whether you have only a few people on your team or a very large workgroup, Xerox offers a wide range of MFPs that deliver flexibility and advanced features to copy, print, scan and fax – all from one device. Automated supplies replenishment Xerox offers Smart eSolutions, an application for automating and simplifying device management and ownership. Xerox makes mobile printing
